

# Pass Guaranteed Quiz 2026 Oracle 1z0-1093-25: Useful Oracle Cloud Database Services 2025 Professional Valid Test Registration

BTW, DOWNLOAD part of Prep4King 1z0-1093-25 dumps from Cloud Storage: <https://drive.google.com/open?id=1uUynZlu3RbqhGJ-fUR5wvFUMtB-qz3cV>

The modern Oracle world is changing its dynamics at a fast pace. To stay updated and competitive you have to learn these technological changes. With the one Oracle Cloud Database Services 2025 Professional (1z0-1093-25) certification exam you can do this easily. The Oracle Cloud Database Services 2025 Professional (1z0-1093-25) certification exam offers a unique and quick way to learn new in-demand expertise and enhance your knowledge.

Passing Oracle actual test will make you stand out from other people and you will have access to the big companies. But it is not an easy thing for you to prepare 1z0-1093-25 practice test. The best way for you is choosing a training tool to practice 1z0-1093-25 Study Materials. If you have no idea about the training tools, Prep4King will be your best partner in the way of passing the IT certification.

## 2026 1z0-1093-25 – 100% Free Valid Test Registration | Reliable Reliable Oracle Cloud Database Services 2025 Professional Exam Voucher

Our 1z0-1093-25 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening. As the questions of exams of our 1z0-1093-25 exam dumps are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our 1z0-1093-25 Practice Engine can serve as a conducive tool for you make up for those hot points you have ignored. You will be completed ready for your 1z0-1093-25 exam.

**Oracle Cloud Database Services 2025 Professional Sample Questions (Q66-Q71):**

### NEW QUESTION # 66

Which statement accurately describes the function of the HeatWave service in relation to a standard MySQL database?

- A. HeatWave is a standalone database system that replaces MySQL, offering enhanced security features.
- **B. HeatWave provides an in-memory, massively parallel query accelerator to MySQL, improving analytical query performance.**
- C. HeatWave acts as a caching layer in front of MySQL, speeding up access to frequently accessed data.
- D. HeatWave is a clustering solution, where a single MySQL instance is split into multiple parts.
- E. HeatWave is a specialized version of MySQL designed solely for transactional workloads, optimized for high concurrency.

**Answer: B**

Explanation:

HeatWave as a Query Accelerator:

HeatWave enhances the MySQL Database Service by providing an in-memory, massively parallel query accelerator. It is specifically designed to speed up analytical (OLAP) queries, making them run significantly faster compared to using MySQL alone.

\* The system stores data in a columnar format and processes it in memory, utilizing distributed, parallel processing to achieve high performance.

\* Unlike traditional MySQL setups, HeatWave can execute complex analytical workloads efficiently.

Why the other options are incorrect:

\* A: HeatWave is not a standalone database but an extension of MySQL.

\* C: It is optimized for analytical workloads, not transactional.

\* D: It is more than just a caching layer; it actively processes queries.

\* E: HeatWave clusters do not split MySQL instances but enhance query processing.

### NEW QUESTION # 67

Oracle NoSQL Database Cloud Service supports operations on data based on keys. Which of the following best describes how data is primarily accessed and retrieved within this model?

- A. Data is accessed using structured query language (SQL) with joins and complex filtering conditions.
- B. Data is accessed through a predefined schema that dictates how data is organized and queried.
- **C. Data is primarily accessed using the unique key associated with the desired data item.**
- D. Data is retrieved by traversing relationships between interconnected nodes in a graph structure.
- E. Data is searched based on the content of the values using full-text indexing and complex search queries.

**Answer: C**

Explanation:

C: Accessing data using the unique key:

\* Oracle NoSQL Database Cloud Service follows a key-value data model.

\* Data is accessed directly using a unique key, which is highly efficient for lookups.

\* The value associated with the key can be simple or complex (e.g., JSON objects).

\* Provides fast read and write operations.

Why the other options are incorrect:

\* A. SQL with joins: Typical of relational databases, not NoSQL.

