Are you a new comer in your company and eager to make yourself outstanding? Our ISO-IEC-27001-Foundation exam materials can help you. After a few days' studying and practicing with our products you will easily pass the ISO-IEC-27001-Foundation examination. God helps those who help themselves. If you choose our ISO-IEC-27001-Foundation Study Guide, you will find God just by your side. The only thing you have to do is just to make your choice and study. Isn't it very easy? So know more about our ISO-IEC-27001-Foundation practice engine right now!

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 2	<ul style="list-style-type: none">Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 3	<ul style="list-style-type: none">Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 4	<ul style="list-style-type: none">Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

Latest ISO-IEC-27001-Foundation Test Testking & ISO-IEC-27001-Foundation Reliable Test Syllabus

We have developed three versions of our ISO-IEC-27001-Foundation exam questions. So you can choose the version of ISO-IEC-27001-Foundation training guide according to your interests and habits. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study ISO-IEC-27001-Foundation Practice Engine anytime and anyplace for the convenience these three versions bring.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Suitability
- B. Effectiveness
- C. Adequacy
- **D. Importance**

Answer: D

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 36

Which factor is required to be determined when understanding the organization and its context?

- A. The ISO/IEC 27001 clauses which apply to the management system
- B. The processes that will be required to operate the ISMS
- C. The information security objectives relevant to the ISMS
- **D. Internal issues affecting the purpose of the ISMS**

Answer: D

Explanation:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

NEW QUESTION # 37

Which item is required to be defined when planning the organization's risk assessment process?

- **A. The criteria for acceptable levels of risk**
- B. There are NO specific information requirements

- C. How the effectiveness of the method will be measured
- D. The parts of the ISMS scope which are excluded from the risk assessment

Answer: A

Explanation:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.

NEW QUESTION # 38

Who determines the number of days required for a certification audit?

- **A. The external auditor from the Certification Body who will undertake the audit**
- B. The management representative from the organization to be audited
- C. Both the management representative and the external auditor together
- D. The lead internal auditor from the organization to be audited

Answer: A

Explanation:

Certification audits are carried out by Certification Bodies (CBs), not the organization itself. ISO/IEC 27001 requires external certification audits to be independent, impartial, and objective. According to ISO/IEC 27006 (Requirements for bodies providing audit and certification of ISMS), the Certification Body determines the audit duration and number of audit days based on factors such as organizational size, complexity, scope, and risk environment. This ensures consistency across organizations and prevents manipulation by the auditee. ISO/IEC 27001 Clause 9.2 and 9.3 address internal audit and management review, but the determination of certification audit days is outside the organization's control; it rests solely with the accredited Certification Body auditors. Thus, answer: A is correct, as the CB's external auditor formally calculates and assigns the audit time.

NEW QUESTION # 39

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Implementing the actions from internal audits
- B. Producing a risk assessment report
- C. Communicating feedback from interested parties to the organization
- **D. Ensuring information security objectives are established**

Answer: D

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 40

.....

The content of our ISO-IEC-27001-Foundation practice engine is chosen so carefully that all the questions for the ISO-IEC-27001-Foundation exam are contained. And our ISO-IEC-27001-Foundation study materials have three formats which help you to read, test and study anytime, anywhere. This means with our products you can prepare for exams efficiently and at the same time you will get 100% success for sure. If you desire a ISO-IEC-27001-Foundation Certification, our products are your best choice.
