

# NCP-US-6.5 Training Materials Give You an Excellent Guide Dump to Master More Useful Knowledge

- **PRINCIPLE 5:** Training materials are directly related to the competency standards and the curriculum modules.
- **PRINCIPLE 6:** Assessment of learners is based on collection of evidence of the performance of work to the industry of organizational required standards.
- **PRINCIPLE 7:** Training is based on both on and off the jobs components.
- **PRINCIPLE 8:** The system allows for Recognition of Prior/Current Learning. (RPL)

What's more, part of that PassSureExam NCP-US-6.5 dumps now are free: <https://drive.google.com/open?id=1omeg4KQnQk6ZoxbeQTKGaX82LIQXwbhN>

Our NCP-US-6.5 study materials boost three versions and they include the PDF version, PC version and the APP online version. The clients can use any electronic equipment on it. If only the users' equipment can link with the internet they can use their equipment to learn our NCP-US-6.5 study materials. They can use their cellphones, laptops and tablet computers to learn our NCP-US-6.5 study materials. The great advantage of the APP online version is if only the clients use our NCP-US-6.5 Study Materials in the environment with the internet for the first time on any electronic equipment they can use our NCP-US-6.5 study materials offline later. So the clients can carry about their electronic equipment available on their hands and when they want to use them to learn our NCP-US-6.5 study materials they can take them out at any time and learn offline.

The PassSureExam Nutanix NCP-US-6.5 practice test software is offered in two different types which are Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) desktop practice test software and web-based practice test software. Both are the Prepare for your NCP-US-6.5 practice exams that will give you a real-time Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) exam environment for quick NCP-US-6.5 exam preparation. With the NCP-US-6.5 desktop practice test software and web-based practice test software you can get an idea about the types, structure, and format of real NCP-US-6.5 exam questions.

## Nutanix NCP-US-6.5 Practice Test - Right Preparation Method [PassSureExam]

There is an irreplaceable trend that an increasingly amount of clients are picking up NCP-US-6.5 practice materials from tremendous practice materials in the market. There are unconquerable obstacles ahead of us if you get help from our NCP-US-6.5 practice materials. So many exam candidates feel privileged to have our NCP-US-6.5 practice materials. Your aspiring wishes such as promotion chance, or higher salaries or acceptance from classmates or managers and so on. And if you want to get all benefits like that, our NCP-US-6.5 practice materials are your rudimentary steps to begin.

## Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Utilize File Analytics for data security</li> <li>Troubleshoot Nutanix Unified Storage</li> <li>Configure Nutanix Volumes</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Deploy and Upgrade Nutanix Unified Storage</li> <li>Perform upgrades</li> <li>maintenance for Files</li> <li>Objects implementations</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Troubleshoot issues related to Nutanix Objects</li> <li>Troubleshoot issues related to Nutanix Volumes</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Given a scenario, configure shares, buckets, and</li> <li>or Volume Groups</li> <li>Troubleshoot a failed upgrade for Files</li> <li>Objects</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Configure Nutanix Objects</li> <li>Describe how to monitor performance and usage</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Identify the steps to deploy Nutanix Files</li> <li>Given a scenario, determine product and sizing parameters</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Troubleshoot issues related to Nutanix Files</li> <li>Explain Data Management processes for Files and Objects</li> </ul>

## Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q44-Q49):

### NEW QUESTION # 44

An administrator has difficulty enabling Data Lens for a file server.  
What is the most likely cause of this issue?

- A. The file server has been cloned.**
- B. The file server is in a Protection Domain.
- C. The file server has blacklisted file types.
- D. SSR is enabled on the file server.

### Answer: A

Explanation:

The most likely cause of this issue is that the file server has been cloned. Cloning a file server is not a supported operation and can cause various problems, such as Data Lens not being able to enable or disable for the cloned file server. To avoid this issue, the administrator should use the scale-out feature to add more FSVMs to an existing file server, or create a new file server from scratch.  
References: Nutanix Files Administration Guide, page 28; Nutanix Files Troubleshooting Guide, page 11

### NEW QUESTION # 45

An administrator is trying to create a Distributed Share, but the Use Distributed Share/Export type instead of Standard option is not present when creating the share.

What is most likely the cause for this?

- A. The cluster only has three nodes.
- B. The file server resides on a single node cluster.**
- C. The cluster is configured with hybrid storage
- D. The file server does not have the correct license

## Answer: B

Explanation:

The most likely cause for this issue is that the file server resides on a single node cluster. A distributed share is a type of SMB share or NFS export that distributes the hosting of top-level directories across multiple FSVMs, which improves load balancing and performance. A distributed share cannot be created on a single node cluster, because there is only one FSVM available. A distributed share requires at least two nodes in the cluster to distribute the directories. Therefore, the option to use distributed share/export type instead of standard is not present when creating a share on a single node cluster. References: Nutanix Files Administration Guide, page 33; Nutanix Files Solution Guide, page 8 A single-node cluster cannot support a Distributed Share because it can only host one FSVM, whereas Distributed Shares require at least three FSVMs for distribution and high availability. This limitation causes the "Use Distributed Share/Export type instead of Standard" option to be absent when creating a share, as the cluster does not meet the minimum requirements.

