The most advanced operation system in our C-BCBAI-2502 Exam Questions which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. Within several minutes, you will receive our C-BCBAI-2502 study guide!

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q62-Q67):

NEW QUESTION # 62

Match the benefit from the dropdown list to the SAP LeanIX AI capabilities.

□

Answer:

Explanation:

□

NEW QUESTION # 63

How does SAP Ariba contribute to supply chain sustainability? Please choose the correct answer.

- A. By tracking HR compliance
- **B. By monitoring supplier risks and compliance**
- C. By providing sales forecasting insights
- D. By managing workforce training

Answer: B

Explanation:

SAP Ariba contributes to supply chain sustainability by enabling organizations to manage supplier relationships and ensure compliance with sustainability standards. The correct answer is "By monitoring supplier risks and compliance," as this is the primary way SAP Ariba supports sustainable supply chain practices.

SAP documentation explains: "SAP Ariba helps organizations build sustainable supply chains by monitoring supplier risks and ensuring compliance with environmental, social, and governance (ESG) standards." It provides tools to "assess supplier performance, track compliance with sustainability regulations, and mitigate risks related to unethical practices or environmental violations." For example, SAP Ariba's supplier risk management capabilities allow companies to evaluate suppliers based on sustainability criteria, ensuring responsible sourcing and reducing environmental impact. This aligns with SAP's broader sustainability goals, as seen in solutions like SAP Sustainability Control Tower.

The incorrect options are unrelated to SAP Ariba's role in supply chain sustainability. Managing workforce training is an HR function, typically handled by SAP SuccessFactors. Providing sales forecasting insights is a marketing function, not specific to SAP Ariba. Tracking HR compliance is also an HR task, not a supply chain function. SAP Ariba's focus on supplier management and compliance makes it the clear choice for this purpose.

NEW QUESTION # 64

Which AI-driven capabilities are available in SAP Business AI? Note: There are 2 correct answers to this question.

- **A. AI-powered fraud detection in finance**
- **B. Machine Learning (ML) for automated data processing**
- C. Manual reconciliation of financial transactions
- D. Data input automation without AI involvement

Answer: A,B

Explanation:

SAP Business AI provides a range of AI-driven capabilities to automate processes and enhance business outcomes. The correct answers are Machine Learning (ML) for automated data processing and AI-powered fraud detection in finance, as these are core

capabilities documented in SAP's AI portfolio.

SAP documentation explains: "SAP Business AI offers capabilities such as machine learning, natural language processing, and predictive analytics to enhance decision-making, automate tasks, and improve business processes." Machine Learning (ML) for automated data processing is used in solutions like SAP Cash Application, which "intelligently extracts key payment details from unstructured documents" to automate financial data processing. AI-powered fraud detection in finance, supported by SAP AI Business Services, enables "real-time monitoring of financial transactions to identify anomalies and potential fraud," as seen in SAP S/4HANA's anomaly detection features.

The incorrect options-manual reconciliation of financial transactions and data input automation without AI involvement-are not AI-driven. Manual reconciliation contradicts SAP's automation focus, and data input automation without AI is not part of SAP Business AI's capabilities, which emphasize intelligent automation.

SAP's financial and operational AI solutions, as evidenced by case studies like SAP Cash Application, confirm the selected capabilities.

NEW QUESTION # 65

A retail business wants to use AI for automating customer support while ensuring personalized customer interactions. Which SAP AI solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP Predictive Analytics
- B. SAP Conversational AI
