Our company owns the most popular reputation in this field by providing not only the best ever DEP-2025 study guide but also the most efficient customers' servers. We can lead you the best and the fastest way to reach for the certification of DEP-2025 Exam Dumps and achieve your desired higher salary by getting a more important position in the company.

Apple Deployment and Management Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

Which type of enrollment separates personal and managed data on BYOD devices?

- A. Device Enrollment
- **B. User Enrollment**
- C. Automated Device Enrollment

Answer: B

Explanation:

User Enrollment is designed for Bring Your Own Device (BYOD) scenarios, separating personal and managed data on the device. It uses a Managed Apple ID to apply organizational policies (e.g., managed apps) while leaving personal data (e.g., photos, personal apps) untouched, leveraging a cryptographic separation. Automated Device Enrollment (option A) is for organization-owned devices with full control, not BYOD. Device Enrollment (option B) applies to organization-owned or manually enrolled devices without inherent data separation. The Apple Platform Deployment Guide details User Enrollment's privacy-focused approach for BYOD. Reference: Apple Platform Deployment Guide (Chapter: User Enrollment).

NEW QUESTION # 76

What must you upload to MDM so that you can distribute App Store apps to your MDM-enrolled devices?

- A. Server token
- **B. Content token**
- C. App token
- D. Distribution token

Answer: B

Explanation:

A content token, downloaded from ABM or Apple School Manager (ASM), must be uploaded to the MDM server to enable Managed Distribution of App Store apps. The Apple Business Manager User Guide explains, "To distribute apps, download the content token from Apple Business Manager and upload it to your MDM solution. This token links your MDM server to your app licenses, enabling managed distribution." Options B and D are fictitious, and C is for device enrollment, not app distribution.

Reference:

Apple Business Manager User Guide, "Apps and Books" section.
Mobile Device Management Protocol Reference, "Managed Distribution" section.

NEW QUESTION # 77

What's required to use content caching on a Mac?

- A. Supervision
- **B. macOS 10.13 or later**
- C. A VPN configuration
- D. An MDM solution

Answer: B

Explanation:

Content caching requires a Mac running macOS 10.13 (High Sierra) or later, enabling it to cache content like app updates and iCloud data for network efficiency. An MDM solution (option A) can manage caching settings but isn't required to enable it. Supervision (option C) is unrelated, as caching is a macOS feature, not a supervision requirement. A VPN configuration (option D) doesn't apply. The Apple Platform Deployment Guide specifies the macOS version requirement for content caching.

NEW QUESTION # 78

Which type of app can be distributed through Apple Business Manager?

- A. Free apps
- B. Purchased apps
- **C. All of the above**
- D. Custom apps

Answer: C

Explanation:

Apple Business Manager (ABM) supports the distribution of multiple app types via Managed Distribution: custom apps (developed in-house), free apps (from the App Store), and purchased apps (bought through ABM's Apps and Books
