You can access the web-based practice exam from anywhere with an internet connection to study on the go or from the comfort of your own home. You can receive your mock exam result instantly.

Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q78-Q83):

NEW QUESTION # 78

Bobahaven wants to implement the Grants Management module of Public Sector Solutions. They would like to allow constituents to apply online for grants and check the progress of grant applications. The Chief Marketing Officer and Head of Constituent Services have expressed their concerns about the security of the solution. They want to ensure they comply with privacy regulations around

the storage and use of constituent's data, and they are wondering how to protect against bots potentially spamming the application forms.

What should the Technical Consultant suggest to Bobahaven to protect the application forms?

- A. Enable the Salesforce Spam Check for Experience Sites.
- **B. Implement spam checking for Bobahaven's Experience Site forms using CAPTCHA.**
- **C. Set the external organization-wide default sharing settings for grant applications objects to Private.**
- D. Deploy grant application OmniScripts on Bobahaven's Experience Site pages set to "Requires Login."
- E. Provide constituents with a search page on Bobahaven's website to look up application reference numbers and check the applications progress.

Answer: B,C

Explanation:

Implementing spam checking for Bobahaven's Experience Site forms using CAPTCHA can help prevent bots from submitting fake or malicious grant applications. CAPTCHA is a feature that requires users to prove that they are human by solving a simple challenge before submitting a form. Setting the external organization-wide default sharing settings for grant applications objects to Private can help protect the privacy of the constituents' data. This means that external users cannot see any grant applications by default, unless they are explicitly shared with them. NEW QUESTION # 79

A government agency is responsible for providing licenses to various sporting events. To acquire the license, individuals need to pay the required fees. The System Administrator for Public Sector Solution main responsibility is to automatically map and set the fees for each application to ensure the correct fees are mapped.

Which Business Rules Engine tool is used here?

- A. Data matrices
- B. Workflow Field Updates
- **C. Decision Matrices**
- D. Process Builder

Answer: C

Explanation:

Decision Matrices are Business Rules Engine tools that are used to automatically map and set the fees for each application. A Decision Matrix can evaluate answers based on rules and conditions and provide a decision outcome and explanation. For example, a Decision Matrix can determine the fee amount based on the type of license, the city & county location, the volume of current business, and the size of the building.

NEW QUESTION # 80

A government agency wants to implement the Licenses, Permits, and Inspections modules of Public Sector Solutions. The agency needs to issue licenses and permits to two different sets of constituents; business constituents and private constituents. The agency would like to roll out licenses and permits to their business constituents first, followed by the private constituents at a later date.

What data model and implementation strategy should a technical consultant recommend to the government agency for this use case?

- A. Implement both the Business Account and Contact data model for business constituents and the Household Account and Contact data model for private constituents at the same time.
- B. Implement the Business Account and Contact data model for business constituents now, and implement the Household Account and Contact data model for private constituents at a later date.
- **C. Implement the Business Account and Contact data model for business constituents now, and implement the Person Account data model for private constituents at a later date.**
- D. Implement both the Business Account and Contact data model for business constituents and the Person Account data model for private constituents at the same time.

Answer: C

Explanation:

This recommendation aligns with the implementation strategy required by the government agency. Here's the rationale:

- * Business Account and Contact data model is designed for managing entities like businesses, organizations, and their associated contacts.
- * Rolling out this model first ensures the agency can meet its priority of addressing business constituents before private constituents.
- * Person Account data model is tailored for individuals acting as their own account, which is suitable for private constituents.
- * Implementing this at a later stage aligns with the phased rollout strategy the agency prefers.
- * Starting with only the Business Account and Contact model keeps the initial implementation focused and avoids unnecessary complexity.
- * A phased approach allows the agency to learn and refine processes during the first phase (business constituents), then expand to private constituents.
- * B. Business Account and Household Account/Contact data model:
 - * The Household Account model is not recommended for this use case. It is primarily used in Salesforce Nonprofit Success Pack (NPSF), not Public Sector Solutions. For private constituents, the Person Account model is more suitable.
 - * C. Implementing both models at the same time:
 - * Rolling out both models simultaneously (Business Account and Person Account) adds complexity to the implementation. It would require handling two different constituent types from the start, which is against the phased approach preferred by the agency.
 - * D. Implementing Business Account and Household Account at the same time:
 - * This option introduces an unnecessary mix of data models (Household Accounts instead of Person Accounts). Additionally, implementing both at once contradicts the agency's phased rollout preference.

