Microsoft Power Platform Functional Consultant Sample Questions (Q173-

Q178):

NEW QUESTION # 173

A company is using Dataverse with a custom table named Prospects. The Prospects table has a lookup to the Account table. SharePoint document management is configured in the environment but is not configured for the Prospects table. All documents saved as part of the integration must be accessed by using an Account row linked to the Prospects table.

Based on new requirements from end users, the Prospects table must be reconfigured for use with the document management feature.

You need to configure the integration.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□

Explanation:

□

NEW QUESTION # 174

You are designing a chatbot for a sports outlet.

You need to complete the chatbot.

Which features should you use? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

□

Answer:

Explanation:

□

Explanation

Graphical user interface, text, application, email Description automatically generated

□

Box 1: Entities

Out of the box, Power Virtual Agents comes with a set of prebuilt entities, which represent the most commonly used stereotype information in real-world dialogs, such as age, colors, numbers, and names.

With the knowledge granted by entities, a bot can smartly recognize the relevant information from a user input and save it for later use.

Box 2: Topics

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

You can author topics by customizing provided templates, create new topics from scratch, or get suggestions from existing help sites.

A topic has trigger phrases - these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue - and conversation nodes - these are what you use to define how a bot should respond and what it should do.

Box 3: Variables

Variables let you save responses from your customers in a conversation with your bot so that you can reuse them later in the conversation.

For example, you can save a customer's name in a variable called UserName. The bot can then address the customer by name as the conversation continues.

You can use variables to create logical expressions that dynamically route the customer down different conversation paths.

NEW QUESTION # 175

A company that manufactures medical devices uses Power Apps to manage their sales and device maintenance.

A Table named Devices in Microsoft Dataverse has a column named Status. The Status column must have a new status value of Review added to the existing Choice values of Active and Inactive.

The table must be added to a solution to be promoted once the change is made.

Only this change must be promoted to the test environment. The changes must not be able to be changed once promoted. You need

to add the change to a solution for promotion.

Answer:

Explanation:

□ Explanation

NEW QUESTION # 176

You need to create the FAQ solution content
What should you do first?

- A. AI Builder
- B. Trigger phrases
- C. Automate
- D. Suggest topics

Answer: D

NEW QUESTION # 177

A company's sales staff wants a simplified way to manage their opportunities in Dynamics 365 Sales without adding custom code.
You need to provide a solution for each requirement.

Which solutions should you provide? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ Box 1: Add a Kanban control.

The Kanban view allows your sales team to move opportunities from one stage to another by simply dragging them.

Box 2: Add both controls to the My Opportunities view.

* Kanban views help salespeople to manage their opportunities and activities effectively. Add the Kanban control to the Opportunity and Activity entity so salespeople can use the Kanban views. The Kanban control works only on the Opportunity and Activity entities.

* If you use unified interface, you can display any record in a calendar view via the calendar control.

- Go to Settings->Customization->Customize the System

- Open the configuration for the entity that you want to use the calendar control (Opportunities in our example)

- Click the View tab

- Click "Add Control" and select the calendar control.

- Click the dot for every interface from which you want the calendar control to be available.

Box 3: Use a List view

opportunities in Dynamics 365 Sales
