NEW QUESTION # 32

What is the RISE with SAP Methodology Dashboard used for?

- A. Managing project methodologies
- B. Showing clean core status and extensibility KPIs
- C. Displaying ERP licensing data
- D. Displaying SAP S/4HANA roadmaps

Answer: B

Explanation:

The RISE with SAP Methodology Dashboard, also known as the Clean Core Dashboard, provides a centralized view of how closely a customer's SAP S/4HANA system adheres to clean core principles. It monitors system characteristics such as configuration quality, extensibility usage, custom code volume, upgrade readiness, and adherence to recommended SAP development patterns. This dashboard enables project and IT teams to identify potential risks, unnecessary modifications, and areas where the system may diverge from SAP's cloud-readiness standards.

By monitoring extensibility usage-such as in-app extensions, side-by-side development, and classic enhancements-the dashboard helps ensure the transformation project remains aligned with SAP's modern cloud principles. This is critical in safeguarding system longevity, reducing technical debt, and preparing systems for continuous innovation.

The dashboard does not display licensing data (A) or roadmaps (B). While it supports methodology enforcement, it does not "manage" methodologies directly (D). Instead, it provides visibility and governance around clean core adherence, helping ensure transformation activities remain within SAP-recommended boundaries.

Fact Sheets are the central information objects used in SAP LeanIX. They document key architectural components such as applications, interfaces, and business capabilities. Each Fact Sheet provides lifecycle details, ownership, dependencies, and relationships to other IT and business elements. This structure enables organizations to maintain a clear and consistent representation of their enterprise architecture. Survey forms, audit logs, or RACI matrices are not core Fact Sheet types.
