Fast Download PVIP Latest Exam Pattern – The Best Authorized Test Dumps for your NABCEP PVIP

As the constant increasing of difficulty index of the PVIP training materials, passing rate is very important when you choose the study materials. Our study materials can guarantee you to pass the PVIP exam for the first time. After all, all of our questions are the same with the real exam questions. It will cost too much time if you still learn by yourself and memorize the boring knowledge of your reference books, you should purchase our PVIP practice quiz to help you pass the exam soon.

NABCEP PV Installation Professional (PVIP) Board Certification Sample Questions (Q84-Q89):

NEW QUESTION # 84

A 7KW/ 14 KWh multimode system has been installed at a residence, ac-couple with the customer's existing 6.7kwh ac PV system. The system provides uninterrupted power to a protected loads subpanel, which is connected to a refrigerator, Microwave, 1.0 ton are conditioner, three lightning circuit, and the 6.7kwac PV system. One month later, the homeowner moves additional circuits to the protected loads subpanel, substantially increasing the loads. Why would this cause, the backed interconnection breaker in the main service panel to trip?

- A. The load <the protected loads subpanel exceeds the PV system ac rating by 25%.
- **B. The load exceeds the capacity of the interconnection breaker.**
- C. The total load exceeds the system's energy storage capacity of 14kWh.
- D. The main service panel is no longer compliant with NCC 705.12.

Answer: B

NEW QUESTION # 85

A bank of batteries with capability of supplying 250A and a maximum voltage of 325V is housed in a concrete structure in a very humid location. There is service access also between rows of batteries. What is the REQUIRED safety distance between the rows of batteries.

- A. 3-1/2 If the building is equipped with a dehumidifier and the batteries are on insulating surfaces
- B. 6 ft. When the floor is insulated and no dehumidifier is installed.
- C. 4 ft. Whether or not the building is equipped with a dehumidifier or the batteries are insulating surfaces
- **D. 3 ft. when insulated conducted conductors are used between terminals.**

Answer: D

NEW QUESTION # 86

Which electrical connection requires the use of a torque device to complete the connection per NEC requirements?

- A. Underground direct-burial twist-on wire connector
- B. Screw terminals on an ac receptacle outlet
- C. Soldered splices in a conduit body
- **D. Crimp-on lug to the battery cable**

Answer: D

NEW QUESTION # 87

When doing initial inspections on a PV system that was installed using racking that is not compliant with UL 2703, an inspector should pay special attention to which electrical attribute?

- **A. Each PV module needs to be bonded to the equipment grounding conductor.**
- B. The equipment grounding conductor must be irreversibly spliced.
- C. The grounding conductor must be bonded directly to the primary grounding electrode.
- D. Racking needs to be bonded to a supplemental grounding electrode conductor.

Answer: A

NEW QUESTION # 88

When performing a system checkout after completing the installation, what is the SAFEST sequence of tasks to detect installation errors before closing any disconnects to the inverter, charge controller, or batteries?

- A. Perform visual inspection, install source circuit fuses, and measure open-circuit current.
- B. Install source circuit fuses, verify that all equipment-grounding conductors are secure, and measure ac line voltage.
- C. Perform visual inspection, install source circuit fuses, and measure open-circuit voltage.
- **D. Perform visual inspection, check polarity and measure open-circuit voltage.**

Answer: D

NEW QUESTION # 89

.....

The customers don't need to download or install excessive plugins or software to get the full advantage from web-based PV Installation Professional (PVIP) Board Certification (PVIP) practice tests. Additionally, all operating systems also support this format. The third format is the desktop PVIP practice exam software. It is ideal for users who prefer offline PV Installation Professional (PVIP) Board Certification (PVIP) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.
