Pass Guaranteed Quiz Valid Oracle - 1z1-076 Exam Vce

P.S. Free & New 1z1-076 dumps are available on Google Drive shared by GuideTorrent: https://drive.google.com/open?id=13G4dJqNCAtXX5qzH1swybE31tJIYOIm0

The GuideTorrent is committed to making the Oracle 1z1-076 exam preparation journey simple, smart, and swift. To meet this objective the GuideTorrent is offering 1z1-076 practice test questions with top-rated features. These features are updated and real 1z1-076 exam questions, availability of Oracle 1z1-076 Exam real questions in three easy-to-use and compatible formats, three months free updated 1z1-076 exam questions download facility, affordable price and 100 percent Oracle Database 19c: Data Guard Administration 1z1-076 exam passing money back guarantee.

Our 1z1-076 prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate 1z1-076 exam torrent to the client and the questions and the answers we provide are based on the real exam. We can promise to you the passing rate is high and about 98%-100%. Our 1z1-076 Test Braindumps also boosts high hit rate and can stimulate the exam to let you have a good preparation for the 1z1-076 exam. Your success is bound with our 1z1-076 exam questions.

>> 1z1-076 Exam Vce <<

Quiz 2026 Professional Oracle 1z1-076 Exam Vce

Our experts have experience of the exam for over ten years. So our 1z1-076 practice materials are their masterpiece full of professional knowledge and sophistication to cope with the 1z1-076 exam. They have sublime devotion to their career just like you,

and make progress ceaselessly. By keeping close eyes on the current changes in this filed, they make new updates of 1z1-076 Study Guide constantly and when there is any new, we will keep you noticed to offer help more carefully.

Oracle Database 19c: Data Guard Administration Sample Questions (Q96-Q101):

NEW QUESTION # 96
Which TWO observations are true about the Far Sync instance?

- A. Includes a standby control file, password file, data files, standby redo logs, and archive logs
- B. Receives redo synchronously from the primary database
- C. Can be created using the RMAN DUPLICATE command
- D. Can only be created using a series of SQL commands
- E. Applies redo received

Answer: B,E

Explanation:
A Far Sync instance is a special kind of Oracle Data Guard configuration that allows synchronous redo transport from a primary database to a remote standby database with minimum impact on the primary database's performance. The Far Sync instance receives redo data synchronously from the primary database (A), then ships it asynchronously to the remote standby database, thus extending zero data loss protection over longer distances and higher network latency environments than would be practical with a synchronous standby alone. The Far Sync instance does not apply the redo data; it just receives and ships it (E). A Far Sync instance does not have data files, and it cannot apply redo to stay synchronized with the primary database.
Reference:
Oracle Database High Availability Overview and Oracle Data Guard Concepts and Administration documentation detail the role and configuration of Far Sync instances, including how they contribute to achieving zero data loss disaster recovery over long distances.

NEW QUESTION # 97
Which THREE are among the various tasks performed by the Data Guard Monitor (DMON) process?

- A. activating role-based services appropriately in the various database instances of the configuration, based on the database role
- B. communicating with the DMON process of the observer to monitor a primary database in case a fast start failover is required
- C. maintaining information about all members of the broker configuration in binary configuration files.
- D. performing role transitions when switchover requests are made
- E. communicating with dkon processes in other database instances that are part of the broker configuration

Answer: A,C,D

Explanation:
The Data Guard Monitor (DMON) process is a key component of Oracle Data Guard. It plays a crucial role in managing and monitoring the state of both the primary and standby databases in a Data Guard configuration.
Performing role transitions when switchover requests are made (A): DMON is responsible for coordinating the switchover process between the primary and standby databases. This involves safely transitioning the roles of the databases to ensure data protection and availability.
Maintaining information about all members of the broker configuration in binary configuration files (B): DMON maintains detailed information about the databases in the Data Guard configuration, including their roles, states, and network addresses. This information is stored in binary configuration files, which are used by the Data Guard Broker to manage the Data Guard environment.
Activating role-based services appropriately in the various database instances of the configuration, based on the database role (C): DMON activates services that are appropriate for the role of each database in the Data Guard configuration. For example, it may activate different services on a primary database than on a standby database, based on the specific requirements of each role.

