- A. Flows can be triggered by undelete events
- **B. Flows can be modified and created without a developer**
- **C. Flows provide a visual debug process**
- D. Flows have better performance options for large batches of records

**Answer: B,C**

Explanation:

Two reasons for using Flows instead of Apex code are:

Flows provide a visual debug process. Flows have a built-in debugger that allows administrators to test and troubleshoot their flows in a graphical interface. The debugger shows the flow execution path, the values of variables and sObject fields, and any errors or warnings that occur in the flow.
