CV0-004 Dumps Free Download & New CV0-004 Test Price

In order to provide most comfortable review process and straightaway dumps to those CV0-004 candidates, we offer you three

versions of CV0-004 exam software: the PDF version, the online version, and software version. There will be one version right for you and help you quickly pass the CV0-004 with ease, so that you can obtain the most authoritative international recognition on your IT ability.

CompTIA Cloud+ (2025) Sample Questions (Q271-Q276):

NEW QUESTION # 271
A cloud service provider requires users to migrate to a new type of VM within three months. Which of the following is the best justification for this requirement?

- A. The cloud provider will be performing maintenance of the infrastructure.
- B. Security flaws need to be patched.
- C. The equipment is reaching end of life and end of support.
- D. Updates could affect the current state of the VMs.
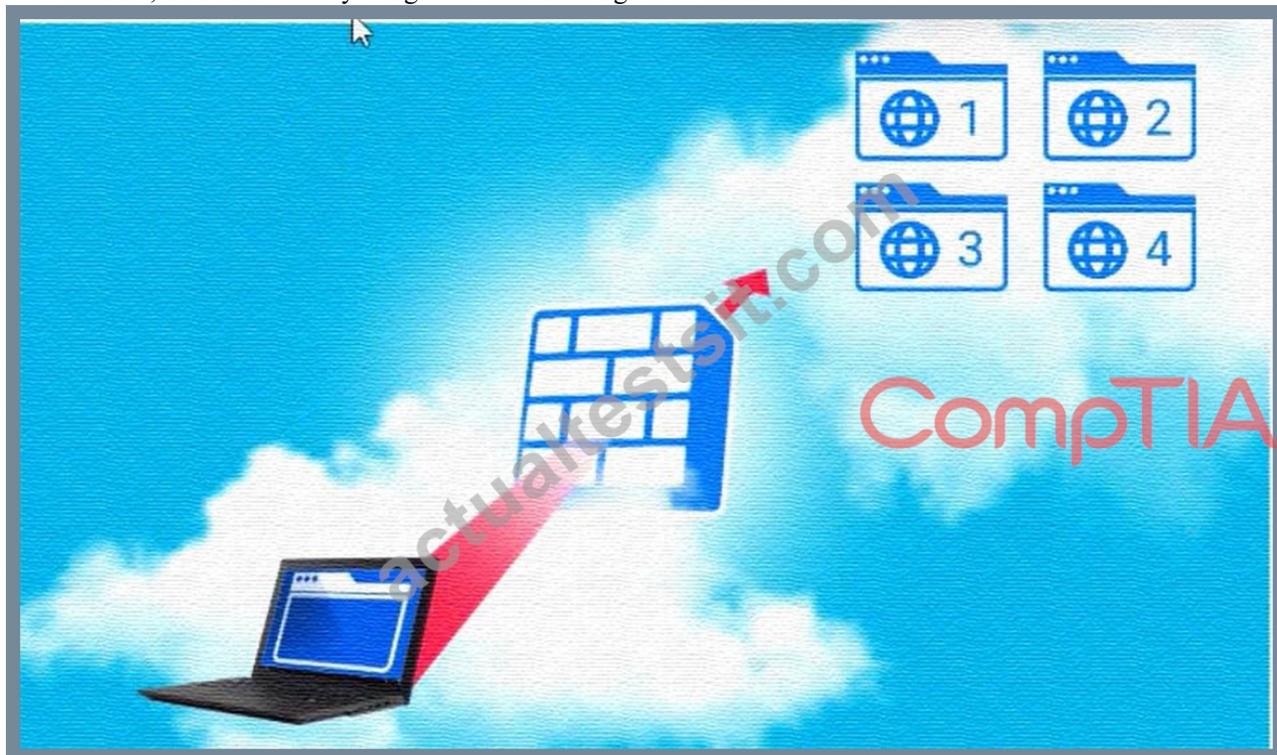

Answer: C

Explanation:
The best justification for a cloud service provider requiring users to migrate to a new type of VM within a specific time frame is that the equipment is reaching end of life and end of support (EOL/EOS). This means that the older type of VM will no longer receive updates or support, which could include important security patches, so it is necessary to move to newer VM types to maintain security and performance. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) by Todd Montgomery and Stephen Olson

NEW QUESTION # 272
A company hosts various containerized applications for business uses. A client reports that one of its routine business applications fails to load the web-based login prompt hosted in the company cloud.
Click on each device and resource. Review the configurations, logs, and characteristics of each node in the architecture to diagnose the issue. Then, make the necessary changes to the WAF configuration to remediate the issue.