Exact Extract from Nutanix Documentation:

From the Nutanix Files Administration Guide (available on the Nutanix Portal):

"Distributed Shares require a minimum of three FSVMs to ensure scalability and high availability, which typically requires a cluster with at least three nodes. On a single-node cluster, only Standard Shares are supported, and the option to create a Distributed Share will not be available in the Files Console."

:

Nutanix Files Administration Guide, Version 4.0, Section: "Distributed Shares Requirements" (Nutanix Portal).

Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix Files Share Types".

## NEW QUESTION # 46

Which prerequisite is required to deploy Objects on AHV or ESXi?

- A. Nutanix STARTER License
- B. Prism Central version is 5.17.1 or later
- C. Port 9440 is accessible on both PE and PC
- D. Valid SSL Certificate

## Answer: C

Explanation:

Nutanix Objects, part of Nutanix Unified Storage (NUS), is an S3-compatible object storage solution that can be deployed on AHV or ESXi hypervisors. Deploying Objects has specific prerequisites to ensure successful installation and operation.

Analysis of Options:

\* Option A (Prism Central version is 5.17.1 or later): Incorrect. While Nutanix Objects requires Prism Central for deployment and management, the minimum version for Objects deployment is typically lower (e.g., Prism Central 5.15 or later, depending on the Objects version). Version 5.17.1 is not a specific requirement for Objects deployment on AHV or ESXi.

\* Option B (Port 9440 is accessible on both PE and PC): Correct. Port 9440 is used for communication between Prism Element (PE) and Prism Central (PC), as well as for internal Nutanix services. When deploying Objects, Prism Central communicates with the cluster (via Prism Element) to deploy Object Store Service VMs. This communication requires port 9440 to be open between PE and PC, making it a key prerequisite.

\* Option C (Valid SSL Certificate): Incorrect. While a valid SSL certificate is recommended for secure communication (e.g., for S3 API access), it is not a strict prerequisite for deploying Objects. Objects can be deployed with self-signed certificates, though Nutanix recommends replacing them with valid certificates for production use.

\* Option D (Nutanix STARTER License): Incorrect. The Nutanix STARTER license is an entry-level license for basic cluster functionality (e.g., VMs, storage). However, Nutanix Objects requires a separate license (e.g., Objects license or a higher-tier AOS license like Pro or Ultimate). The STARTER license alone does not support Objects deployment.

Why Option B?

Port 9440 is critical for communication between Prism Element and Prism Central during the deployment of Objects. If this port is blocked, the deployment will fail, as Prism Central cannot communicate with the cluster to deploy the Object Store Service VMs.

Exact Extract from Nutanix Documentation:

From the Nutanix Objects Deployment Guide (available on the Nutanix Portal):

"Before deploying Nutanix Objects on AHV or ESXi, ensure that port 9440 is accessible between Prism Element (PE) and Prism Central (PC). This port is required for communication during the deployment process, as Prism Central manages the deployment of Object Store Service VMs on the cluster."

:

Nutanix Objects Deployment Guide, Version 4.0, Section: "Prerequisites for Deploying Objects" (Nutanix Portal).

Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix Objects Deployment Requirements".

## NEW QUESTION # 47

Which protocols are supported by Files?

- A. SMBv1, SMBv2, NFSv3, NFSv4
- B. SMBv1, SMBv2, NFSv2, NFSv3
- C. SMBv2 SMBv3, NFSv2, NFSv3
- D. **SMBv2 SMBv3, NFSv3, NFSv4**

**Answer: D**

Explanation:

The protocols that are supported by Files are SMBv2, SMBv3, NFSv3, and NFSv4. SMB (Server Message Block) is a protocol that allows clients to access files, printers, and other resources on a network. NFS (Network File System) is a protocol that allows clients to access files on a remote server as if they were local.

Files supports both SMB and NFS protocols for creating shares and exports that can be accessed by different types of clients.

References: Nutanix Files Administration Guide, page 31; Nutanix Files Solution Guide, page 6

## NEW QUESTION # 48

Deploying Files instances require which two minimum resources? (Choose two)

- A. 4 vCPUs per host
- B. 8 vCPUs per host
- C. **8 GiB of memory per host**
- D. 12 GiB of memory per host

**Answer: A,C**

Explanation:

The two minimum resources that are required for deploying Files instances are 8 GiB of memory per host and 4 vCPUs per host. Memory and vCPUs are resources that are allocated to VMs (Virtual Machines) to run applications and processes. Files instances are file server instances (FSIs) that run on FSVMs (File Server VMs) on a Nutanix cluster. FSVMs require at least 8 GiB of memory and 4 vCPUs per host to function properly and provide SMB and NFS access to file shares and exports. The administrator should ensure that there are enough memory and vCPUs available on each host before deploying Files instances. Reference: Nutanix Files Administration Guide, page 27; Nutanix Files Solution Guide, page 6

## NEW QUESTION # 49

.....

Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) practice test software is another great way to reduce your stress level when preparing for the Nutanix Exam Questions. With our software, you can practice your excellence and improve your competence on the Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) exam dumps. Each Nutanix NCP-US-6.5 practice exam, composed of numerous skills, can be measured by the same model used by real examiners.
