

CITM Fragen Antworten - CITM Online Test

Außerdem sind jetzt einige Teile dieser ZertPruefung CITM Prüfungsfragen kostenlos erhältlich: <https://drive.google.com/open?id=1G3Ftj1jykoP5iOGvNO7Dnapb1hGKyeV>

Es ist ganz normal, vor der Prüfung Angst zu haben, besonders vor der schwierig Prüfung wie EXIN CITM. Wir wissen, dass allein mit der Ermutigung können Ihnen nicht selbstbewusst machen. Deshalb bieten wir die praktische Prüfungssoftware, um Ihnen zu helfen, EXIN CITM zu bestehen. Sie können zuerst die Demo der EXIN CITM gratis probieren. Wir glauben, dass Sie bestimmt unsere Bemühungen und Professionellsein von der Demo empfinden!

EXIN CITM Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> IT Strategy: This section of the exam measures the skills of an IT Strategy Manager and covers the development and alignment of IT strategy with business objectives. It emphasizes creating strategic plans to support organizational goals, understanding emerging technologies, and ensuring that IT investments contribute to competitive advantage and operational efficiency.
Thema 2	<ul style="list-style-type: none"> Application Management: This section of the exam evaluates an Application Manager's skills in overseeing the lifecycle of IT applications. It covers application development support, maintenance, upgrades, user support, and ensuring that applications meet functional and performance standards aligned with business needs.
Thema 3	<ul style="list-style-type: none"> Project Management: This domain is aimed at an IT Project Manager and encompasses planning, executing, and controlling IT projects. It includes managing scope, time, cost, quality, and risks, applying project methodologies, engaging stakeholders, and delivering projects that meet business requirements.
Thema 4	<ul style="list-style-type: none"> IT Organization: This domain targets an IT Operations Manager and focuses on the design and management of IT organizational structures. It includes defining roles and responsibilities, establishing governance frameworks, managing resources effectively, and fostering collaboration to support IT service delivery and business needs.
Thema 5	<ul style="list-style-type: none"> Vendor Selection Management: This section measures the expertise of a Vendor Manager and covers the process of selecting and managing third-party providers. It addresses evaluating vendor capabilities, negotiating contracts, monitoring performance, and maintaining productive relationships to ensure service quality and value.
Thema 6	<ul style="list-style-type: none"> Information Security Management: This section targets an Information Security Manager and focuses on protecting information assets from threats. It covers policy development, security controls implementation, incident response, data protection, and compliance with legal and regulatory requirements to maintain confidentiality, integrity, and availability.

Thema 7	<ul style="list-style-type: none"> • Business Continuity Management: This section measures the skills of a Business Continuity Manager and covers planning and implementing strategies to ensure IT availability and resilience during disruptions. It includes risk assessment, disaster recovery planning, backup procedures, and testing to minimize business impact.
Thema 8	<ul style="list-style-type: none"> • Risk Management: This domain evaluates the capabilities of an IT Risk Manager and involves identifying, assessing, and mitigating IT-related risks. It addresses developing risk frameworks, compliance management, and proactive measures to safeguard IT assets and operations.

CITM Neuesten und qualitativ hochwertige Prüfungsmaterialien bietet - quizfragen und antworten

Während andere Leute in der U-Bahn erstarren, können Sie mit Pad die PDF Version von EXIN CITM Prüfungsunterlagen lesen. Während andere im Internet spielen, können Sie mit Online Test Engine der EXIN CITM trainieren. Wir glauben, dass so fleißig wie Sie sind, können Sie bestimmt in einer sehr kurzen Zeit die EXIN CITM Prüfung bestehen. Während andere noch über Ihre ausgezeichnete Erzeugnisse erstaunen, haben Sie wahrscheinlich ein wunderbare Arbeitsstelle bekommen.

EXIN EPI Certified Information Technology Manager CITM Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

In testing the business continuity plan, senior business managers wish to compare data which is in both the main and alternative site, before participating in a full interruption test. Which type of test do they want to take place?

- A. Simulation test
- **B. Parallel test**
- C. Checklist test
- D. Structured walk-through test

Antwort: B

Begründung:

Aparallel test(A) in business continuity planning involves running systems at both the primary and alternate sites simultaneously to compare data and ensure the alternate site can handle operations effectively. This test verifies data replication and system functionality without interrupting normal operations, aligning with the managers' desire to compare data before a full interruption test.

* Simulation test (B):This involves simulating a disaster scenario to test response procedures without activating the alternate site, so it doesn't focus on data comparison.

* Structured walk-through test (C):This is a tabletop exercise where team members discuss and review the plan without executing systems or comparing data.

* Checklist test (D):This involves reviewing the business continuity plan against a checklist to ensure completeness, not comparing data between sites.

According toISO 22301orbusiness continuity managementframeworks, a parallel test is used to validate recovery capabilities while maintaining operations at the primary site, making it ideal for the scenario described.

Reference:EPI CITM study guide, under Business Continuity Management, likely covers business continuity testing methodologies, referencing parallel tests in the context of disaster recovery validation. Check sections on business continuity planning or testing strategies.

