

Perfect AZ-140 Exams Training to Obtain Microsoft Certification

Achieve IT Certification Exam With CertsFire's Microsoft AZ-140 Practice Questions!

In the highly competitive IT industry, achieving the Windows Virtual Desktop Specialty certification exam can significantly boost career prospects. The Microsoft AZ-140 exam is a prestigious test that measures your expertise in Windows Virtual Desktop Specialty exam skills. CertsFire offers [Real Microsoft AZ-140 Practice Questions](#), designed to ensure you are thoroughly prepared and confident on exam day. These Windows Virtual Desktop Specialty AZ-140 questions simulate the real exam environment, making your certification journey smoother and more successful.

CertsFire Microsoft AZ-140 Practice Questions - Your Key To Certification Exam Success!

Comprehensive preparation is the key to passing the Windows Virtual Desktop Specialty certification exam. CertsFire provides a complete set of [Configuring and Operating Microsoft Azure Virtual Desktop](#) exam questions covering every necessary topic, from foundational concepts to advanced techniques. These expertly curated Windows Virtual Desktop Specialty questions help build confidence and ensure you're ready to pass the exam with flying colors.

P.S. Free & New AZ-140 dumps are available on Google Drive shared by Actual4dump: https://drive.google.com/open?id=1TAwIC8vs9zQMd5T9mHS93-Q3nK_cEvwc

We offer you free demo for you to have a try before buying the AZ-140 study guide, so that you can have a better understanding of what you are going to buy. AZ-140 exam dumps of us also offer you free update for one year after purchasing, and our system will send the latest version to you automatically. Besides we have the online and offline chat service stuff, and if you have any questions about the AZ-140 Study Guide, you can consult them, and they will offer you the suggestions.

The AZ-140 Certification Exam is a challenging exam that requires careful preparation and study. Microsoft recommends that candidates have at least one year of experience in implementing and managing Azure Virtual Desktop solutions before taking AZ-140 exam. In addition, Microsoft offers various training resources, including online courses, practice exams, and study guides, to help you prepare for the exam.

Microsoft AZ-140 certification exam is an excellent opportunity for IT professionals who have experience with Microsoft Azure, Windows Virtual Desktop, and remote desktop services. Configuring and Operating Microsoft Azure Virtual Desktop certification exam validates the candidate's expertise in managing Azure Virtual Desktop, which is becoming increasingly important for many organizations that are moving their IT infrastructure to the cloud. Earning this certification can open up many career opportunities in cloud computing and virtual desktop administration.

AZ-140 Vce File & Latest AZ-140 Dumps Files

If you want to give up your certificate exams as you fail AZ-140 exam or feel it too difficult, please think about its advantages after you obtain a Microsoft certification. Many special positions require employees to have a qualification. If you think it is very difficult for you to pass exams, our AZ-140 Valid Exam Cram PDF can help you to achieve your goal. Our exam materials are collected from the real test center and edited by our experienced experts. If you need 100% passing rate, our AZ-140 valid exam cram PDF can help you.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q40-Q45):

NEW QUESTION # 40

You plan to deploy Windows Virtual Desktop.

You need to create Azure NetApp Files storage to store FSLogix profile containers.

Which four actions should you perform in sequence after you register the NetApp Resource Provider? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

- Create a NetApp account.
- Create and assign a managed identity.
- Create a volume.
- Create a capacity pool.
- Create an Azure file share.
- Configure an Active Directory connection.

Answer Area

The answer area contains four empty slots for actions, with navigation arrows on the left and right sides. The slots are currently empty.

Answer:

Explanation:

Actions

- Create a NetApp account.
- Create and assign a managed identity.
- Create a volume.
- Create a capacity pool.
- Create an Azure file share.
- Configure an Active Directory connection.

Answer Area

The answer area shows the correct sequence of actions in a dashed red box: 1. Create a NetApp account. 2. Create a capacity pool. 3. Configure an Active Directory connection. 4. Create a volume.

Explanation

1. Set up Azure NetApp Files account
2. Create capacity pool
3. Join Active Directory connection
4. Create new volume

Topic 1, Litware, Inc

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Litware, Inc. is a pharmaceutical company that has a main office in Boston, United States, and a remote office in Chennai, India.

Existing Environment. Identity Environment

The network contains an on-premises Active Directory domain named litware.com that syncs to an Azure Active Directory (Azure AD) tenant named litware.com.