1. Business Constituents First: 2. Private Constituents Later: 3. Avoiding Complexity During Initial Rollout:

Why Not the Other Options? Conclusion: To meet the agency's requirements, the technical consultant should recommend implementing the Business Account and Contact data model for business constituents now and the Person Account data model for private constituents at a later stage.

NEW QUESTION # 81

What are the three different key modules of Public Sector Solutions: Business Rules Engine?

- A. Decision Matrix
- B. Expression Sets
- C. Decision Tree
- D. Decision Table
- E. Expression Maps

Answer: A,B,D

Explanation:

Expression Sets, Decision Table, and Decision Matrix are three different key modules of Public Sector Solutions: Business Rules Engine (BRE). Expression Sets are modules that can define expressions that can be reused across multiple rules or matrices. Decision Table is a module that can evaluate data based on rows of conditions and actions in a tabular format. Decision Matrix is a module that can evaluate data based on columns of conditions and outcomes in a tabular format. Reference:

NEW QUESTION # 82

A user called in for a status update on their application. In reviewing the application, the caseworker has come to find out that the application was incorrectly prioritized. The case worker's supervisor advised the case worker to check the decision log to see exactly why the application was prioritized the way it was. However, the caseworker cannot see the component even though the Administrator has confirmed it is on the page layout.

What should the Administrator check for next?

- A. Verify that the case worker has OmniStudio User permission.
- B. Verify that the case worker has the Rules Engine Runtime permission.
- C. Verify that the case worker has the Decision Explainer Permission set.
- D. Verify that the case worker has OmniStudio Admin permission.

Answer: C

Explanation:

When a caseworker cannot see a component on a page layout even though it has been confirmed to be present by an Administrator, the first step is to ensure the caseworker has the appropriate permissions. In the case of not being able to view the Decision Log, which is typically linked with specific functionalities in Salesforce Public Sector Solutions, the correct permission to check is whether the caseworker has the Decision Explainer Permission set (Option A). This permission set specifically allows users to access detailed logs and explanations of decisions made by automated systems or processes within Salesforce, like those found in a decision log. Verifying and ensuring that the caseworker has this permission will likely resolve the issue of visibility. Other options like Rules Engine Runtime permission (Option B), OmniStudio Admin permission (Option C), and OmniStudio User permission (Option D) are not directly related to accessing decision logs or explanation components, thus making Option A the most suitable and direct solution.

NEW QUESTION # 83

.....

All our regular candidates have impulse to choose again when they have the similar AP-222 exam. So they totally trust us. All exams are not insuperable obstacle anymore with our AP-222 training materials. Our credibility is unquestionable. In the course of obtaining success, we need a number of helps, either external or internal, but to the exam, the quality of AP-222 practice materials are of great importance. So our AP-222 learning dumps are acclaimed as masterpieces.

Latest AP-222 Test Cram <https://www.lead2passed.com/Salesforce/AP-222-practice-exam-dumps.html>

We offer you free update for 365 days for AP-222 exam dumps, and our system will send you the latest version automatically, As a highly sensitive method for you to pass the examination, AP-222 actual exam material is to be popularized in the world by its real capacity, Our company has established the customer service section specially, keeping a long-term communication with customers, which contributes to the deep relationship between our Latest AP-222 Test Cram Latest AP-222 Test Cram - Public Sector Solutions Accredited Professional reliable test topics users and us, It means you can prepare the Latest AP-222 Test Cram - Public Sector Solutions Accredited Professional exam review anywhere and anytime.

Plan on creating a great exam and have a small group take AP-222 Valid Test Dumps the exam prerelease so you can test your delivery system and see if everything is working properly, Or you could be out at dinner and one of the people at the table could AP-222 be using their cell phone to text another person who's not there or Twittering or something of that nature.

2026 Pass-Sure AP-222 Test Valid Help You Pass AP-222 Easily

We offer you free update for 365 days for AP-222 exam dumps, and our system will send you the latest version automatically, As a highly sensitive method for you to pass the examination, AP-222 actual exam material is to be popularized in the world by its real capacity.
