But as long as you want to continue to take the Salesforce Certified B2C Commerce Architect exam, we will not stop helping you until you win and pass the certification.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q28-Q33):

### NEW QUESTION # 28

A third party survey provider offers both an API endpoint for individual survey data and an SFTP server endpoint that can accept batch survey data. The initial implementation of the integration includes

1. Marking the order as requiring a survey before order placement
2. On the order confirmation page, the survey form is displayed for the customer to fill
3. The data is sent to the survey provider API, and the order is marked as not requiring a survey. Later it was identified that this solution is not fit for purpose as the following issues and additional requirements were identified:
  1. If the API call fails, the corresponding survey data is lost. The Business requires to avoid data loss.
  2. Some customers skipped the form. The Business requires sending a survey email to such customers.

3. The Order Management System (OMS) uses a non-standard XML parser it did not manage to parse orders with the survey, until the survey attribute was manually removed from the xml.

How should the Architect address the issues and requirements described above?

- A. Create a custom object to store the survey data. Send to the API endpoint using a job. On success, remove the custom object. On failure, send the survey data with API from the next execution of the same job. Use the custom object to send emails for the cases when the survey was skipped.
- B. Send the survey data to the API endpoint in real-time until the survey data is successfully captured. Instruct the OMS development team to update their XML parser, use the Order survey attribute to send emails for the cases when the survey was skipped.
- C. Create a custom session attribute when the survey is required. Send to the API endpoint in real-time. On failure, capture the survey data in the session and reprocess, use me session attribute to send emails for the cases when survey was skipped.
- **D. Create a custom object when the survey is required Send to the API endpoint in real-time. On success, remove the object. On failure, capture the survey data in the custom object and later reprocess with a job. Use the custom object to send emails for the cases when survey was skipped.**

**Answer: D**

#### **NEW QUESTION # 29**

During discovery, the customer required a feature that is not inducted in the standard Storefront Reference Architecture (CSFRA). In order to save budget, the Architect needs to find the quickest way to implement this feature.

What is the primary resource the Architect should use to search for an existing community Implementation of the requested feature?

- A. Salesforce Trailblazer Portal
- **B. Salesforce Commerce Cloud GitHub repository**
- C. Salesforce Commerce Cloud Trailblazer community
- D. Salesforce B2C Commerce Documentation

**Answer: B**

#### **NEW QUESTION # 30**

A client receives multiple feeds from third parties on the same SFTP location:

- \* Product prices (sftp: prod/prices)
- \* Stores information (sftp: prod/stores;
- \* Product information (sftp: prod/catalog)
- \* Categories information (sftp: prod/marketing)
- \* Content (sftp: prod/marketing)

Some of the feeds are placed on sftp multiple times a day, as the information is updated in the source system.

The Architect decides to have only two jobs:

- \* One that checks and downloads available feeds every hour
- \* One that imports the files from Webdav once a day before the data replication, using the standards steps available in the Job Framework

Which design is correct for the import Job, taking the steps scope in consideration?

- A. -Four sibling flows execute steps in parallel: import products, stores, price, content  
-last flow executes steps in sequence: import:categories, reindex
- **B. - four sibling flows execute steps in parallel: import products, stores, prices, content  
- fifth flow executes: import categories  
- last flow executes steps In sequence: reindex**
- C. - four sibling flows execute steps in parallel: import products, stores, prices, content  
- last flow executes steps in sequence import categories, reindex
- D. - three sibling flows Import steps In parallel: import products, stores, prices  
- fourth flow executes: import categories  
- last flow executes steps in sequence: reindex, Import content

**Answer: B**

#### **NEW QUESTION # 31**

In Reports and Dashboards tools you find some requests with a very poor cache hit ratio (less than 20%). What can you do in order to increase cache hit ratio and improve website performance? Here a few examples of triggered URL:

- <https://www.myawesomewebsite.com/products?sz=48&start=0&srule=price-low&campaign=ads1>
- <https://www.myawesomewebsite.com/products?start=0&sz=48&srule=price-low&campaign=ads2>
- <https://www.myawesomewebsite.com/products?srule=price-low&start=0&sz=48&campaign=ads3>

- A. New cache partition
- B. **Always use the same URL parameter order**
- C. Create custom cache for this request.
- D. **Use URL hashes for parameter campaign**

**Answer: B,D**

### NEW QUESTION # 32

An existing B2C Commerce site has the following aliases configuration:

□ Which statement related to this configuration is incorrect?

- A. Site supports multiple hostnames and locales.
- B. Hostname www.example.co.uk will redirect to www.example.com/uk.
- C. Hostname www.example.de will redirect to www.example.com/de.
- D. **Hostname www.example.com will redirect to www.example.com/us**

**Answer: D**

Explanation:

In the provided configuration, the incorrect statement is B. While it appears that the hostname www.example.com should redirect to www.example.com/us based on the "if-site-path": "us" entry, this assumes that the default path or redirect isn't overridden by other configurations within the hostname alias file not visible in the snapshot provided. Typically, in Salesforce B2C Commerce, such a direct statement about redirection should align with explicit mapping rules that include hostname and path directives, which are not detailed for www.example.com to www.example.com/us in the snippet provided. This absence suggests that the statement may be incorrect unless corroborated by additional detailed mappings in the full configuration file.

### NEW QUESTION # 33

.....

There are a lot of sites provide the Salesforce B2C-Commerce-Architect exam certification and other training materials for you. TestPDF is only website which can provide you Salesforce B2C-Commerce-Architect exam certification with high quality.
