Professional Scrum Product Owner I certification is provided by Scrum.org, which is a leading organization that provides training, certification, and resources for Scrum practitioners. Professional Scrum Product Owner I certification exam is an objective assessment of a product owner's knowledge and understanding of Scrum theory, practices, and principles. It also tests their ability to apply this knowledge in real-world situations.

Scrum Professional Scrum Product Owner I Sample Questions (Q19-Q24):

NEW QUESTION # 19

The Product Owner is accountable for effective Product Backlog management.

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 20

Which statement about the Product Backlog is correct?

- A. The Product Backlog must only contain small, detailed and clearly described items.
- B. The Scrum Master is responsible for managing the Product Backlog.
- **C. The Product Owner is responsible for managing the Product Backlog.**

Answer: C

NEW QUESTION # 21

Who creates the Definition of Done?

(choose the best answer)

- **A. The Scrum Team**
- B. The Product Owner
- C. The Developers
- D. The Scrum Master

Answer: A

Explanation:

The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The Definition of Done is created by the Scrum Team, not just the Developers. The Scrum Team must have a shared understanding of what it means for work to be complete, to ensure transparency. The Definition of Done is used to assess when work is complete on the product Increment. The Definition of Done may vary significantly per Scrum Team, depending on the context. The Definition of Done evolves over time and is updated whenever the Scrum Team learns more about the product and the environment in which it operates.

NEW QUESTION # 22

What three things might a Scrum Product Owner focus on to ensure the product delivers value?

(choose the best three answers)

- **A. Direct customer feedback.**
- **B. How quickly or easily the product can be absorbed and used by its customers.**
- C. Minimizing changes to project scope.
- **D. How much of the functionality of the product is being used.**
- E. Velocity is increasing over time.

Answer: A,B,D

Explanation:

* The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for managing and refining the Product Backlog, collaborating with the stakeholders and the Developers, and ordering the items in a way that best achieves goals and missions. The Product Owner represents the interests of everyone with a stake in the product and ensures that the Scrum Team works on the right things at the right time.

* To ensure that the product delivers value, a Scrum Product Owner might focus on the following aspects:

* How much of the functionality of the product is being used: This is an indicator of how well the product meets or exceeds the needs and expectations of the customers and users. It can also reveal which features or functions are more or less valuable or useful for them. The Product Owner can use various methods or metrics to measure the usage of the product functionality, such as analytics, user behavior, retention, or engagement.

* Direct customer feedback: This is a source of valuable input and insights from the people who use or benefit from the product. It can also help to validate or invalidate assumptions or hypotheses about the product value and quality. The Product Owner can use various methods or channels to collect and incorporate customer feedback, such as surveys, ratings, reviews, interviews, focus groups, or social media.

* How quickly or easily the product can be absorbed and used by its customers: This is a measure of how well the product delivers value to customers or users in a timely and convenient manner.