\* B. Graph traversal: Relevant to graph databases, not key-value stores.

\* D. Full-text indexing: Not the primary access method in key-value databases.

\* E. Predefined schema: NoSQL databases generally support schema-less data storage.

### NEW QUESTION # 68

Which two tools can you use to create a HeatWave MySQL Database Service System?

- A. MySQL Shell on OCI Compute
- **B. OCI Console**
- C. OCI SQL Developer
- D. OCI Bastion Server
- **E. OCI Command Line Interface**

**Answer: B,E**

Explanation:

OCI Console:

The Oracle Cloud Infrastructure Console is the primary graphical interface for creating and managing MySQL HeatWave Database Service Systems. It provides a user-friendly environment for configuring database instances and integrating HeatWave.

OCI CLI:

The OCI Command Line Interface allows for automation and scripting of database service creation. It is useful when managing multiple instances or performing bulk operations.

Why the other options are incorrect:

- \* C:OCI Bastion Server is used for secure SSH access, not for database creation.
- \* D:MySQL Shell is a client tool for interacting with databases, not for provisioning them.
- \* E:OCI SQL Developer is a database management tool, not a service provisioning tool.

### NEW QUESTION # 69

When cloning a BaseDB database for development and testing, which of the following considerations is MOST critical to ensure compliance with data privacy regulations?

- A. Maintaining the same network security group (NSG) rules as the production database.
- B. Scheduling the cloning operation during off-peak hours.
- C. Using the same database version as the production database.
- D. Ensuring the compute shape of the cloned database is identical to the production database.
- E. Masking or anonymizing sensitive data in the cloned database.

**Answer: E**

Explanation:

B: Masking or anonymizing sensitive data:

\* Data privacy regulations (like GDPR, HIPAA) mandate that personally identifiable information (PII) is protected, even in non-production environments.

\* Cloning a database without masking sensitive data could expose confidential information to unauthorized users.

\* Techniques include:

\* Data masking: Replacing real data with realistic, but non-sensitive values.

\* Data anonymization: Irreversibly removing personally identifiable information.

Why the other options are incorrect:

\* A. Matching compute shape: Relevant to performance, not privacy.

\* C. Using the same database version: Important for compatibility, but not related to data privacy.

\* D. Same NSG rules: Important for network security, but does not directly address data exposure.

\* E. Off-peak scheduling: Minimizes disruption but does not address data protection.

### NEW QUESTION # 70

Which Oracle Cloud Infrastructure (OCI) service is PRIMARILY used to store backups created from a BaseDB database?

- A. OCI Block Volume
- B. OCI Object Storage
- C. OCI Data Transfer Service
- D. OCI File Storage
- E. OCI Archive Storage

**Answer: B**

Explanation:

C: OCI Object Storage:

\* The primary storage service for database backups within OCI.

\* Offers high durability, availability, and scalability.

\* Integrated with Oracle's automated backup solutions for BaseDB.

\* Suitable for both short-term and long-term storage of database backups.

Why the other options are incorrect:

\* A. OCI Block Volume: Used for primary database storage, not long-term backups.

\* B. OCI File Storage: Typically used for file system-based workloads, not for database backups.

\* D. OCI Archive Storage: Suitable for long-term archival but not the primary backup destination.

\* E. OCI Data Transfer Service:Used for bulk data migration into OCI, not for backup storage.

### NEW QUESTION # 71

.....

Believe in yourself, choosing the 1z0-1093-25 study guide is the wisest decision. So far, the 1z0-1093-25 practice materials have almost covered all the official test of useful 1z0-1093-25 exam materials, before our products on the Internet, all the 1z0-1093-25 study materials are subject to rigorous expert review, so you do not have to worry about quality problems of our latest 1z0-1093-25 Exam Torrent, focus on the review pass the 1z0-1093-25 qualification exam. I believe that through these careful preparation, you will be able to pass the exam.
