Getting the Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) certification exam is necessary in order to get a job in your desired tech company. Success in the Hybrid Cloud Observability Network Monitoring Exam certification exam gives you an edge over the others because you will have certified skills. The Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) certification exam badge will make a good impression on the interviewer. Most of the people planning to attempt the Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) exam are confused that how will they prepare and pass Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) exam with good grades.

By overcoming your mistakes before the actual SolarWinds Hybrid-Cloud-Observability-Network-Monitoring exam, you can avoid making those same errors during the Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) real test. With customizable Hybrid-Cloud-Observability-Network-Monitoring practice tests, you can adjust the duration and quantity of Hybrid-Cloud-Observability-Network-Monitoring Practice Questions. This self-assessment Hybrid-Cloud-Observability-Network-Monitoring exam display your marks, helping you improve your performance while tracking your progress.

## Hybrid-Cloud-Observability-Network-Monitoring Exam Quizzes, Hybrid-Cloud-Observability-Network-Monitoring Latest Test Materials

Our research materials will provide three different versions of Hybrid-Cloud-Observability-Network-Monitoring valid practice questions, the PDF version, the software version and the online version. Software version of the features are very practical, I think you can try to use our Hybrid-Cloud-Observability-Network-Monitoring test prep software version. I believe you have a different sensory experience for this version of the product. Because the software version of the Hybrid-Cloud-Observability-Network-Monitoring Study Guide can simulate the real test environment, users can realize the effect of the atmosphere of the Hybrid-Cloud-Observability-Network-Monitoring exam at home through the software version.

## SolarWinds Hybrid Cloud Observability Network Monitoring Exam Sample Questions (Q89-Q94):

### NEW QUESTION # 89

Which two of the following authentication methods are supported when configuring a database log collection in hybrid cloud observability? (Choose two.)

- A. Windows
- B. Kerberos
- C. mixed mode
- D. oAUTH

**Answer: A,C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When configuring database log collection (e.g., from SQL Server), SolarWinds supports:

Mixed mode authentication (SQL Server and Windows authentication)

Windows authentication

Kerberos and oAUTH are not supported directly as authentication methods for log collection from SQL Server databases in the SolarWinds platform.

References:

Log Analyzer Administrator Guide: Supported Authentication for Database Log Collection

### NEW QUESTION # 90

A "no data" message is displayed in NetFlow charts. How can this be resolved?

- A. Shorten the time for view and resource.
- B. Restart collector service.
- C. Refresh the current window.
- D. Confirm account has viewing permissions.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A "no data" message in NetFlow charts usually indicates that the flow collector service is not receiving or processing flow data. One of the primary troubleshooting steps recommended in the SolarWinds documentation is to restart the collector service. This resolves issues caused by service interruptions, memory leaks, or flow processing errors.

The documentation states:

"If NetFlow charts display 'no data,' verify that the NetFlow collector service is running. Restart the collector service if necessary, as service interruptions can cause a lack of flow data display." References:

Network Performance Monitor Administrator Guide, "Troubleshooting NetFlow No Data Issues" SolarWinds Success Center: "NetFlow Collector Service Troubleshooting"

### NEW QUESTION # 91

Which two of the following standards does hybrid cloud observability use to capture flow data and CBQoS data? (Choose two.)

- A. Net Flow
- B. IP Fix
- C. SNMP
- D. J-Flow

**Answer: A,B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

SolarWinds Hybrid Cloud Observability (HCO) supports capturing flow data and CBQoS data using:

A). IPFIX: (IP Flow Information Export) is the IETF standard for exporting flow information, supported for both flow data and CBQoS.

C). NetFlow: Developed by Cisco, widely used for flow and CBQoS data collection.

J-Flow is primarily for flow data (from Juniper devices), and SNMP is not a flow export protocol.

The documentation states:

"NetFlow (including NetFlow v9) and IPFIX are supported for flow and CBQoS data collection. These standards provide extensive network traffic and QoS visibility within HCO." References:

Network Performance Monitor Administrator Guide, "Supported Flow and CBQoS Protocols" SolarWinds NTA Documentation

#### NEW QUESTION # 92

In live mode, how frequently is log viewer data automatically refreshed?

- A. 1 minute
- **B. 10 seconds**
- C. 10 minutes
- D. 1 second

**Answer: B**

#### NEW QUESTION # 93

Which application classification system is used with deep packet inspection technologies to provide better visibility into network traffic and is a mechanism used by certain Cisco routers/switches to recognize dataflow by inspecting some of the packets sent?

- **A. NBAR2 applications**
- B. autonomous systems
- C. CBQoS drops
- D. flow navigator

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

NBAR2 (Next Generation Network-Based Application Recognition) is Cisco's deep packet inspection technology used to classify network traffic at the application layer. It provides visibility by inspecting packet payloads, not just ports, and is supported in SolarWinds for advanced application recognition.

SolarWinds documentation states:

"NBAR2 allows supported Cisco devices to classify traffic by application using deep packet inspection. This provides detailed application visibility within SolarWinds network monitoring solutions." References:

Network Performance Monitor Administrator Guide, "NBAR2 and Application Classification" SolarWinds Success Center: "Using NBAR2 with NetFlow"

#### NEW QUESTION # 94

.....

DumpsActual has created budget-friendly Hybrid-Cloud-Observability-Network-Monitoring study guides because the registration price for the SolarWinds certification exam is already high. You won't ever need to look up information in various books because our SolarWinds Hybrid-Cloud-Observability-Network-Monitoring Real Questions are created with that in mind. Additionally, in the event that the curriculum of SolarWinds changes, we provide free upgrades for up to three months.

**Hybrid-Cloud-Observability-Network-Monitoring Exam Quizzes:** <https://www.dumpsactual.com/Hybrid-Cloud-Observability-Network-Monitoring-actualtests-dumps.html>

In addition, you will easily pass the exam with the help of our Hybrid-Cloud-Observability-Network-Monitoring exam quiz material. It can bring you to the atmosphere of Hybrid-Cloud-Observability-Network-Monitoring valid test and can support any electronic equipment, such as: Windows/Mac/Android/iOS operating systems, which mean that you can practice your Hybrid-Cloud-Observability-Network-Monitoring (Hybrid Cloud Observability Network Monitoring Exam) exam dumps anytime without limitation, SolarWinds New Hybrid-Cloud-Observability-Network-Monitoring Test Experience Part of candidates even gave up halfway since they failed many times and felt despairing.

When one option is too many, At the end of each list, the final item read, An ability to communicate, verbally and in writing. In addition, you will easily pass the exam with the help of our Hybrid-Cloud-Observability-Network-Monitoring exam quiz material.

# 100% Pass Quiz 2026 SolarWinds Fantastic New Hybrid-Cloud-Observability-Network-Monitoring Test Experience

It can bring you to the atmosphere of Hybrid-Cloud-Observability-Network-Monitoring valid test and can support any electronic equipment, such as: Windows/Mac/Android/iOS operating systems, which mean that you can practice your Hybrid-Cloud-Observability-Network-Monitoring (Hybrid Cloud Observability Network Monitoring Exam) exam dumps anytime without limitation.

Part of candidates even gave up halfway since New Hybrid-Cloud-Observability-Network-Monitoring Test Experience they failed many times and felt despairing. The perfect SolarWinds Hybrid-Cloud-Observability-Network-Monitoring exam dumps from our website are aimed at Hybrid-Cloud-Observability-Network-Monitoring making well preparation for your certification exam and get high passing score.

It helps us to keep our Hybrid-Cloud-Observability-Network-Monitoring exam dumps preparation material polished, updated, and error-free.
