Quiz Microsoft - Useful Latest AZ-500 Test Format

The best way for candidates to know our AZ-500 training dumps is downloading our free demo. We provide free PDF demo for each exam. This free demo is a small part of the official complete Microsoft AZ-500 training dumps. The free demo can show you the quality of our exam materials. You can download any time before purchasing. You can tell if our products and service have advantage over others. I believe our Microsoft AZ-500 training dumps will be the highest value with competitive price comparing other providers.

Microsoft Azure Security Technologies Sample Questions (Q347-Q352):

NEW QUESTION # 347

You need to delegate the creation of RG2 and the management of permissions for RG1. Which users can perform each task? To answer select the appropriate options in the answer are

a. NOTE: Each correct selection is worth one point

Answer:

Explanation:

NEW QUESTION # 348

You need to create Role1 to meet the platform protection requirements.

How should you complete the role definition of Role1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

1) Microsoft.Compute/

2) disks

3) /subscription/{subscriptionId}/resourceGroups/{Resource Group Id}

A new custom RBAC role named Role1 must be used to delegate the administration of the managed disks in Resource Group1.

Role1 must be available only for Resource Group1.

NEW QUESTION # 349

You have two Azure virtual machines in the East US2 region as shown in the following table.

You deploy and configure an Azure Key vault.

You need to ensure that you can enable Azure Disk Encryption on VM1 and VM2.

What should you modify on each virtual machine? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

VM1: The Tier

The Tier needs to be upgraded to standard.

Disk Encryption for Windows and Linux IaaS VMs is in General Availability in all Azure public regions and Azure Government regions for Standard VMs and VMs with Azure Premium Storage.

VM2: the operating system

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/generation-2#generation-1-vs-generation-2-capabilities>

NEW QUESTION # 350

You need to meet the identity and access requirements for Group1.

What should you do?

- A. Modify the membership rule of Group1.
- **B. Delete Group1. Create a new group named Group1 that has a membership type of Office 365. Add users and devices to the group.**
- C. Add a membership rule to Group1.
- D. Change the membership type of Group1 to Assigned. Create two groups that have dynamic memberships. Add the new groups to Group1.

Answer: B

Explanation:

Section: [none]

Explanation:

Incorrect Answers:

A, C: You can create a dynamic group for devices or for users, but you can't create a rule that contains both users and devices.

D: For assigned group you can only add individual members.

Scenario:

Litware identifies the following identity and access requirements: All San Francisco users and their devices must be members of Group1.

The tenant currently contain this group:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-dynamic-membership>

<https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/active-directory-groups-create-azure-portal> Testlet 2 Case Study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company hosts its entire server infrastructure in Azure.

Contoso has two Azure subscriptions named Sub1 and Sub2. Both subscriptions are associated to an Azure Active Directory (Azure AD) tenant named contoso.com.

Existing Environment

Azure AD

Contoso.com contains the users shown in the following table.

Contoso.com contains the security groups shown in the following table.

Sub1

Sub1 contains six resource groups named RG1, RG2, RG3, RG4, RG5, and RG6.

User9 creates the virtual networks shown in the following table.

Sub1 contains the locks shown in the following table.

Sub1 contains the Azure policies shown in the following table.

Sub2

Sub2 contains the virtual networks shown in the following table.

Sub2 contains the virtual machines shown in the following table.

All virtual machines have public IP addresses and the Web Server (IIS) role installed. The firewalls for each virtual machine allow ping requests and web requests.

Sub2 contains the network security groups (NSGs) shown in the following table.

NSG1 has the inbound security rules shown in the following table.

NSG2 has the inbound security rules shown in the following table.

NSG3 has the inbound security rules shown in the following table.

NSG4 has the inbound security rules shown in the following table.

NSG1, NSG2, NSG3, and NSG4 have the outbound security rules shown in the following table.

Technical requirements

Contoso identifies the following technical requirements:

- * Deploy Azure Firewall to VNetwork1 in Sub2.
- * Register an application named App2 in contoso.com.
- * Whenever possible, use the principle of least privilege.
- * Enable Azure AD Privileged Identity Management (PIM) for contoso.com.

NEW QUESTION # 351

You have 20 Azure subscriptions and a security group named Group1. The subscriptions are children of the root management group.

Each subscription contains a resource group named RG1.

You need to ensure that for each subscription RG1 meets the following requirements:

The members of Group1 are assigned the Owner role.

The modification of permissions to RG1 is prevented.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
