Salesforce Health Cloud Accredited Professional Sample Questions (Q54-Q59):

NEW QUESTION # 54

During set up a salesforce admin is unable to install the health cloud claims unmanaged package. What is the reason?

- A. The administrator doesn't have health cloud license
- B. The administrator is not registered in AppExchange
- **C. The health cloud managed package is missing**
- D. The health cloud permission set license is missing

Answer: C

NEW QUESTION # 55

A payer receives faxes for clinical review as part of the determination process. The payer needs Health Cloud to automatically capture the data from the documents received from patients and manage the end-to-end approval process.

Which two Health Cloud capabilities should a consultant recommend as a way to build this process?

Choose 2 answers

- **A. Intelligent Document Automation**
- B. Integrated Care Management
- C. Care Authorizations
- **D. Utilization Management**

Answer: A,D

Explanation:

To automate the capture of data from faxes for clinical reviews and manage the approval process in Salesforce Health Cloud, the following capabilities are recommended:

- * Utilization Management in Health Cloud supports the payer's clinical review process by enabling workflows for reviewing medical necessity and care appropriateness.
 - * It provides structured workflows for processing clinical documents, making it ideal for end-to-end determination and approval processes.
 - * Features include care authorizations, review tracking, and decision management.
 - * Intelligent Document Automation extracts data from documents (e.g., faxes, PDFs) and populates corresponding Salesforce records.
 - * This capability reduces manual data entry, improves accuracy, and ensures data is automatically captured from the faxes received.
 - * Paired with Salesforce workflows, it can trigger approvals or further reviews based on extracted data.
1. Utilization Management (A); 2. Intelligent Document Automation (C); Why Other Options Are Incorrect:
- * B. Integrated Care Management: Focuses on patient care plans and coordination, not clinical review or payer processes.
 - * D. Care Authorizations: Handles care approvals but does not support document data extraction or end-to-end review processes.

Intelligent Document Automation Overview

NEW QUESTION # 56

A consultant is implementing Identity Verification for their customer's customer service representatives and needs to add a new search parameter.

Which record should the consultant configure to accomplish this?

- A. Linked Identity Search Detail
- B. Verification Search Feature
- C. Identity Verification Parameter Item
- **D. Identity Verification Process Detail**

Answer: D

NEW QUESTION # 57

Bloomington Caregivers has decided to enable Integrated Care Management so that its end users can leverage Health Cloud Assessments. Administrators must now configure their org to be able to use Assessments.

Which three steps should the administrator take as part of the org setup to enable Assessments?

Choose 3 answers

- A. Add the Assessment component to the Patient page
- **B. Download and Install OmniStudio.**
- **C. Enable Discovery Framework in Setup.**
- **D. Enable users to view and complete Assessments.**
- E. Update sharing settings in Setup.

Answer: B,C,D

Explanation:

To enable Assessments in Salesforce Health Cloud, administrators must configure the org appropriately, ensuring that users can effectively utilize assessment tools for patient evaluations. The following steps are essential:

Download and Install OmniStudio (Answer A):

Purpose: OmniStudio provides a suite of declarative tools, including OmniScripts and DataRaptors, essential for building and managing assessments within Health Cloud.

Implementation Steps:

Access Salesforce AppExchange: Navigate to the AppExchange marketplace.

Search for OmniStudio: Locate the OmniStudio package suitable for your Salesforce edition.

Install the Package: Follow the installation prompts, ensuring that all components are correctly deployed.

Reference:

Enable Users to View and Complete Assessments (Answer B):

Purpose: Granting appropriate permissions ensures that users can access, view, and complete assessments as part of patient care management.

Implementation Steps:

Assign Permission Sets:

Health Cloud Permission Sets: Assign relevant Health Cloud permission sets to users, such as Health Cloud Standard or Health Cloud Platform, to provide baseline access.

NEW QUESTION # 58

A payer needs to manage requests for concurrent review of prior authorizations within Health Cloud and wants to use out-of-the-box record types and page layouts. However, the payer's Salesforce administrator does not see any preconfigured record types or page layouts for prior authorizations in the payer's Salesforce org.

What should a consultant recommend to the Salesforce administrator to expedite implementation?

- A. Build custom page layouts and record types to support the requirement.
- B. Install an AppExchange prior authorization package.

- C. Install the Health Cloud Care Request Extensions package.
- D. Install the Health Cloud Claims unmanaged package.

Answer: C

Explanation:

The Health Cloud Care Request Extensions package provides out-of-the-box record types and page layouts for prior authorizations, as well as other features for managing care requests1.

NEW QUESTION # 59
