

New JN0-460 Test Materials, JN0-460 Reliable Dumps Book

P.S. Free & New JN0-460 dumps are available on Google Drive shared by ValidExam <https://drive.google.com/open?id=17ZhckQDzCS115mT9I4U67ymJieidbO9a>

We have accommodating group offering help 24/7. It is our responsibility to aid you through those challenges ahead of you. So instead of focusing on the high quality JN0-460 latest material only, our staff is genial and patient to your questions of our JN0-460 real questions. It is our obligation to offer help for your trust and preference. Besides, you can have an experimental look of demos and get more information of JN0-460 Real Questions. The customer-service staff will be with you all the time to smooth your acquaintance of our JN0-460 latest material.

Once you use our JN0-460 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our JN0-460 learning material, you will have a good result. After years of development practice, our JN0-460 test torrent is absolutely the best. You will embrace a better future if you choose our JN0-460 exam materials.

JN0-460 Reliable Dumps Book, Exam JN0-460 Pass4sure

For exam applicants ValidExam offers real Juniper JN0-460 exam questions. There are three formats of the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) practice material. These formats are PDF, desktop practice exam software, and web-based Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) practice exam. With these questions, you can crack the Juniper JN0-460 certification exam and save your time and money.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q60-Q65):

NEW QUESTION # 60

You have received a Marvis Actions Missing VLAN notification. In this scenario, where is the problem?

- A. A client is missing the VLAN.
- B. The gateway is missing the VLAN.
- C. An access point is missing the VLAN.
- D. A switch is missing the VLAN.

Answer: C

Explanation:

A Marvis Actions Missing VLAN notification indicates that an access point is missing a VLAN configured on other APs within the same site.

Marvis identifies configuration inconsistencies by comparing VLAN assignments across devices.

NEW QUESTION # 61

Whichtwo elementsare required for abrownfield adoption?(Choose two.)

- A. Outbound UDP 1280 access
- B. an imported Configuration Template
- **C. DNS resolution**
- **D. Internet connectivity**

Answer: C,D

Explanation:

Abrownfield adoptionin Mist AI refers to onboarding existing Juniper switches (with existing configurations) into the Mist Cloud for management and monitoring. For the switch to connect successfully, it must be able to reach Mist Cloud services usingDNSandInternet connectivity.

"To onboard existing (brownfield) switches into Mist Cloud, the device must have outbound Internet connectivity and DNS resolution to discover Mist Cloud service endpoints." Option A:Correct- DNS is required for the switch to resolve Mist Cloud URLs.

Option B:Correct- Internet access is required for registration and telemetry exchange.

Option C:Incorrect - templates can be applied later but are not required for adoption.

Option D:Incorrect - Mist uses TCP ports 2200 or 443, not UDP 1280.

NEW QUESTION # 62

A switch is claimed in a Mist organization using theactivation code.

What aretwo possible device statesthat the switch will have in this scenario?(Choose two.)

- A. Inactive
- B. Active
- **C. Connected**
- **D. Unassigned**

Answer: C,D

Explanation:

When a switch is claimed into a Mist organization, it appears in one of several states depending on connectivity and site assignment. "After claiming, switches initially appear asUnassignedif they are not yet linked to a site. Once online and connected to Mist Cloud, they transition toConnectedstatus and begin receiving configurations and telemetry." Option A (Connected):Correct- indicates the switch is online and communicating with Mist Cloud.

Option B (Inactive):Incorrect - not a valid device state in Mist.

Option C (Active):Incorrect - "Active" is not a device state label in Mist.

Option D (Unassigned):Correct- indicates the switch has been claimed but not yet assigned to a site.

NEW QUESTION # 63

Which configuration step is required to create a network in Juniper Mist Wired Assurance?

- A. Enable traffic steering.
- B. Create a unique access policy.
- C. Create a unique port profile.
- D. **Name the VLAN and corresponding VLAN ID.**

Answer: D

Explanation:

According to the Juniper Mist Wired Assurance Configuration Guide, the foundational step for implementing Layer 2 segmentation within the Mist UI is the creation of a "Network". In the context of Mist Wired Assurance, a Network is logically synonymous with a Virtual Local Area Network (VLAN). To define a network, a user must navigate to the Networks section-located within an organization-level template, a site- level configuration, or an individual switch configuration-and click to add a new entry.

The two mandatory parameters for this step are naming the VLAN and providing the corresponding VLAN ID. The name serves as a human-readable alias (such as "Corporate_Data" or "IoT_Devices") that allows administrators to easily reference the segment across different parts of the configuration without constantly tracking numeric IDs. The VLAN ID is the specific numeric value (ranging from 1 to 4094) that will be used by the switch for 802.1Q tagging on the physical wire.

This step is a prerequisite for more advanced configurations. Once a network is created with its name and ID, it can then be selected within a Port Profile. While creating a port profile (Option C) or an access policy (Option D) are common tasks in the deployment workflow, they are dependent on the prior existence of a defined Network. For instance, a Port Profile defines how a port behaves (e.g., access vs. trunk), but it must point to a specific Network name to know which VLAN to assign to that interface. Similarly, site variables can be used to override these VLAN IDs at specific locations, but the base definition requires the initial pairing of a name and a default ID in the portal.

NEW QUESTION # 64

You are deploying a Campus Fabric IP Clos. You want to isolate the Corp subnet from the IoT subnet within the fabric. Which solution will accomplish this?

- A. Create two VRFs and add both networks into each.
- B. Create one VRF and add both networks into it.
- C. Create one VRF and add one network into it.
- D. **Create two VRFs and add one network into each.**

Answer: D

NEW QUESTION # 65

.....

Regular practice can give you the skills and confidence needed to perform well on your JN0-460 exam. By practicing your Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam regularly, you can increase your chances of success and make sure that all of your hard work pays off when it comes time to take the test. We understand that every Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam taker has different preferences. To make sure that our Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) preparation material is accessible to everyone, we made it available in three different formats. You can choose the most suitable and convenient one for you.
