It is well acknowledged that people who have a chance to participate in the simulation for the real test, they must have a fantastic advantage over other people to get good grade in the exam. Now, it is so lucky for you to meet this opportunity once in a blue. We offer you the simulation test with the App version of our SC-401 preparation test, in order to let you be familiar with the environment of test as soon as possible. Under the help of the real SC-401 test simulation, you can have a good command of key points which are more likely to be tested in the real test. Therefore that adds more confidence for you to make a full preparation of the upcoming SC-401 Exam. In addition, since you can experience the process of SC-401 the simulation test, you will feel less pressure about the approaching exam. It sounds wonderful, right? Of course, it is. So why not have a try? We promise you will enjoy this study.

Microsoft SC-401 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection. |
| Topic 2 | <ul style="list-style-type: none">Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows. |
| Topic 3 | <ul style="list-style-type: none">Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365. |
| Topic 4 | <ul style="list-style-type: none">Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview. |

2026 SC-401 Best Study Material | Efficient Administering Information Security in Microsoft 365 100% Free Pdf Free

Will you feel nervous for the exam? If you do, we can relieve your nerves if you choose us. SC-401 Soft test engine can stimulate the real exam environment, so that you can know procedures of the real exam environment, and it will build up your confidence. In addition, SC-401 exam materials are verified by the experienced experts, and therefore the quality can be guaranteed. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. If you buy SC-401 Exam Materials from us, we also pass guarantee and money back guarantee if you fail to pass the exam.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q170-Q175):

NEW QUESTION # 170

HOTSPOT

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

You plan to create a Microsoft Purview insider risk management case named Case1.

Which insider risk management object should you select first, and which users will be added as contributors for Case1 by default?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: When creating a Microsoft Purview Insider Risk Management case, you must first select a risky user to investigate. The case will be built around this specific user's activities, linking alerts and risk signals to the investigation.

Box 2: The Insider Risk Management role groups determine who can access and contribute to cases:

Admin1 (Insider Risk Management Admins) # Full admin access.

Admin2 (Insider Risk Management Analysts) # Analysts who review cases.

Admin3 (Risk Management Investigators) # Investigators who work on cases.

Admin4 (Insider Risk Management Auditors) # Auditors who oversee cases.

All these roles have default access to insider risk cases in Microsoft Purview, so all four admins are added as contributors.

NEW QUESTION # 171

You have a Microsoft 365 E5 subscription that contains a user named User1.

You deploy Microsoft Purview insider risk management.

You need ensure that insider risk management events related to User1 are visible only to specific users.

What should you create?

- A. an indicator variant
- B. a global exclusion
- C. a priority user group
- D. a detection group

Answer: D

Explanation:

You need to prevent users from sharing sensitive information with third-party generative AI websites.

A). Information Protection # Classifies and labels data but does not block sharing with external AI sites.

B). Information Barriers # Restricts communication between groups of users (e.g., compliance walls), not web uploads.

C). Insider Risk Management # Detects risky behavior (like data exfiltration), but does not actively block data sharing.

D). Data Loss Prevention (DLP) # Detects and prevents sensitive data being copied to browsers, USBs, or uploaded to restricted domains (like ChatGPT, Bard, etc.).

NEW QUESTION # 172

You have a Microsoft 365 E5 subscription.

You create a data loss prevention (DLP) policy and select Use Notifications to inform your users and help educate them on the proper use of sensitive info.

Which apps will show the policy tip?

- A. Outlook Win32 only
- B. Outlook for iOS and Android only
- C. **Outlook on the web and Outlook Win32 only**
- D. Outlook Win32 and Outlook for iOS and Android only
- E. Outlook on the web, Outlook Win32, and Outlook for iOS and Android
- F. Outlook on the web only

Answer: C

Explanation:

When you compose a new email in Outlook on the web and Outlook 2013 and later, you'll see a policy tip if you add content that matches a rule in a DLP policy, and that rule uses policy tips.

The policy tip appears at the top of the message, above the recipients, while the message is being composed.

Note: Outlook Mobile (iOS, Android)/Outlook Mac: DLP policy tips are not supported on Outlook mobile Support Matrix for DLP policy tips across Microsoft apps.

NEW QUESTION # 173

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 174

Drag and Drop Question

You have a Microsoft 365 E5 subscription.

You plan to implement Microsoft Purview Insider Risk Management.

You obtain a file named File1.csv that contains employee resignation data.

You need to implement the HR data connector and upload File1.csv by using the connector.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Microsoft Purview, Set up a connector to import HR data

You can set up a data connector to import human resources (HR) data related to events such as a user's resignation or a change in a user's job level. The HR data is used by the insider risk management solution to generate risk indicators that can help you identify possible malicious activity or data theft by users inside your organization.

Step 1: From the Microsoft Entra admin center, create an app registration Task 1: Prepare a CSV file with your HR data The first step is to create a CSV file that contains the HR data that the connector imports to Microsoft 365. This data is used by the insider risk solution to generate potential risk indicators.

Task 2: Create an app in Microsoft Entra ID

The next step is to create and register a new app in Microsoft Entra ID. The app corresponds to the HR connector that you create in Task 3.

Creating this app allows Microsoft Entra ID to authenticate the HR connector when it runs and attempts to access your organization. This app will also be used to authenticate the script that you run in Task 4 to upload your HR data to the Microsoft cloud. During the creation of this Microsoft Entra app, be sure to save the following information. These values are used in Task 3 and Task 4.

Step 2: From the Microsoft Purview portal, add the data connector.

Task 3: Create the HR connector

The next step is to create an HR connector in the Microsoft Purview portal. After you run the script in Task 4, the HR connector that you create will ingest the HR data from the CSV file to your Microsoft 365 organization.

Step 3: Run a sample script to upload File1.csv

Task 4: Run the sample script to upload your HR data

The last step in setting up an HR connector is to run a sample script that will upload the HR data in the CSV file.
