ED-Con-101 Training Solutions & ED-Con-101 Valid Study Materials

Regarding the process of globalization, every fighter who seeks a better life needs to keep pace with its tendency to meet challenges. ED-Con-101 certification is a stepping stone for you to stand out from the crowd. The ED-Con-101 exam guide function as a time-counter, and you can set fixed time to fulfill your task, so that promote your efficiency in real test. The key strong-point of our ED-Con-101 Test Guide is that we impart more important knowledge with fewer questions and answers, with those easily understandable ED-Con-101 study brandumps, you will find more interests in them and experience an easy learning process.

Salesforce Certified Education Cloud Consultant Sample Questions (Q209-Q214):

NEW QUESTION # 209

A consultant is making changes to compact layouts in the Education Data Architecture (EDA) and wants those changes to persist when a new release is pushed to the Salesforce environment. Which step should the consultant take to accomplish this?

- A. Assign the Mini Page Layout to all users.
- B. Edit the Mini Page Layout.
- **C. Clone the EDA Compact Layout.**

Answer: C

Explanation:

The consultant should clone the EDA Compact Layout as a step to accomplish making changes to compact layouts in EDA and having those changes persist when a new release is pushed to the Salesforce environment. A compact layout is a layout that shows key fields of a record in a summary view, such as in a list view or a record highlight panel. Cloning the EDA Compact Layout means creating a copy of the default compact layout provided by EDA and making changes to it, such as adding or removing fields. Cloning the EDA Compact Layout can help the consultant accomplish making changes to compact layouts in EDA and having those changes persist when a new release is pushed to the Salesforce environment by ensuring that the custom compact layout will not be overwritten by EDA updates. Editing the Mini Page Layout, assigning the Mini Page Layout to all users, or creating a custom Record Type are not steps that the consultant should take to accomplish making changes to compact layouts in EDA and having those changes persist when a new release is pushed to the Salesforce environment. NEW QUESTION # 210

A large university integrates over one million student Contact records from its Student Information System (SIS) The university has adopted the Education Data Architecture (EDA) Administrative account Records in Salesforce is Integration User.

What should the consultant discuss with the university?

- **A. Ownership data skew**
- B. Account data skew
- C. OAuth token limits
- D. API call limits

Answer: A

Explanation:

Ownership data skew is what the consultant should discuss with the university, because it is a potential performance issue that can occur when a large number of records are owned by a single user. In this case, the Integration User owns over one million Contact records, which can cause slow or failed queries, reports, or list views. The consultant should advise the university to distribute the ownership of the records among multiple users or queues to avoid ownership data skew. API call limits, account data skew, and OAuth token limits are not relevant to this scenario. Reference:

https://help.salesforce.com/s/articleView?id=sf.data_skew_ownership.htm&type=5
<https://developer.salesforce.com/blogs/engineering/2012/04/avoid-account-data-skew-for-peak-performance.html>

NEW QUESTION # 211

Career Services wants to import internship information from a spreadsheet into Salesforce. Student contact and educational information is populated from the Student Information System (SIS) to Salesforce. The spreadsheet has a list of interns, their student ID numbers, their email addresses, company phone numbers, company names, and start and end dates.

Which external ID should the consultant recommend to match spreadsheet information with the Salesforce Contact record?

- **A. Student number**
- B. Company name
- C. Company phone
- D. Email address

Answer: A

Explanation:

The student number is the external ID that the consultant should recommend to match spreadsheet information with the Salesforce Contact record. The external ID is a field that uniquely identifies a record and can be used to match records from different data sources. The student number is a unique identifier for each student that can be used to match the spreadsheet information with the Contact record in Salesforce. The email address, company name, and company phone are not unique identifiers for each student and cannot be used as external IDs. Reference:

https://help.salesforce.com/s/articleView?id=sf.data_loader_match_record.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.customize_externalid.htm&type=5

NEW QUESTION # 212

A primary school has implemented the K-12 Architecture Kit. The school needs to report out basic student demographic information. What should the consultant do to meet this requirement?

- A. Refer to the existing sample student demographic dashboard.
- B. Use the Student Success Hub Tableau Accelerator.
- C. Create a new student demographic dashboard.

Answer: A

Explanation:

The consultant should refer to the existing sample student demographic dashboard to report out basic student demographic information for the primary school that has implemented K-12 Architecture Kit. The sample student demographic dashboard is a dashboard that comes with K-12 Architecture Kit and shows information about students' demographics, such as gender, ethnicity, grade level, or school. The sample student demographic dashboard can help the primary school report out basic student demographic information by using features such as charts, tables, or filters. The consultant can also customize or modify the sample student demographic dashboard to meet the primary school's specific needs or preferences. Creating a new student demographic dashboard, using the Student Success Hub Tableau Accelerator, or creating a custom Report Type are not things that the consultant should do to report out basic student demographic information for the primary school that has implemented K-12 Architecture Kit.

NEW QUESTION # 213

A university is implementing Advisor Link and needs to test the integration with its Student Information System (SIS), and provide training space for advisors. The university needs access to some of the data from the production org for the advisor training.

Which two types of sandboxes meet this use case?

Choose 2 answers

- A. Full Sandbox
- B. Partial Sandbox
- C. Developer Sandbox
- D. Developer Pro Sandbox

Answer: A,B

Explanation:

Full Sandbox and Partial Sandbox are two types of sandboxes that meet this use case for the university that is implementing Advisor Link and needs to test the integration with its SIS, and provide training space for advisors. A sandbox is a copy of a production environment that allows users to develop, test, or train without affecting live data or operations. A Full Sandbox is a type of sandbox that copies all data and metadata from the production environment. A Partial Sandbox is a type of sandbox that copies all metadata and a sample of data from the production environment based on specified criteria. The university can use a Full Sandbox or a Partial Sandbox to test the integration with its SIS, and provide training space for advisors with access to some of the data from the production org. Developer Sandbox and Developer Pro Sandbox are not types of sandboxes that meet this use case for the university that is implementing Advisor Link and needs to test the integration with its SIS, and provide training space for advisors.