The Azure AD tenant contains the users shown in the following table.

Name	Description
Admin1	A directory-synced user that is a local administrator on all the computers joined to the on-premises Active Directory domain.
CloudAdmin1	A cloud-only user that is assigned the Global administrator role.

All users are registered for Azure Multi-Factor Authentication (MFA).

Existing Environment. Cloud Services

Litware has a Microsoft 365 E5 subscription associated to the Azure AD tenant. All users are assigned Microsoft 365 Enterprise E5 licenses.

Litware has an Azure subscription associated to the Azure AD tenant. The subscription contains the resources shown in the following table.

Name	Type	Location	Configuration
storage1	Storage account	East US	Storage (general purpose v1), Locally-redundant storage (LRS).
VM1	Virtual machine	East US	Joined to the on-premises Active Directory domain.

Litware uses custom virtual machine images and custom scripts to automatically provision Azure virtual machines and join the virtual machines to the on-premises Active Directory domain.

Network and DNS

The offices connect to each other by using a WAN link. Each office connects directly to the internet.

All DNS queries for internet hosts are resolved by using DNS servers in the Boston office, which point to root servers on the internet. The Chennai office has caching-only DNS servers that forward queries to the DNS servers in the Boston office.

Requirements. Planned Changes

Litware plans to implement the following changes:

Deploy Windows Virtual Desktop environments to the East US Azure region for the users in the Boston office and to the South India Azure region for the users in the Chennai office.

Implement FSLogix profile containers.

Optimize the custom virtual machine images for the Windows Virtual Desktop session hosts.

Use PowerShell to automate the addition of virtual machines to the Windows Virtual Desktop host pools.

Requirements. Performance Requirements

Litware identifies the following performance requirements:

Minimize network latency of the Windows Virtual Desktop connections from the Boston and Chennai offices.

Minimize latency of the Windows Virtual Desktop host authentication in each Azure region.

Minimize how long it takes to sign in to the Windows Virtual Desktop session hosts.

Requirements. Authentication Requirements

Litware identifies the following authentication requirements:

Enforce Azure MFA when accessing Windows Virtual Desktop apps.

Force users to reauthenticate if their Windows Virtual Desktop session lasts more than eight hours.

Requirements. Security Requirements

Litware identifies the following security requirements:

Explicitly allow traffic between the Windows Virtual Desktop session hosts and Microsoft 365.

Explicitly allow traffic between the Windows Virtual Desktop session hosts and the Windows Virtual Desktop infrastructure.

Use built-in groups for delegation.

Delegate the management of app groups to CloudAdmin1, including the ability to publish app groups to users and user groups.

Grant Admin1 permissions to manage workspaces, including listing which apps are assigned to the app groups.

Minimize administrative effort to manage network security.

Use the principle of least privilege.

Requirements. Deployment Requirements

Litware identifies the following deployment requirements:

Use PowerShell to generate the token used to add the virtual machines as session hosts to a Windows Virtual Desktop host pool.

Minimize how long it takes to provision the Windows Virtual Desktop session hosts based on the custom virtual machine images.

Whenever possible, preinstall agents and apps in the custom virtual machine images.

NEW QUESTION # 41

You have an Azure Virtual Desktop host pool named Pool1.

You need to ensure that you can create an Azure NetApp Files volume that will host user profiles for Pool1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

