Pass Guaranteed Quiz 2026 Nutanix NCP-DB-6.10 Marvelous Dumps Torrent

Are you worried about the security of your payment while browsing? NCP-DB-6.10 test torrent can ensure the security of the purchase process, product download and installation safe and virus-free. If you have any doubt about this, we will provide you professional personnel to remotely guide the installation and use. The buying process of NCP-DB-6.10 Test Answers is very simple, which is a big boon for simple people. After the payment of NCP-DB-6.10 guide torrent is successful, you will receive an email from our system within 5-10 minutes; click on the link to login and then you can learn immediately with NCP-DB-6.10 guide torrent.

In the Nutanix NCP-DB-6.10 Dumps PDF format of ActualCollection, the questions are very relevant to the actual Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam. The Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) dumps PDF format is appropriate for laptops, smartphones, and tablets. As the NCP-DB-6.10 PDF questions file is portable, you can easily study via it anywhere. You can also print these Nutanix PDF Dumps. ActualCollection regularly updates its Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) questions PDF file to improve the questions and introduce changes when required.

Valid NCP-DB-6.10 Test Pattern | NCP-DB-6.10 Test Centres

The software of NCP-DB-6.10 guide torrent boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our NCP-DB-6.10 exam questions boost timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our NCP-DB-6.10 test torrents have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents. So it is worthy for you to buy our NCP-DB-6.10 exam questions.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q95-Q100):

NEW QUESTION # 95
An administrator needs to create and refresh clones to a point in time. NDB allows which two methods for satisfying this

requirement? (Choose two.)

- A. Snapshots
- B. Full backups
- C. Transaction logs
- D. VM snapshots

Answer: A,C

Explanation:
NDB allows creating and refreshing clones to a point in time using two primary methods:
Snapshots: NDB uses storage snapshots (e.g., via Nutanix Volumes or AHV) to capture the database state at a specific point. These snapshots can be used to create or refresh clones, providing a consistent recovery point.
Transaction logs: Transaction logs (e.g., PostgreSQL WAL, SQL Server logs) enable point-in- time recovery (PITR) by applying logs to a snapshot, allowing clones to be refreshed to a precise moment.

NEW QUESTION # 96
What happens to the primary member in a MongoDB Server Cluster during the NDB patching process?

- A. It is patched first and then becomes a secondary member.
- B. It is patched last and is restored to its original state.
- C. It is skipped during the patching process to ensure no downtime.
- D. It becomes a read-only member during the patching process.

Answer: A

Explanation:
NDB identifies the primary member of the MongoDB Server Cluster and patches it first. NDB triggers a failover to elect a new primary member from the remaining secondary members. NDB patches the former primary member, which becomes a secondary member after the failover. NDB patches the remaining secondary members one by one. NDB verifies the patching status and the cluster health. This process ensures that the MongoDB Server Cluster always has a primary member available to handle write operations, while minimizing the downtime and the impact on the cluster performance.

NEW QUESTION # 97
While registering an Always on Availability Group database, an administrator selects the following option:
Multiple Databases as a Group with One Time Machine
Which statement is true regarding this chosen option?

- A. PITR-based SLAs are not supported for database groups.
- B. Point in Time Clones are not supported by Database Groups.
- C. PITR-based SLAs are not supported for database groups containing mixed Recovery Model
- D. PITR-based SLAs are supported for database groups containing mixed Recovery Model.

Answer: C

Explanation:
Nutanix Database Automation (NCP-DB) introduces the concept of MS SQL Server database groups, which allows multiple databases running in the same database instance to be grouped as one Time Machine entity. This applies to both single DB Server VM setups, standalone databases, as well as to Availability Group databases. However, it does not support Point In Time Recovery (PITR)-based Service Level Agreements (SLAs) for database groups containing mixed Recovery Models. This means that if the databases within the group have different recovery models, PITR-based SLAs cannot be applied to the group as a whole.

NEW QUESTION # 98
Which action must an administrator take in Era Networks before using Era to provision a MSSQL AG cluster?

- A. A private network must be configured in Era for the heartbeat traffic.
- B. A that has a static pool managed by Era must be configured.
- C. A network in each data center must be configured for Era.

- D. A network that has a DHCP pool must be configured in Era.

Answer: A

Explanation:
According to the Nutanix Database Automation (NCP-DB) learning documents, before using Era to provision a MSSQL AG cluster, an administrator must configure a private network in Era for the heartbeat traffic. This is because the heartbeat traffic is crucial for maintaining the health and status of the MSSQL AG cluster. The heartbeat traffic is used by the nodes in the cluster to communicate with each other and check the status of the other nodes. If a node does not receive a heartbeat from another node within a certain time frame, it assumes that the other node has failed and takes appropriate action.

NEW QUESTION # 99
An administrator manages an multi-cluster NDB instance with HA enabled. After failure, more than one API server VM is down. How should the administrator restore full functionality?

- A. Manually distribute connections across remaining clusters.
- B. Ensure at least one API server VM is online; the rest will recover automatically.
- C. Call Nutanix support to reset all API server connections.
- D. Restart all database server VMs as NDB HA only tolerates single API server failure.

Answer: B

Explanation:
In a multi-cluster NDB instance with HA enabled, the NDB architecture includes multiple API server VMs to ensure availability. If more than one API server VM is down after a failure, the administrator should ensure at least one API server VM is online. NDB's HA design tolerates multiple API server failures as long as one remains operational, and the remaining VMs will recover automatically through the HA failover mechanism. This leverages Nutanix's distributed architecture and self-healing capabilities to restore full functionality without manual intervention beyond ensuring one VM is running.

NEW QUESTION # 100
......

To attain this you just need to enroll in the NCP-DB-6.10 certification exam and put all your efforts to pass this challenging NCP-DB-6.10 exam with good scores. However, to get success in Nutanix NCP-DB-6.10 dumps PDF is not an easy task, it is quite difficult to pass it. But with proper planning, firm commitment, and Nutanix NCP-DB-6.10 Exam Questions, you can pass this milestone easily. The ActualCollection is a leading platform that offers real, valid, and updated Nutanix NCP-DB-6.10 Dumps.

Valid NCP-DB-6.10 Test Pattern: https://www.actualcollection.com/NCP-DB-6.10-exam-questions.html

Nutanix Dumps NCP-DB-6.10 Torrent Do not forget others still in the running when you are stopping to have rest, You won't regret your decision of choosing our NCP-DB-6.10 study guide, After years of development practice, our NCP-DB-6.10 test torrent is absolutely the best, Nutanix Dumps NCP-DB-6.10 Torrent For this purpose we offer you to try free demo of our product, Any applicant of the NCP-DB-6.10 examination can choose from these preferable formats.

But it s an important trend and there continues to be a flurry of interesting NCP-DB-6.10 articles on working in and/or delaying retirement, The biggest obstacle is simply keeping track of all that media and getting it where we want it.

NCP-DB-6.10 - Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Updated Dumps Torrent

Do not forget others still in the running when you are stopping to have rest, You won't regret your decision of choosing our NCP-DB-6.10 Study Guide, After years of development practice, our NCP-DB-6.10 test torrent is absolutely the best.
