In addition, there are many other advantages of our EX432 learning guide. Hope you can give it a look and you will love it for sure!

RedHat Red Hat Certified Specialist in OpenShift Advanced Cluster Management Sample Questions (Q23-Q28):

NEW QUESTION # 23

Troubleshoot a managed cluster stuck "NotReady" by checking klusterlet/agent components

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

* Check cluster conditions:

oc describe managedcluster cluster-dev

* Check agent namespaces and pods on the managed cluster (common namespace names depend on deployment, but you're looking for ACM/klusterlet agents).

* On hub, check managedclusteraddons and addon health:

oc get managedclusteraddon -n cluster-dev

oc describe managedclusteraddon -n cluster-dev < addon-name >

* Typical fixes: missing pull secret, network/DNS issues, CSR approval issues, etc. (Exam expects you to identify from events/conditions).

NEW QUESTION # 24

Create a policy to enforce "etcd encryption enabled" and verify compliance status

Answer:

Explanation:

See the solution below in Explanation.

* In ACM console: Governance # Create policy # ETCD Encryption template and set to enforce .

* Target clusters via Placement.

* Confirm policy status: Compliant / NonCompliant per cluster.

NEW QUESTION # 25

Configure a maintenance window for deployments (time window concept) and validate drift

Answer:

Explanation:

See the solution below in Explanation.

* Edit the subscription/app definition to include a time window (active or blocked window).

* Attempt a change outside the window and observe behavior (no rollout until window).

* Confirm rollout during window.

NEW QUESTION # 26

Install RHACM Operator (Web Console)

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

* Log in to the OpenShift Web Console as a cluster-admin user.

* Go to Operators # OperatorHub .

* OperatorHub is the catalog of available operators.

* In the search box, type: Advanced Cluster Management .

* Click Advanced Cluster Management for Kubernetes (Red Hat ACM).

* Click Install .

* In the install wizard:

* Update channel : choose the recommended/stable channel for your lab.

* Installation mode : typically "All namespaces on the cluster" (default).

* Installed Namespace : select or create open-cluster-management .

* Click Install and wait for the operator to show Succeeded in:

* Operators # Installed Operators .

Why these steps matter:

* Installing the ACM operator creates the CRDs/controllers required to run the Hub components (MultiClusterHub) that manage/import other clusters.

NEW QUESTION # 27

Bind Cluster to ClusterSet

Task information: Add cluster-dev to the development ClusterSet.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

- * Confirm the cluster is present on the hub:
- * `oc get managedcluster`
- * Bind cluster-dev to development:
- * `clusteradm clusterset bind --clusterset development --cluster cluster-dev`
- * Verify membership (common checks):
- * `oc get managedclustersetbindings -A`
- * `oc get managedclusterset development -o yaml`
- * `oc get managedcluster cluster-dev -o yaml | grep -i clusterset -n`

Why this matters:

- * ClusterSet binding is what allows RBAC/users/apps/policies scoped to that ClusterSet to target the cluster.

NEW QUESTION # 28

.....

We have put substantial amount of money and effort into upgrading the quality of our EX432 preparation materials, into our own EX432 sales force and into our after sale services. This is built on our in-depth knowledge of our customers, what they want and what they need. It is based on our brand, if you read the website carefully, you will get a strong impression of our brand and what we stand for. There are so many advantages of our EX432 Actual Exam, and you are welcome to have a try!