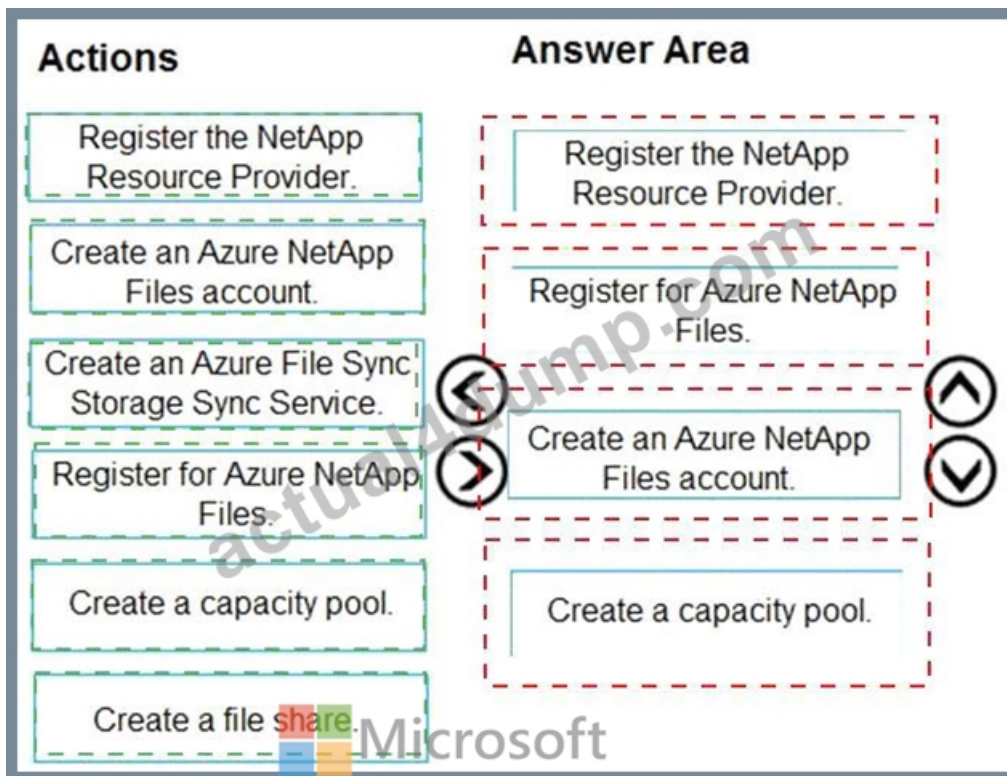

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions  **Answer Area**

Register the NetApp Resource Provider.		
Create an Azure NetApp Files account.		
Create an Azure File Sync Storage Sync Service.	⏪	⏩
Register for Azure NetApp Files.	⏩	⏪
Create a capacity pool.		
Create a file share.		

Answer:

Explanation:

NEW QUESTION # 42

Your company has 60,000 users.

You plan to deploy Azure Virtual Desktop.

You need to recommend a storage solution for the FSLogix profile containers. The solution must provide the highest possible IOPS and the lowest latency desktop experience. What should you recommend?

- A. Azure NetApp Files
- B. Azure Blob storage Premium
- C. Azure Data Lake Storage
- D. Azure Files Standard

Answer: A

Explanation:

Reference:

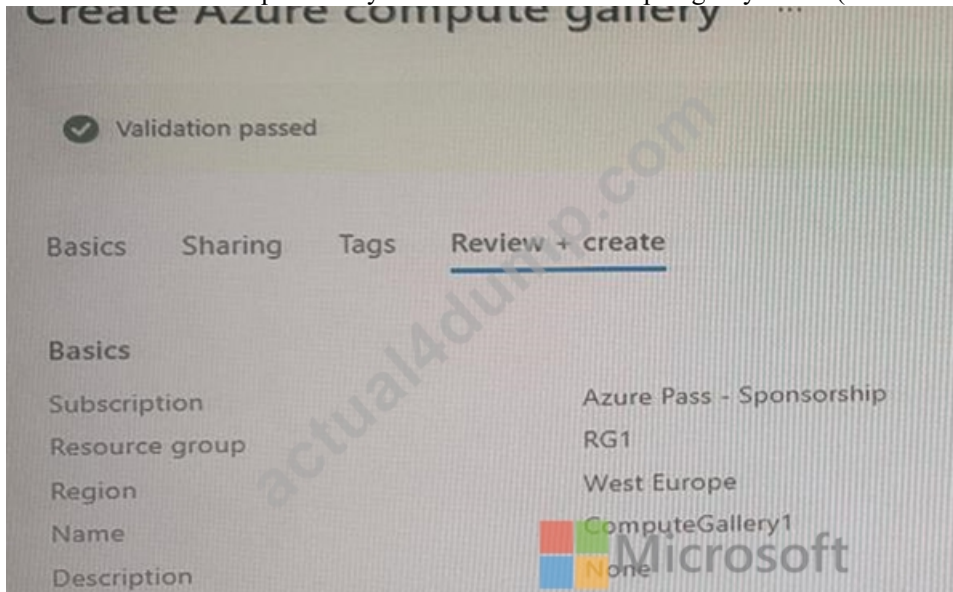

<https://docs.microsoft.com/en-us/azure/virtual-desktop/store-fslogix-profile>

NEW QUESTION # 43

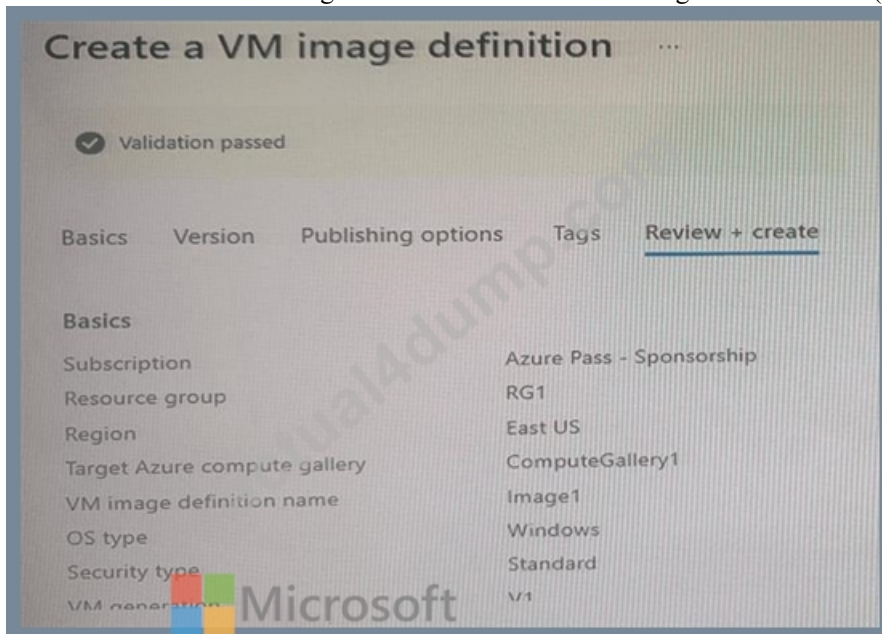

You have an Azure subscription that contains the virtual machines shown in the following table.

Name	Location	vCPUs	Generation
VM1	West Europe	8	2
VM2	East US	2	1
VM3	West US	12	1

You create an Azure Compute Gallery as shown in the Azure compute gallery exhibit. (Click the Azure compute gallery tab.)

You create a virtual machine image definition as shown in the VM image definition exhibit. (Click the VM image definition tab.)

Question	Azure compute gallery	VM image definition
Publisher	Contoso	Microsoft
Offer	WindowsServer2022	
SKU	Datacenter	
Publishing options		
Product name		None
License terms link		None
Description		None
Release notes URI		None
Privacy terms URI		None
Purchase plan name		None
Purchase plan publisher name		None
Recommended VM vCPUs		4-16
Recommended VM memory		1-32 GB
Excluded disk types		None
VM image definition end of life date		None

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use VM1 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>
You can use VM2 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>
You can use VM3 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
You can use VM1 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>
You can use VM2 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>
You can use VM3 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Statements	Yes	No
You can use VM1 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>
You can use VM2 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>
You can use VM3 as a source for the version of the image definition.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 44

You network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The domain contains the users shown in the following table.

Name	Role	Member of
User1	Desktop Virtualization Workspace Reader	Group1
User2	Desktop Virtualization Application Group Reader	Group2

You have a Windows Virtual Desktop deployment that contains the application groups shown in the following table.

Name	Application	Assignment
AppGroup1	Microsoft Word	Group1
AppGroup2	Microsoft Excel	Group2
AppGroup3	Microsoft PowerPoint	Group1, Group2

You have the workspaces shown in the following table.

Name	Application group
Workspace1	AppGroup1
Workspace2	AppGroup2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area			
Statements	Yes	No	
User1 has PowerPoint listed in the Remote Desktop client.	<input type="radio"/>	<input type="radio"/>	
User1 has Word listed in the Remote Desktop client.	<input type="radio"/>	<input type="radio"/>	
User2 has PowerPoint listed in the Remote Desktop client.	<input type="radio"/>	<input type="radio"/>	

Answer:

Explanation:

Answer Area			
Statements	Yes	No	
User1 has PowerPoint listed in the Remote Desktop client.	<input type="radio"/>	<input checked="" type="radio"/>	
User1 has Word listed in the Remote Desktop client.	<input checked="" type="radio"/>	<input type="radio"/>	
User2 has PowerPoint listed in the Remote Desktop client.	<input type="radio"/>	<input checked="" type="radio"/>