23. Frage

On behalf of senior management, the Human Resource management department instructs all unit managers to perform appraisal meetings using SMART conditions. Which method is expected to be followed?

- A. Performance ranking method
- B. Ranking
- C. Graphic rating scales

- **D. Management By Objectives**

Antwort: D

Begründung:

SMART(Specific, Measurable, Achievable, Relevant, Time-bound) is a goal-setting framework commonly associated with Management By Objectives (MBO). MBO involves setting clear, measurable objectives for employees, aligning individual performance with organizational goals. In appraisal meetings, using SMART conditions ensures that performance goals are clearly defined and trackable, which is a hallmark of MBO.

Graphic rating scales (B) involve rating employees on a scale for various traits, not necessarily tied to SMART goals. Ranking (C) and Performance ranking method (D) focus on comparing employees, which doesn't align with SMART's emphasis on individual, objective-based performance evaluation.

Reference:EPI CITM study guide, under IT Organization, likely discusses performance management and appraisal techniques, referencing MBO in the context of SMART goal-setting. Refer to sections on human resource management or organizational performance.

24. Frage

During the system (application) development project, the customer wants to know how software will be maintained to assure that future functional requirements are incorporated. What type of system maintenance is the customer looking for?

- A. Adaptive maintenance
- B. Preventive maintenance
- **C. Perfective maintenance**
- D. Corrective maintenance

Antwort: C

Begründung:

The customer's focus on incorporating future functional requirements indicates a need for perfective maintenance (C). In application management, perfective maintenance involves enhancing software to add new features or improve functionality to meet evolving business needs, such as adding new modules or capabilities.

* Preventive maintenance (A): Focuses on preventing issues by optimizing performance or addressing potential problems, not adding new features.

* Corrective maintenance (D): Involves fixing bugs or errors, not incorporating new functionality.

* Adaptive maintenance (B): Adapts software to environmental changes (e.g., new operating systems), not specifically for new functional requirements.

Perfective maintenance aligns with the SDLC's maintenance phase, ensuring the software evolves to support future business requirements.

Reference:EPI CITM study guide, under Application Management, likely covers software maintenance types in the SDLC, emphasizing perfective maintenance for enhancements. Refer to sections on application lifecycle or maintenance strategies.

25. Frage

The team responsible for network security has proposed a firewall as the preferred control for the network perimeter. How is this type of control categorized?

- A. Administrative deterrent control
- B. Physical corrective control
- **C. Technical preventive control**
- D. Physical detective control

Antwort: C

Begründung:

A firewall is categorized as a technical preventive control (C) in information security management.

According to ISO/IEC 27001, preventive controls aim to stop security incidents before they occur, and technical controls involve technology-based solutions. A firewall prevents unauthorized access to the network perimeter by filtering traffic, making it a technical preventive control.

* Physical detective control (D): Involves physical measures (e.g., cameras) to detect incidents, not applicable to firewalls.

* Administrative deterrent control (A): Involves policies or procedures to discourage violations, not technology-based.

* Physical corrective control (D):Addresses physical issues post-incident, not relevant to firewalls.

Reference:EPI CITM study guide, under Information Security Management, likely references ISO/IEC

27001's control categories, emphasizing technical preventive controls. Check sections on security controls or network security.

26. Frage

Senior management is concerned fraudulent activities may take place during large financial transactions. To reduce the risk of fraud, it expects the proper controls to be in place. Which security principle is in need of the highest attention?

- A. Integrity
- B. Availability
- C. Confidentiality
- D. Reliability

Antwort: A

Begründung:

To reduce the risk of fraud in large financial transactions, the security principle of integrity(C) requires the highest attention. Integrity, as per ISO/IEC 27001's CIA triad (Confidentiality, Integrity, Availability), ensures that data is accurate, complete, and unaltered. Fraud often involves manipulating transaction data, so controls like data validation, checksums, or audit trails are critical to maintain integrity and prevent unauthorized changes.

* Confidentiality (A):Protects data from unauthorized access, less directly related to fraud prevention.

* Availability (B):Ensures system access, not the primary concern for fraud.

* Reliability (D):Not a standard CIA triad principle; may relate to system performance but not fraud.

Reference:EPI CITM study guide, under Information Security Management, likely references the CIA triad, emphasizing integrity for fraud prevention. Check sections on security principles or fraud controls.

27. Frage

.....

Wollen Sie, ein ITer, durch den Erfolg zu IT-Zertifizierungsprüfungen Ihre Fähigkeit beweisen? Und heute besitzen immer mehr Ihre Freuden und Kommilitonen die IT-Zertifizierungen. Und in diesem Fall können Sie weniger Chancen haben, wenn Sie keine Zertifizierung haben. Und haben Sie sich entschieden, welche Prüfung abzulegen? Wie sind EXIN Prüfungen? Oder EXIN CITM Zertifizierungsprüfung? EXIN CITM Zertifizierungsprüfung ist wertvoll und hilft Ihnen unbedingt, Ihren Wunsch zu erreichen.
