The pass rate is 98.65% for DEA-C01 study guide, and you can pass the exam just one time. In order to build up your confidence for the exam, we are pass guarantee and money back guarantee. If you fail to pass the exam by using DEA-C01 exam braindumps of us, we will give you full refund. Besides, DEA-C01 learning materials are edited and verified by professional specialists, and therefore the quality can be guaranteed, and you can use them at ease. We have online and offline service. If you have any questions for DEA-C01 Exam Materials, you can consult us, and we will give you reply as quick as possible.

The customer is God. DEA-C01 learning dumps provide all customers with high quality after-sales service. After your payment is successful, we will dispatch a dedicated IT staff to provide online remote assistance for you to solve problems in the process of download and installation. During your studies, DEA-C01 study tool will provide you with efficient 24-hour online services. You can email us anytime, anywhere to ask any questions you have about our DEA-C01 Study Tool. At the same time, DEA-C01 test question will also generate a report based on your practice performance to make you aware of the deficiencies in your learning process and help you develop a follow-up study plan so that you can use the limited energy where you need it most. So with DEA-C01 study tool you can easily pass the exam.

## DEA-C01 Valid Exam Papers, Exam DEA-C01 Syllabus

Our company has successfully launched the new version of the DEA-C01 study materials. Perhaps you are deeply bothered by preparing the DEA-C01 exam. Now, you can totally feel relaxed with the assistance of our DEA-C01 study materials. Our products are reliable and excellent. What is more, the passing rate of our DEA-C01 Study Materials is the highest in the market. Purchasing our DEA-C01 study materials means you have been half success. Good decision is of great significance if you want to pass the DEA-C01 exam for the first time.

### Snowflake DEA-C01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Performance Optimization: This topic assesses the ability to optimize and troubleshoot underperforming queries in Snowflake. Candidates must demonstrate knowledge in configuring optimal solutions, utilizing caching, and monitoring data pipelines. It focuses on ensuring engineers can enhance performance based on specific scenarios, crucial for Snowflake Data Engineers and Software Engineers.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Data Transformation: The SnowPro Advanced: Data Engineer exam evaluates skills in using User-Defined Functions (UDFs), external functions, and stored procedures. It assesses the ability to handle semi-structured data and utilize Snowpark for transformations. This section ensures Snowflake engineers can effectively transform data within Snowflake environments, critical for data manipulation tasks.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Security: The Security topic of the DEA-C01 test covers the principles of Snowflake security, including the management of system roles and data governance. It measures the ability to secure data and ensure compliance with policies, crucial for maintaining secure data environments for Snowflake Data Engineers and Software Engineers.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Storage and Data Protection: The topic tests the implementation of data recovery features and the understanding of Snowflake's Time Travel and micro-partitions. Engineers are evaluated on their ability to create new environments through cloning and ensure data protection, highlighting essential skills for maintaining Snowflake data integrity and accessibility.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Data Movement: Snowflake Data Engineers and Software Engineers are assessed on their proficiency to load, ingest, and troubleshoot data in Snowflake. It evaluates skills in building continuous data pipelines, configuring connectors, and designing data sharing solutions.</li></ul>

### Snowflake SnowPro Advanced: Data Engineer Certification Exam Sample Questions (Q281-Q286):

#### NEW QUESTION # 281

Data Engineer decided to call the public REST endpoints to load data and retrieve load history re-ports. Which of the following REST endpoints and a Snowflake Information Schema table function for viewing your load history can be used by her? [Select All that apply]

- A. Account Usage view: COPY\_HISTORY
- B. Information Schema table function: LOAD\_HISTORY
- C. Information Schema table function: COPY\_HISTORY
- D. REST endpoints: insertReport or loadHistoryScan
- E. REST endpoints: loadinsertReport or HistoryScan

Answer: A,C,D

Explanation:

Explanation

Snowflake provides REST endpoints and an Snowflake Information Schema table function for viewing your load history:  
REST endpoints:

insertReport  
loadHistoryScan  
Information Schema table function:  
COPY\_HISTORY  
Account Usage view:  
COPY\_HISTORY

#### NEW QUESTION # 282

A company runs a data platform on AWS. The data platform uses AWS Glue to provide a data catalog and to perform processing. The company notices quality issues in the data.

The company needs to implement data quality validations. The validations must include rules for known issues. The validations must have the ability to automatically detect unexpected data quality issues.

Which solution will meet these requirements with the LEAST operation overhead?

