The PDF version of AZ-120 training materials is convenient for you to print, the software version of training guide can provide practice test for you and the online version is for you to read anywhere at any time. If you are hesitating about which version should you choose, you can download our AZ-120 free demo first to get a firsthand experience before you make any decision.

Earning the Microsoft AZ-120 certification can be a valuable asset for IT professionals looking to advance their careers in cloud computing and SAP administration. It demonstrates that the individual has the skills and knowledge necessary to design, deploy, and manage SAP workloads in a cloud environment using Microsoft Azure. With the growing demand for SAP solutions in the cloud, this certification is becoming increasingly relevant and valuable in today's job market.

The AZ-120 exam measures the candidate's ability to design, implement, and manage SAP solutions on Azure. AZ-120 exam covers various topics such as Azure infrastructure, SAP HANA on Azure, migration of SAP workloads to Azure, and monitoring and troubleshooting SAP solutions on Azure. Candidates must demonstrate their ability to plan and deploy SAP solutions on Azure, as well as their ability to optimize performance, security, and availability of SAP solutions on Azure.

Microsoft AZ-120 Exam is an excellent opportunity for IT professionals to expand their knowledge and skills in Azure and SAP. It is a challenging exam that requires a significant amount of preparation, but it is well worth the effort. Passing AZ-120 exam will give you a competitive edge in the job market and open up new career opportunities.

The last but not least we have professional groups providing guidance in terms of download and installment remotely.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q50-Q55):

NEW QUESTION # 50

You have a Microsoft Entra tenant named contoso.com.

You have an SAP landscape in Azure.

You need to use an SAP HANA application to enable single sign-on (SSO) to contoso.com.

Which authentication protocol should you configure for the application, and what should you upload to the HANA XSA Web Console to enable SSO? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 51

You have an SAP production landscape on Azure that contains the resources shown in the following table.

You need to stop the SAP services so that you can perform monthly maintenance.

Which command should you run from the Azure Cloud Shell? To answer, select the appropriate options in the answer area NOTE:

Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 52

You have an Azure subscription.

You plan to deploy a highly available SAP NetWeaver system to an Azure region that contains three availability zones. The system will be hosted in an Azure virtual machine scale set.

You need to recommend which type of deployment and which platformFaultDomainCount value to use. The solution must maximize the availability of the system.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 53

You are deploying an SAP environment on Azure that will use an SAP HANA database server.

You provision an Azure virtual machine for SAP HANA by using the M64s virtual machine SKU.

You need to set the swap space by using the Microsoft Azure Linux Agent (waagent) configuration file.

Which two settings should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. AutoUpdate.Enabled=n
ResourceDisk.SwapSizeMB=229376
- B. ResourceDisk.EnableSwapEncryption=n
- C. ResourceDisk.EnableSwap=y

Answer: C

Explanation:

To create a swap file in the directory that's defined by the ResourceDisk.MountPoint parameter, you can update the /etc/waagent.conf file by setting the following three parameters:

ResourceDisk.Format=y

ResourceDisk.EnableSwap=y

ResourceDisk.SwapSizeMB=xx

NEW QUESTION # 54

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.
