IBM DataPower Gateway v10.x Administrator - Professional Sample Questions (Q49-Q54):

NEW QUESTION # 49

In the context of DataPower appliances, what is typically the role of the x2 form factor series?

- A. Optimized for heavy computational tasks and physical device management

- B. Primarily used for physical testing environments with limited network configurations
- C. **Designed for high availability and clustering to handle large-scale deployments**
- D. Dedicated to low-traffic environments with no need for external storage

Answer: C

NEW QUESTION # 50

What is the recommended method for managing the appliance's internal storage during maintenance?

- A. Perform a disk cleanup manually by deleting unnecessary files from the internal storage
- B. **Use the web GUI to manage storage settings and ensure sufficient disk space**
- C. Use the CLI to monitor storage usage and configure quotas for each domain
- D. Disable internal storage during maintenance to prevent data loss

Answer: B

NEW QUESTION # 51

Which of the following best describes the primary difference between the physical form factors of DataPower appliances?

- A. **Some form factors are designed for high availability and redundancy, while others are for single-node configurations**
- B. All form factors have the same hardware specifications, with no difference in storage or processing power
- C. Some form factors support external storage, while others are limited to internal storage only
- D. Form factors differ only in size, with no impact on network capabilities or performance

Answer: A

NEW QUESTION # 52

Scenario: You are tasked with securing the DataPower appliance to ensure that only authorized users can access the management interface.

What two actions should you take to improve security? (Choose two)

- A. **Implement strong password policies and require password changes every 30 days**
- B. Use SSH for remote access to the appliance's management interface instead of HTTP
- C. **Restrict access to the appliance management interface by IP address using ACLs**
- D. Enable guest access for easier management of the appliance during off-hours

Answer: A,C

NEW QUESTION # 53

Which of the following methods can be used to secure user authentication when accessing the DataPower appliance?

- A. Allow any IP address to access the appliance
- B. Set weak password policies to simplify user access
- C. Enable anonymous authentication for all users
- D. **Use LDAP or Active Directory for centralized authentication**

Answer: D

NEW QUESTION # 54

.....