- A. Use AWS Glue jobs to implement AWS Glue Data Quality validations that include anomaly detection.
- B. Use AWS Glue jobs to implement data quality rules that use open source data quality frameworks.
- C. Use AWS Glue DataBrew to profile the data. Configure data quality rules based on the data quality results from the profiling.
- D. Use AWS Glue jobs to implement data quality validations that use SQL statements.

**Answer: A**

Explanation:

AWS Glue Data Quality provides native, managed data quality rules with built-in anomaly detection, allowing validation of known issues while automatically identifying unexpected data quality problems with minimal operational effort.

#### NEW QUESTION # 283

A data engineer needs to create an AWS Lambda function that converts the format of data from .csv to Apache Parquet. The Lambda function must run only if a user uploads a .csv file to an Amazon S3 bucket.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Create an S3 event notification that has an event type of `s3:ObjectCreated:*`. Use a filter rule to generate notifications only when the suffix includes `.csv`. Set the Amazon Resource Name (ARN) of the Lambda function as the destination for the event notification.
- B. Create an S3 event notification that has an event type of `s3:ObjectTagging:*` for objects that have a tag set to `.csv`. Set the Amazon Resource Name (ARN) of the Lambda function as the destination for the event notification.
- C. Create an S3 event notification that has an event type of `s3:*`. Use a filter rule to generate notifications only when the suffix includes `.csv`. Set the Amazon Resource Name (ARN) of the Lambda function as the destination for the event notification.
- D. Create an S3 event notification that has an event type of `s3:ObjectCreated:*`. Use a filter rule to generate notifications only when the suffix includes `.csv`. Set an Amazon Simple Notification Service (Amazon SNS) topic as the destination for the event notification. Subscribe the Lambda function to the SNS topic.

**Answer: A**

Explanation:

This solution directly triggers the Lambda function only when a .csv file is uploaded to the S3 bucket, minimizing unnecessary invocations of the Lambda function. It uses a specific event type (`s3:ObjectCreated:*`) and a filter rule to ensure that the Lambda function is invoked only for relevant events. Additionally, it directly invokes the Lambda function without the need for additional services like Amazon SNS, reducing operational overhead.

#### NEW QUESTION # 284

A company stores data in Amazon S3 and Amazon RDS. The company needs to apply technical controls to meet security requirements. The company must generate backups of the data and retain the backups for specified retention periods. The company must protect the backups from accidental or malicious deletion during the retention periods.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Create S3 buckets with versioning and MFA Delete enabled. Set a backup retention period and backup window for each

RDS DB instance. Use the automated backup feature of Amazon RDS, and take additional snapshots as required.

- **B. Create a backup plan in AWS Backup. Specify the backup schedule, set window and lifecycle values, and select a backup vault. Assign the Amazon S3 and Amazon RDS resources to the backup plan. Create a vault lock in compliance mode.**
- C. Create S3 buckets with versioning and Same-Region Replication enabled. Set a backup retention period and backup window for each RDS DB instance. Use the automated backup feature of Amazon RDS. Take additional snapshots as required.
- D. Create S3 buckets with versioning and Cross-Region Replication enabled. Set a backup retention period and backup window for each RDS DB instance. Use Amazon RDS automated backups. Take additional snapshots as required.

**Answer: B**

Explanation:

AWS Backup centrally automates backups for S3 and RDS with scheduled plans and lifecycle policies, and Vault Lock (compliance mode) enforces WORM immutability to prevent modification or deletion during retention, meeting security and retention requirements with minimal administration.

### NEW QUESTION # 285

Which of the following security and governance tools/technologies are known to provide native connectivity to Snowflake? [Select 2]

- A. Dataiku
- **B. ALTR**
- C. Zeppl
- **D. Baffle**
- E. BIG Squid

**Answer: B,D**

Explanation:

Explanation

Security and governance tools ensure sensitive data maintained by an organization is protected from inappropriate access and tampering, as well as helping organizations to achieve and maintain regulatory compliance. These tools are often used in conjunction with observability solutions/services to provide organizations with visibility into the status, quality, and integrity of their data, including identifying potential issues.

Together, these tools support a wide range of operations, including risk assessment, intrusion detection/monitoring/notification, data masking, data cataloging, data health/quality checks, issue identification/troubleshooting/resolution, and more.

ALTR & Baffle are correct options here.

### NEW QUESTION # 286

.....

Don't need a lot of time and money, only 30 hours of special training, and you can easily pass your first time to attend Snowflake Certification DEA-C01 Exam. Itexamguide are able to provide you with test exercises which are closely similar with real exam questions.