Web app 1

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp1	FIN	10.22.10.11	443

Web app 2

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp2	VIDEO	10.22.10.21	443

Web app 3

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp3	API	10.22.10.31	443

Web app 4

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp4	CHAT	10.22.10.41	443

WAF

Edit config | WAF logs

Rule ID	Description	Service	Action		Availability zone
1001	Brute force attempt	`^https://webapp[.]comptia[.]org/$`	Block	∨	A
1002	Botnet	`^https://webapp[.]comptia[.]org/$`	Block	∨	A
1003	API web server	`^https://webapp3[.]comptia[.]org/([0-9A-Za-z][0-9A-Za-z_-?]*/)*$`	Allow	∨	B
1004	Chat web traffic	`^https://webapp4[.]comptia[.]org/chat/request[.]php$`	Allow	∨	B
1005	Finance application 1	`^https://webapp1[.]comptia[.]org/([0-9A-Za-z][0-9A-Za-z_-?]*)*$`	Allow	∨	B
1006	Finance application 2	`^https://webapp1[.]comptia[.]org/login[.]html$`	Block	∨	A
1007	Video application	`^https://webapp2[.]comptia[.]org/video/stream$`	Allow	∨	A

Answer:

Explanation:
See the Explanation below for solution.
Explanation:
From the image, it's noticeable that some finance application rules are set to "Block" traffic. If the client's issue is with a finance-related application not loading the login prompt, these rules could be the cause.
The rule with ID 1005, labeled "Finance application 1", is configured to allow access to "webapp1" for finance-related paths.
However, rule 1006, labeled "Finance application 2", is set to block access to "webapp1" for login-related paths.
To remediate the issue based on the WAF configuration you have provided, you would want to:
* Ensure that the correct paths to the finance application are allowed through the WAF.
* Modify any rules that are incorrectly blocking access to the application.
If the client's problem is specifically with the login prompt, then rule 1006 seems the most likely culprit.
Changing the action from "Block" to "Allow" for rule 1006 could potentially resolve the client's issue. The rule should be carefully reviewed and updated to ensure legitimate traffic is not being blocked while still protecting against unauthorized access.

NEW QUESTION # 273
A company hosts various containerized applications for business uses. A client reports that one of its routine business applications fails to load the web-based login prompt hosted in the company cloud.
Click on each device and resource. Review the configurations, logs, and characteristics of each node in the architecture to diagnose the issue. Then, make the necessary changes to the WAF configuration to remediate the issue.

Web app 1

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp1	FIN	10.22.10.11	443

Web app 2

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp2	VIDEO	10.22.10.21	443

Web app 3

SVC_Host	SVC_Name	SVC IP	SVC_Port
webapp3	API	10.22.10.31	443

Answer:

Explanation:
See the Explanation below for solution.
Explanation:

Changing the action from "Block" to "Allow" for rule 1006 could potentially resolve the client's issue. The rule should be carefully reviewed and updated to ensure legitimate traffic is not being blocked while still protecting against unauthorized access.

NEW QUESTION # 274
An organization's web application experiences periodic bursts of traffic when a new video is launched. Users are reporting poor performance in the middle of the month. Which of the following scaling approaches should the organization use to scale based on forecasted traffic?

- A. Event
- B. Load
- C. Manual
- D. Scheduled

Answer: D

Explanation:
For periodic bursts of traffic that are predictable, such as when a new video is launched, a scheduled scaling approach is suitable.
This strategy involves scaling resources based on forecasted or known traffic patterns, ensuring that the infrastructure can handle the

load during expected peak times.

NEW QUESTION # 275
A high-usage cloud resource needs to be monitored in real time on specific events to guarantee its availability.
Which of the following actions should be used to meet this requirement?

- A. Schedule an hourly scan of the network to check for the availability of the resource.
- B. Configure a ping command to identify when the cloud instance is out of service.
- C. Collect all the daily activity from the cloud instance and create a dump file for analysis.
- D. Create a dashboard with visualizations to filter the status of critical activities.

Answer: D

Explanation:
To guarantee real-time monitoring of a high-usage cloud resource, creating a dashboard with visualizations to filter the status of critical activities is effective. This allows for a quick visual assessment of the system's health and performance, enabling immediate action if specific events indicate potential issues with availability.References: Real-time monitoring and the use of dashboards for tracking critical cloud resources are part of the cloud management best practices covered under the CompTIA Cloud+ objectives.

NEW QUESTION # 276
......

The language in our CV0-004 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years.
