What's more, part of that Prep4SureReview Data-Architect dumps now are free: <https://drive.google.com/open?id=1YJuHvOUM1oB1cTpmj0yqsdYa50hff8tb>

This Salesforce Certified Data Architect (Data-Architect) software has a simple-to-use interface. By using the Data-Architect practice exam software, you can evaluate your mistakes at the end of every take and overcome them. Our software helps you to get familiar with the format of the original Data-Architect test. Software lets you customize your Salesforce Data-Architect Practice Exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this Data-Architect practice exam software.

Salesforce Data-Architect Certification Exam comprises scenarios that assess the candidate's ability to design, develop, and implement data solutions using Salesforce tools and technologies. Data-Architect exam tests the candidate's knowledge of data modeling, data integration, data migration, data governance, and data security. Candidates are expected to have a deep understanding of Salesforce's data architecture and its application to real-world business scenarios. They must also be proficient in using tools such as Salesforce Data Loader, Salesforce Connect, and Salesforce Shield.

Salesforce Data-Architect Certification Exam is an important milestone for any data architect who works with Salesforce. Salesforce Certified Data Architect certification is highly respected in the industry, and passing the exam demonstrates a high level of skill and expertise in the field of Salesforce data architecture. Candidates who are interested in obtaining the certification should be prepared to invest time and effort in preparation, but the rewards are well worth it.

## Salesforce Certified Data Architect Sample Questions (Q61-Q66):

### NEW QUESTION # 61

UC has one SF org (Org A) and recently acquired a secondary company with its own Salesforce org (Org B). UC has decided to keep the orgs running separately but would like to bidirectionally share opportunities between the orgs in near-real time.

Which 3 options should a data architect recommend to share data between Org A and Org B?

Choose 3 answers.

- **A. Use Salesforce Connect and the cross-org adapter to visualize Opportunities into external objects**

- B. Leverage Heroku Connect and Heroku Postgres to bidirectionally sync Opportunities.
- C. Install a 3rd party AppExchange tool to handle the data sharing
- D. Leverage middleware tools to bidirectionally send Opportunity data across orgs.
- E. Develop an Apex class that pushes opportunity data between orgs daily via the Apex schedule.

**Answer: A,D,E**

#### NEW QUESTION # 62

Which API should a data architect use if exporting 1 million records from Salesforce?

- A. REST API
- B. Streaming API
- C. Bulk API
- D. SOAP API

**Answer: C**

#### NEW QUESTION # 63

What 2 data management policies does the data classification feature allow customers to classify in salesforce? Choose 2 answers:

- A. Data governance policy.
- B. Reference data policy.
- C. Compliance categorization policy.
- D. Data sensitivity policy.

**Answer: C,D**

#### NEW QUESTION # 64

Universal Containers is looking to use Salesforce to manage their sales organization. They will be migrating legacy account data from two aging systems into Salesforce. Which two design considerations should an architect take to minimize data duplication? Choose 2 answers

- A. Use Salesforce matching and duplicate rules.
- B. Use a workflow to check and prevent duplicates.
- C. Import the data concurrently.
- D. Clean data before importing to Salesforce.

**Answer: A,D**

#### NEW QUESTION # 65

Universal Containers has received complaints that customers are being called by multiple Sales Reps where the second Sales Rep that calls is unaware of the previous call by their coworker. What is a data quality problem that could cause this?

- A. Duplicate Contact records exist in the system.
- B. Customer phone number has changed on the Contact record.
- C. Missing phone number on the Contact record.
- D. Duplicate Activity records on a Contact.

**Answer: A**

Explanation:

A data quality problem that could cause customers to be called by multiple Sales Reps is having duplicate Contact records in the system. Duplicate records can result from data entry errors, data imports, or integrations with other systems. Duplicate records can lead to confusion, inefficiency, and customer dissatisfaction
