Questions Analytics-Con-201 Pdf & Analytics-Con-201 Exam Cost

Our Analytics-Con-201 training materials are professional practice material under warranty. Accompanied with acceptable prices for your reference, all our Analytics-Con-201 exam quiz with three versions are compiled by professional experts in this area more than ten years long. Moreover, there are a series of benefits for you. If you place your order right now, we will send you the free

renewals lasting for one year. All those supplements are also valuable for your Analytics-Con-201 practice materials.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q66-Q71):

NEW QUESTION # 66
A data architect wants to use a recipe transformation to implement row level security based on role hierarchy in Salesforce. Which transformation should the architect use to level the dataset hierarchy?

- A. Join
- B. Flatten
- C. Aggregate

Answer: B

NEW QUESTION # 67
A CRM Analytics consultant has been asked to add a custom object to existing recipe. When trying to locate the object, the consultant can see only Direct Data and NOT the SFDC Local data sync.
How should the consultant resolve this?

- A. Create a new data sync connection, run the sync, and add to recipe.
- B. Turn on data syne for the object, run the sync, and then add to recipe.
- C. Clone the recipe, add the new object to the recipe, and run the recipe.

Answer: B

NEW QUESTION # 68
CRM Analytics team plans to enable data sync.
Which limit specific to data syne should the team consider before enabling the feature because it may impact existing jobs?

- A. Maximum number of objects that can be enabled for data sync
- B. Maximum number of data sync jobs cannot exceed the limit
- C. Maximum number of Full Sync connection mode enabled

Answer: A

Explanation:
In CRM Analytics, when planning to enable data sync, one of the critical considerations is the limit on the number of objects that can be enabled for data sync. This limit is essential because it determineshow many different Salesforce objects (like Accounts, Opportunities, etc.) can be synchronized concurrently. Exceeding this limit could impact the performance of existing sync jobs or prevent new sync jobs from being configured.
Key points to consider include:
* Performance Impact: Syncing too many objects simultaneously can lead to increased load times and potential delays in data availability, impacting users' ability to access up-to-date information.
* Resource Allocation: CRM Analytics allocates resources based on the number of objects being synchronized, and there are practical limits to these resources to ensure stable and efficient operation.
For a more detailed understanding and to manage these limits effectively, Salesforce provides documentation and guidelines within the CRM Analytics resources, which can be further explored in the Trailhead modules specifically focusing on data management and synchronization practices.

NEW QUESTION # 69
A CRM Analytics consultant is adding direct data into an existing recipe. When trying to click on the input node, data preview is taking a long time to show any results.
How should the consultant resolve this?

- A. Use the Filtered Rows sampling mode under Data Preview Sampling to filter records.
- B. Register the Salesforce object and use Filtered Rows under Data Preview Sampling.

- C. Update the Sample Size under Data Preview Sampling to 5,000 rows.

Answer: A

NEW QUESTION # 70
A consultant wants to understand what the important predictors are in a model.
Where is this information found?

- A. Model Deployment Wizard
- B. Einstein Recommendations
- C. Model Settings

Answer: C

Explanation:
The important predictors of a model in CRM Analytics can typically be found under the Model Settings. This area provides detailed information about the configuration and the inputs (predictors) used to train the model.
Insights into which predictors have the most significant impact on the model's outcomes can be gleaned from this section, enabling a deeper understanding of the model's internal workings and the factors driving predictions.

NEW QUESTION # 71

......

We boost a professional expert team to undertake the research and the production of our Analytics-Con-201 study materials. We employ the senior lecturers and authorized authors who have published the articles about the test to compile and organize the Analytics-Con-201 study materials. Our expert team boosts profound industry experiences and they use their precise logic to verify the test. They provide comprehensive explanation and integral details of the answers and questions. Each question and answer are researched and verified by the industry experts. Our team updates the Analytics-Con-201 Study Materials periodically and the updates include all the questions in the past thesis and the latest knowledge points. So our service team is professional and top-tanking.
