F5 BIG-IP Administrator Exam Sample Questions (Q209-Q214):

NEW QUESTION # 209

Which three statements describe a characteristic of profiles. (Choose three.)

- A. A profile can be a child of one profile and a parent of another.

- B. While most virtual servers have at least one profile associated with them, it is not required.
- C. Custom profiles are always based on a parent profile.
- D. All changes to parent profiles are propagated to their child profiles.
- E. Default profiles cannot be created or deleted.

Answer: A,C,E

NEW QUESTION # 210

Which cookie persistence method requires the fewest configuration changes on the web servers to be implemented correctly.

- A. insert
- B. rewrite
- C. passive
- D. session

Answer: A

NEW QUESTION # 211

A BIG-IP Administrator makes a configuration change to a Virtual Server on the Standby device of an HA pair. The HA pair is currently configured with Auto-Sync Enabled. What effect will the change have on the HA pair configuration?

- A. The change will be undone when Auto-Sync propagates the config to the HA pair.
- B. The change will be propagated next time a configuration change is made on the Active device.
- C. The change will be undone next time a configuration change is made on the Active device.
- D. The change will take effect when Auto-Sync propagates the config to the HA pair.

Answer: D

NEW QUESTION # 212

Which process or system can be monitored by the BIG-IP system and used as a failover trigger in a redundant pair configuration.

- A. bandwidth utilization
- B. CPU utilization percentage
- C. VLAN communication ability
- D. duplicate IP address

Answer: C

NEW QUESTION # 213

A set of servers is used for an FTP application as well as an HTTP website via separate BIG-IP Pools. The server support team reports that some servers are receiving a lot more traffic than others.

Which Load Balancing Method should the BIG-IP Administrator apply to even out the connection count?

- A. Ratio (Member)
- B. Ratio (Node)
- C. Least Connections (Member)
- D. Least Connections (Node)

Answer: D

Explanation:

The connection is required to be balanced, and the unit is the server and the application port is the unit, so it is node.

NEW QUESTION # 214

.....
