Pass Guaranteed Quiz MTCNA - MikroTik Certified Network Associate Exam Accurate Free Updates

Our MTCNA exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, and if you don't receive, you can contact us, and we will give you reply as quickly as possible. In addition, MTCNA exam materials are high quality, and we can ensure you that you can pass the exam just one time. We have free demo for you to have a try before buying MTCNA Exam Materials, so that you can have a deeper understanding of what you are going to buy. Free update for one year for MTCNA training materials is also available.

MikroTik MTCNA (MikroTik Certified Network Associate) certification exam is a globally recognized certification program designed to validate a candidate's knowledge and skills in the field of computer networking. MikroTik is a Latvian company that specializes in producing wireless and routing products, and the MTCNA certification exam is the foundation level certification exam offered by the company. MikroTik Certified Network Associate Exam certification exam is designed to test the candidate's knowledge in the areas of basic networking concepts, configuring MikroTik routers, managing network services, and troubleshooting network issues.

MikroTik Certified Network Associate Exam Sample Questions (Q132-Q137):

NEW QUESTION # 132

To connect your MikroTik router to a wireless access point, you have to:

- A. Use the same SSID as on accesspoint
- B. Use the same Band (5 GHz, 2.4 GHz, ...)
- C. Use the same Radio Name

Answer: A,B

Explanation:

To establish a wireless client connection to an access point:

- * The SSID must match exactly - including capitalization.
- * The Band must be compatible - i.e., both devices must support and use the same frequency band (2.4 GHz or 5GHz).
- * Radio Name is an identifier for display purposes only and does not affect connectivity.

Option Analysis:

- * A.#Required - Matching SSID is essential.
- * B.#Not Required - Radio Name is just a display label in tools like Winbox.
- * C.#Required - Band compatibility is critical to ensure the device can "see" and connect to the AP.

Extract from Official MTCNA Course Material - Wireless Client Configuration:

"To connect to an AP, the client must use the same SSID and operate on a compatible band and frequency." Extract from Rene Meneses MTCNA Study Guide - Wireless Modes:

"SSID and band must match to connect. Radio name is not used in the authentication or association process." Extract from Terry Combs Notes - Wireless Settings:

"SSID is like the network name, and it must be identical. Mismatched bands (e.g., 2.4 vs 5GHz) will prevent discovery."

NEW QUESTION # 133

What does the command `routerA(config)#line cons 0` allow you to perform next?

- A. Disable console connections.
- B. Set the Telnet password.
- C. Shut down the router.
- D. Set your console password.

Answer: D

NEW QUESTION # 134

Choose all valid hosts address range for subnet 15.242.55.62/27

- A. 15.242.55.32-15.242.55.63
- B. 15.242.55.33-15.242.55.63
- C. 15.242.55.31-15.242.55.62
- D. 15.242.55.33-15.242.55.62

Answer: D

NEW QUESTION # 135

Mark all features that are compatible with Nstreme

- A. Bridging a device in station mode with a device in ap-bridge mode
- B. Encryption
- C. WDS between a device in station-wds mode and a device in station-wds mode
- **D. WDS between a device in ap-bridge mode with a device in station-wds mode**

Answer: D

NEW QUESTION # 136

Select minimal set of software packages in RouteOS required to configuring a wireless AP

- A. routing
- **B. System**
- C. dhcp
- D. advanced-tools
- **E. Wireless**

Answer: B,E
