What's more, part of that SureTorrent Data-Architect dumps now are free: <https://drive.google.com/open?id=1kC2x0kZuqmallpgqXlHW7K-641jA0LGi>

Using Data-Architect exam prep is an important step for you to improve your soft power. I hope that you can spend a little time understanding what our study materials have to attract customers compared to other products in the industry. Data-Architect exam dumps have a higher pass rate than products in the same industry. If you want to pass Data-Architect Certification, then it is necessary to choose a product with a high pass rate. Our study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. According to user needs, Data-Architect exam prep provides everything possible to ensure their success.

Salesforce Certified Data Architect is one of the most sought-after credentials in the Salesforce ecosystem. It is a certification that recognizes individuals who have demonstrated their proficiency in designing, building, and maintaining complex data architectures on the Salesforce platform. Salesforce Certified Data Architect certification validates the knowledge and skills required to lead large-scale data integration projects and create scalable, secure, and efficient data structures.

Salesforce Data-Architect certification exam is a comprehensive test that covers a wide range of topics related to data architecture and design. Data-Architect exam consists of 60 multiple-choice questions and is timed for 105 minutes. Data-Architect exam is available in multiple languages, and it is administered by Salesforce Training and Certification. Data-Architect Exam is challenging and requires a thorough understanding of data architecture concepts and Salesforce data model.

To prepare for the Salesforce Data-Architect certification exam, it is essential to have a solid understanding of data architecture and design principles. Candidates should have hands-on experience with Salesforce data modeling and be familiar with the Salesforce platform. Salesforce offers a range of training courses, study materials, and practice exams to help candidates prepare for the certification exam. It is recommended that candidates have at least four years of experience in data architecture and design to ensure they are adequately prepared for the exam.

## Data-Architect Latest Test Cram | Data-Architect Free Practice Exams

The simulation of the actual Salesforce Data-Architect test helps you feel the real Data-Architect exam scenario, so you don't face anxiety while giving the final examination. You can even access your last test results, which help to realize your mistakes and try to avoid them while taking the Salesforce Data-Architect Certification test.

### Salesforce Certified Data Architect Sample Questions (Q237-Q242):

#### NEW QUESTION # 237

Universal Containers (UC) has several custom Visualforce applications have been developed in which users are able to edit Opportunity records. UC struggles with data completeness on their Opportunity records and has decided to make certain fields required that have not been in the past. The newly required fields are dependent on the Stage of the Opportunity, such that certain fields are only required once an Opportunity advances to later stages. There are two fields. What is the simplest approach to handle

this new requirement?

- A. Update these Opportunity field definitions in Setup to be required.
- B. Update the Opportunity page layout to mark these fields as required.
- **C. Use a validation rule for each field that takes the Stage into consideration.**
- D. Write an Apex trigger that checks each field when records are saved.

**Answer: C**

Explanation:

Using a validation rule for each field that takes the Stage into consideration is the simplest approach to handle this new requirement. A validation rule can enforce the field requirements based on the logic and criteria that you define, and display an error message when users try to save a record that does not meet the requirements.

Updating the Opportunity page layout to mark these fields as required will not work because page layouts do not support conditional field requirements. Updating these Opportunity field definitions in Setup to be required will not work because it will apply to all stages and records. Writing an Apex trigger that checks each field when records are saved is not the simplest approach because it requires coding and testing

### NEW QUESTION # 238

A Salesforce customer has plenty of data storage. Sales Reps are complaining that searches are bringing back old records that aren't relevant any longer. Sales Managers need the data for their historical reporting. What strategy should a data architect use to ensure a better user experience for the Sales Reps?

- A. Set data access to Private to hide old data from Sales Reps.
- B. Use Batch Apex to archive old data on a rolling nightly basis.
- C. Create a Permission Set to hide old data from Sales Reps.
- **D. Archive and purge old data from Salesforce on a monthly basis.**

**Answer: D**

Explanation:

Archiving and purging old data from Salesforce on a monthly basis is a good strategy to improve the user experience for the Sales Reps, as it will reduce the clutter and improve the search performance. Creating a permission set or setting data access to private are not effective ways to hide old data from Sales Reps, as they will still consume data storage and affect search results. Using Batch Apex to archive old data on a rolling nightly basis is also not a good option, as it will consume API requests and processing time, and may not comply with the data retention policy.

### NEW QUESTION # 239

To avoid creating duplicate Contacts, a customer frequently uses Data Loader to upsert Contact records into Salesforce. What common error should the data architect be aware of when using upsert?

- A. Errors with using the wrong external Id will cause the load to fail.
- B. Errors when a duplicate Contact name is found cause upsert to fail.
- **C. Errors with duplicate external Id values within the same CSV file.**
- D. Errors with records being updated and inserted in the same CSV file.

**Answer: C**

Explanation:

Data Loader uses external Id fields to match records in the CSV file with records in Salesforce during an upsert operation. If the CSV file contains duplicate external Id values within the same file, Data Loader will throw an error saying "Duplicate Id Specified" and will not process those records. Therefore, it is important to ensure that the CSV file does not have any duplicate external Id values before using Data Loader to upsert records.

### NEW QUESTION # 240

Universal Containers has a large number of Opportunity fields (100) that they want to track field history on. Which two actions should an architect perform in order to meet this requirement? Choose 2 answers

- A. Select the 100 fields in the Opportunity Set History Tracking page.
- B. Create a custom object to store a copy of the record when changed.
- C. Use Analytic Snapshots to store a copy of the record when changed.
- D. Create a custom object to store the previous and new field values.

**Answer: B,D**

Explanation:

Creating a custom object to store a copy of the record when changed and creating a custom object to store the previous and new field values are two possible actions that an architect can perform to meet the requirement of tracking field history on 100 Opportunity fields. A custom object can store more fields and records than the standard field history tracking feature, which has a limit of 20 fields per object and 18 or 24 months of data retention. A custom object can also be used for reporting and analysis of field history data. The other options are not feasible or effective for meeting the requirement

#### NEW QUESTION # 241

DreamHouse Realty has a Salesforce deployment that manages Sales, Support, and Marketing efforts in a multi-system ERP environment. The company recently reached the limits of native reports and dashboards and needs options for providing more analytical insights.

What are two approaches an Architect should recommend? (Choose two.)

- A. Weekly Snapshots
- B. Setup Audit Trails
- C. Einstein Analytics
- D. AppExchange Apps

**Answer: C,D**

#### NEW QUESTION # 242

.....

No matter how busy you are, you must reserve some time to study. As we all know, knowledge is wealth. If you have a strong competitiveness in the society, no one can ignore you. Then here comes the good news that our Data-Architect practice materials are suitable for you. For the advantage of our Data-Architect Exam Questions is high-efficient. No only we can give the latest and most accurate knowledge on the subject, but also we can help you pass the exam and get the Data-Architect certification in the least time.
