In this way, you can easily pass the CompTIA A+ Certification Exam: Core 1 (220-1201) exam with good scores. The countless 220-1201 Exam candidates have passed their dream CompTIA 220-1201 certification exam and they all got help from real, valid, and updated 220-1201 practice questions, You can also trust on PrepAwayETE and start preparation with confidence.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q253-Q258):

NEW QUESTION # 253
A user is having issues when charging a device with a Lightning cable. The cable is not recognized when it is plugged into the device. This issue is usually resolved by flipping the cable over. This issue does not occur with other devices of the same type. Which of the following would most likely cause the issue?

- A. The battery may be swelling and needs inspection.
- B. The device needs to be restarted.
- C. The charging port is dirty or damaged
- D. The cable is failing and needs to be replaced

Answer: C

Explanation:
If flipping the cable helps but the problem is isolated to this device (not others of the same type), the most likely cause is a dirty or damaged charging port on the device itself. Dirt or debris inside the port can prevent a good electrical connection, causing the cable to work intermittently.

1.6: Troubleshoot common mobile device issues.

NEW QUESTION # 254
Which of the following statements best summarize managed vs unmanaged switches? (Select two).

- A. Unmanaged switches have more security capabilities
- B. Managed switches consume less power
- C. Unmanaged switches are generally more expensive
- D. Managed switches require no configuration
- E. Unmanaged switches start working as soon as they are plugged in to the network
- F. Managed switches have more features

Answer: E,F

Explanation:
Unmanaged switches require no configuration they simply need to be plugged in and start working immediately, making them ideal for simple network setups.
Managed switches provide advanced features such as VLANs, SNMP monitoring, port security, and traffic management, but require configuration.
From CompTIA A+ 220-1101 Official Study Guide, Objective 2.2 - Compare and contrast common networking hardware:
"Unmanaged switches operate out of the box with no configuration and are designed for simple connectivity.
Managed switches allow for configuration, monitoring, and management of network traffic and security." Verified Source:

Domain 2.2

NEW QUESTION # 255
Which of the following is the ability to automatically increase and decrease instances based on demand?

- A. Multitenancy
- B. Scalability
- C. Elasticity
- D. Availability

Answer: C

Explanation:
Elasticity in cloud computing refers to the ability of a system to automatically allocate and release resources (such as CPU, RAM, or virtual machines) as workload demands change. This feature is key to ensuring that resources are used efficiently without manual intervention.

NEW QUESTION # 256
A systems administrator deploys BitLocker to all devices. However, one of the desktop PCs is not able to encrypt the boot drive. Which of the following should the administrator check?

- A. TPM
- B. RAM

- C. CPU
- D. HDD

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
BitLocker Drive Encryption in Windows requires aTrusted Platform Module (TPM)to encrypt the boot drive securely. The TPM is a dedicated microcontroller designed to secure hardware through integrated cryptographic keys. It validates system integrity during boot and securely stores the encryption keys. If BitLocker cannot find a TPM or it is disabled in BIOS/UEFI, drive encryption cannot proceed.
BitLocker can function without TPM using a USB startup key, but this compromises some security and is not recommended for managed enterprise environments.

NEW QUESTION # 257
Which of the following technologies best allows a phone to connect to a point-of-sale terminal for wireless payments?

- A. Wi-Fi
- B. Cellular
- C. Bluetooth
- D. NFC

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Near-field communication (NFC) is a short-distance wireless communication method widely used in mobile payment systems like Apple Pay and Google Pay. Simply placing the device near a compatible terminal initiates the payment process.
