With our Professional-Cloud-Security-Engineer test prep, you don't have to worry about the complexity and tediousness of the operation. Our Professional-Cloud-Security-Engineer exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the Professional-Cloud-Security-Engineer quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. And our Professional-Cloud-Security-Engineer Exam Torrent make it easy for you to take notes on it so that your free time can be well utilized and you can often consolidate your knowledge. Everything you do will help you successfully pass the exam and get the card.

The Google Professional-Cloud-Security-Engineer Exam is intended for professionals who have experience in cloud security and are looking to demonstrate their expertise in this field. This may include security engineers, solution architects, and other IT professionals who are responsible for designing and implementing security solutions for cloud-based applications and systems. Google Cloud Certified - Professional Cloud Security Engineer Exam certification is recognized as a mark of excellence in the industry and can help professionals advance their careers by demonstrating their skills and knowledge in cloud security.

2026 Professional-Cloud-Security-Engineer Practice Online | High-quality Google Cloud Certified - Professional Cloud Security Engineer Exam 100% Free Dumps

To keep with such an era, when new knowledge is emerging, you need to pursue latest news and grasp the direction of entire development tendency, our Professional-Cloud-Security-Engineer training questions have been constantly improving our performance and updating the exam bank to meet the conditional changes. Our working staff regards checking update of our Professional-Cloud-Security-Engineer Preparation exam as a daily routine. So without doubt, our Professional-Cloud-Security-Engineer exam questions are always the latest and valid.

Google Professional-Cloud-Security-Engineer Certification is a prestigious certification offered by Google Cloud, which is designed to validate the skills of IT professionals in securing Google Cloud Platform (GCP) solutions. Google Cloud Certified - Professional Cloud Security Engineer Exam certification is aimed at professionals who want to demonstrate their expertise in cloud security and protect cloud-based infrastructure from potential attacks.

Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q273-Q278):

NEW QUESTION # 273

A customer has an analytics workload running on Compute Engine that should have limited internet access.

Your team created an egress firewall rule to deny (priority 1000) all traffic to the internet.

The Compute Engine instances now need to reach out to the public repository to get security updates. What should your team do?

- A. Create an egress firewall rule to allow traffic to the hostname of the repository with a priority less than 1000.
- B. Create an egress firewall rule to allow traffic to the CIDR range of the repository with a priority less than 1000.
- C. Create an egress firewall rule to allow traffic to the CIDR range of the repository with a priority greater than 1000.
- D. Create an egress firewall rule to allow traffic to the hostname of the repository with a priority greater than 1000.

Answer: B

Explanation:

Explanation

https://cloud.google.com/vpc/docs/firewalls#priority_order_for_firewall_rules

NEW QUESTION # 274

An organization is moving applications to Google Cloud while maintaining a few mission-critical applications on-premises. The organization must transfer the data at a bandwidth of at least 50 Gbps. What should they use to ensure secure continued connectivity between sites?

- A. Partner Interconnect
- B. Dedicated Interconnect
- C. Cloud Router
- D. Cloud VPN

Answer: B

NEW QUESTION # 275

Your organization is using Active Directory and wants to configure Security Assertion Markup Language (SAML). You must set up and enforce single sign-on (SSO) for all users.

What should you do?

- A. 1- Create a new SAML profile.
 - * 2. Populate the sign-in and sign-out page URLs.
 - * 3. Upload the X.509 certificate.
 - * 4. Configure Entity ID and ACS URL in your IdP
- B. 1. Manage SAML profile assignments.
 - * 2. Enable OpenID Connect (OIDC) in your Active Directory (AD) tenant.
 - * 3. Verify the domain.
- C. 1. Create a new SAML profile.
 - * 2. Upload the X.509 certificate.
 - * 3. Enable the change password URL.
 - * 4. Configure Entity ID and ACS URL in your IdP.
- D. 1. Configure prerequisites for OpenID Connect (OIDC) in your Active Directory (AD) tenant
 - * 2. Verify the AD domain.
 - * 3. Decide which users should use SAML.
 - * 4. Assign the pre-configured profile to the select organizational units (OUs) and groups.

Answer: A

Explanation:

Explanation

When configuring SAML-based Single Sign-On (SSO) in an organization that's using Active Directory, the general steps would involve setting up a SAML profile, specifying the necessary URLs for sign-in and sign-out processes, uploading an X.509 certificate for secure communication, and setting up the Entity ID and Assertion Consumer Service (ACS) URL in the Identity Provider (which in this case would be Active Directory).

NEW QUESTION # 276

Your team sets up a Shared VPC Network where project co-vpc-prod is the host project. Your team has configured the firewall rules, subnets, and VPN gateway on the host project. They need to enable Engineering Group A to attach a Compute Engine instance to only the 10.1.1.0/24 subnet.

What should your team grant to Engineering Group A to meet this requirement?

- A. Compute Shared VPC Admin Role at the host project level.
- B. Compute Network User Role at the host project level.
- **C. Compute Network User Role at the subnet level.**
- D. Compute Shared VPC Admin Role at the service project level.

Answer: C

Explanation:

NEW QUESTION # 277

Your organization's financial modeling application is already deployed on Google Cloud. The application processes large amounts of sensitive customer financial data. Application code is old and poorly understood by your current software engineers. Recent threat modeling exercises have highlighted the potential risk of sophisticated side-channel attacks against the application while the application is running. You need to further harden the Google Cloud solution to mitigate the risk of these side-channel attacks, ensuring maximum protection for the confidentiality of financial data during processing, while minimizing application problems. What should you do?

- A. Utilize customer-managed encryption keys (CMEK) to ensure complete control over the encryption process.
- B. Implement a runtime library designed to introduce noise and timing variations into the application's execution which will disrupt side-channel attack.
- C. Enforce stricter access controls for Compute Engine instances by using service accounts, least privilege IAM policies, and limit network access.
- **D. Migrate the application to Confidential VMs to provide hardware-level encryption of memory and protect sensitive data during processing.**

Answer: D
