

Die neuesten NS0-005 echte Prüfungsfragen, Network Appliance NS0-005 originale fragen

[Pass Network Appliance NS0-005 Exam | Latest NS0-005 Dumps & Practice Exams - Cert007](#)

communication with the clients using NFS or SMB protocols. ONTAP software also provides features such as data protection, efficiency, security, and performance for NAS workloads.

References = NetApp ONTAP, Provision NAS storage for both Windows and Linux using both NFS and SMB

6. Which two NetApp products offer hardware encryption? (Choose two.)

- A. NetApp Storage Encryption (NSE)
- B. NVMe self-encrypting drives (SED)
- C. NetApp Aggregate Encryption (NAE)
- D. NetApp Volume Encryption (NVE)

Answer: A

Explanation:

NetApp Storage Encryption (NSE) and NVMe self-encrypting drives (SED) are two NetApp products that offer hardware encryption. Hardware encryption is a method of encrypting data at the disk level using a hardware-accelerated mechanism. NSE requires all drives in an HA pair to be purpose-built, self-encrypting drives. These drives perform the data encryption themselves through a hardware-accelerated mechanism. Because of the hardware acceleration, NSE systems usually outperform NVE systems when encrypting data¹. NVMe self-encrypting drives (SED) are a type of NSE drives that use the NVMe protocol to provide high performance and low latency. NVMe SEDs are supported on select NetApp AFF systems².

7. Which NetApp BlueXP product enables a customer to provide read and write access to remote Windows servers from a centralized datastore?

- A. BlueXP copy and sync
- B. BlueXP edge caching
- C. BlueXP tiering
- D. Cloud Volumes ONTAP

Answer: B

Explanation:

BlueXP edge caching is a NetApp BlueXP product that enables a customer to provide read and write access to remote Windows servers from a centralized datastore. BlueXP edge caching allows you to cache data from a BlueXP volume or a Cloud Volume ONTAP system on a local Windows server, which improves the performance and availability of your applications. You can also sync the cached data back to the source volume, ensuring data consistency and protection.

References = BlueXP edge caching overview, BlueXP edge caching documentation, BlueXP edge caching: Accelerate access to your data

8. A customer wants to use cloud storage as part of their data strategy. Their existing storage is a mixture of NFS and SMB workloads. The customer wants a managed service to help provision these resources. Which solution should the customer choose?

4 / 5

Nun ist die Network Appliance NS0-005 Zertifizierungsprüfung eine beliebte Prüfung in der IT-Branche. Viele IT-Fachleute wollen das Network Appliance NS0-005 Zertifikat erhalten. So ist die Network Appliance NS0-005 Zertifizierungsprüfung eine beliebte Prüfung. Das Network Appliance NS0-005 Zertifikat ist sehr hilfreich, um Ihre Arbeit in der IT-Industrie zu verbessern und Ihr Gehalt zu erhöhen und Ihrem Leben eine zuverlässige Garantie zu geben.

Network Appliance NS0-005 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Intelligent Data Infrastructure: This domain addresses advanced solutions including cyber resiliency, data mobility, hybrid cloud protection, storage architectures, and flexible consumption models for NetApp.
Thema 2	Data Storage Software: This domain focuses on NetApp's core software platforms including SANtricity, ONTAP, and StorageGRID, along with the data management tools used to operate these systems.
Thema 3	Infrastructure: This domain covers foundational concepts including basic infrastructure components, data management principles, virtualization technologies, and AI fundamentals relevant to storage environments.

Wir machen NS0-005 leichter zu bestehen!

Als Anbieter des Network Appliance NS0-005 (NetApp Technology Solutions Professional Exam) IT-Prüfungskompendium bieten IT-Experten von PrüfungFrage ständig die Produkte von guter Qualität. Sie bieten den Kunden kostenlosen Online-Service rund um die Uhr und aktualisieren Network Appliance NS0-005 (NetApp Technology Solutions Professional Exam) Prüfungsfragen und Antworten auch am schnellsten.

Network Appliance NetApp Technology Solutions Professional Exam NS0-005 Prüfungsfragen mit Lösungen (Q88-Q93):

88. Frage

You have multiple on-premises applications writing to ONTAP LUNs and NFS exports. You want to build a disaster recovery solution from your on-premises ONTAP systems to your Microsoft Azure Resource Group while preserving the data efficiency and access properties for block and file.

Which cloud storage destination would you use In Microsoft Azure to accomplish this task?

- A. Azure Blob Destination
- B. NetApp Cloud Volumes Service
- **C. NetApp Cloud Volumes ONTAP**
- D. Azure NetApp Files

Antwort: C

89. Frage

Which StorageGRID feature enables a compliant information lifecycle management (ILM) policy to prevent object deletion?

- A. SnapLock Compliance
- B. S3 bucket access policy
- **C. S3 Object Lock**
- D. Cloud Storage Pool

Antwort: C

Begründung:

S3 Object Lock is a StorageGRID feature that enables a compliant information lifecycle management (ILM) policy to prevent object deletion. S3 Object Lock allows you to apply a retention period and a legal hold to individual objects or object versions in buckets with S3 Object Lock enabled. During the retention period, objects cannot be overwritten or deleted unless the legal hold is in effect. If an object is under a legal hold, it cannot be deleted even after the retention period expires. S3 Object Lock helps you to meet regulatory compliance, privacy, and data protection requirements for your object data.

References = Manage objects with S3 Object Lock, Example 7: Compliant ILM policy for S3 Object Lock, NetApp StorageGRID ILM on tape

90. Frage

Which of the following are benefits of using NetApp StorageGRID? (Choose Two)

- **A. Policy-based data retention**
- B. High-performance computing
- **C. Geographically dispersed data storage**
- D. Real-time transaction processing

Antwort: A,C

91. Frage

What are three supported deployment solutions for NetApp StorageGRID? (Choose three.)

- A. virtual servers using VMware ESXi
- B. virtual servers using Docker containers
- C. virtual servers using Microsoft Hyper-V
- D. StorageGRID hardware appliances
- E. virtual servers using Amazon EC2

Antwort: A,B,D

92. Frage

What is the centralized platform for managing NetApp Cloud Data Services across environments?

- A. Cloud Insights
- **B. BlueXP Console**
- C. OnCommand Cloud Manager
- D. OnCommand System Manager

Antwort: B

93. Frage

Wenn Sie sich auf Network Appliance NS0-005 Prüfung vorbereiten, ist es nicht eine gute Weise für Sie, alle Kenntnisse für die Prüfungen ziellos auswendig zu lernen. Tatsächlich gibt es die Lernmethode, die Network Appliance NS0-005 Prüfung leichter zu bestehen. Wenn Sie die guten Geräte benutzen, können Sie weniger Zeit verwenden. Und Es ist auch die Garantie, die Network Appliance NS0-005 Prüfung zu bestehen. Was ist das Gerät? Natürlich ist die Network Appliance NS0-005 Dumps von PrüfungFrage.