NEW QUESTION # 98

Which two are true about managing and monitoring Oracle container databases in a Data Guard environment using the broker?

- A. If the primary database is not a container database, then a standby may be a container database.
- B. If the primary database is a container database, then a logical standby may be a non-container database.
- C. All broker actions execute at the root container for container databases.
- D. After a role change, the broker opens all Pluggable databases (pdbb) on the new primary.
- E. If the primary database is a container database, then a physical standby may be a non-container database.

Answer: C,D

Explanation:
In the context of Oracle Data Guard and container databases (CDBs) managed by Data Guard Broker:
All broker actions execute at the root container for container databases (D): When using Data Guard Broker to manage a CDB, the actions performed by the broker are executed at the level of the root container. This is because the root container maintains the control and configuration information that applies to the entire CDB, including all of its pluggable databases (PDBs).
After a role change, the broker opens all Pluggable databases (PDBs) on the new primary (E): Following a role transition such as a switchover or a failover, Data Guard Broker ensures that all PDBs within the CDB of the new primary database are opened, which is essential to resume operations of the PDBs without manual intervention.

NEW QUESTION # 99
Which THREE statements are true........ open in real time query mode, which becomes a new.

- A. Sessions that have long running queries can be retained.
- B. User sessions can be retained.
- C. All sessions are disconnected and all
- D. Sessions that are using database links
- E. User sessions and Current Buffers are maintained by default.
- F. All current buffers can be retained.

Answer: B,C,F

Explanation:
When a physical standby database is opened in real-time query mode, which may be referred to as real-time apply when using Active Data Guard, certain operations can disrupt ongoing sessions. However, with features like Application Continuity and the proper configuration of initialization parameters such as STANDBY_DB_PRESERVE_STATES, user sessions and current buffers may be preserved during role transitions such as a switchover or failover. Specifically, the STANDBY_DB_PRESERVE_STATES parameter can be set to preserve none, all, or only user sessions during such transitions. This ensures that in-flight transactions are not lost and that users do not experience disruptions during the role transitions of a physical standby database.

NEW QUESTION # 100
Which TWO are TRUE about offloading backups to a physical standby database in a Data Guard environment?

- A. The standby database must be registered in an RMAN catalog after the primary database has been registered.
- B. The standby database must be registered in an RMAN catalog before the primary database has been registered.
- C. The standby database can not be registered in an RMAN catalog if the primary database has not been registered.
- D. Backups of the standby control file taken while connected to the catalog where the database is registered, may be used to restore the control file on the primary database.

Answer: A,D

Explanation:
In a Data Guard environment, offloading backups to a physical standby database has certain requirements:

A: Once the primary database is registered in an RMAN catalog, the standby database can also be registered. This allows RMAN to manage backups coherently across both databases and leverage the standby database for backup purposes without interfering with the primary database's workload.

C: Backups of the standby control file taken while connected to the catalog where the database is registered can be used to restore the control file on the primary database. This ensures that backup metadata is consistent across the Data Guard configuration.

Options B and D are incorrect because there is no strict requirement for the order in which the primary and standby databases must be registered in an RMAN catalog. However, it is a common practice to register the primary database first.

NEW QUESTION # 101

......

If you would like to use all kinds of electronic devices to prepare for the 1z1-076 exam, with the online app version of our 1z1-076 study materials, you can just feel free to practice the questions in our 1z1-076 training materials no matter you are using your mobile phone, personal computer, or tablet PC. In addition, another strong point of the online app version is that it is convenient for you to use even though you are in offline environment. In other words, you can prepare for your 1z1-076 Exam with under the guidance of our 1z1-076 training materials anywhere at any time.

Reliable 1z1-076 Test Syllabus: https://www.guidetorrent.com/1z1-076-pdf-free-download.html

If you are a job-seeker or staff, our 1z1-076 certification will help you own an ideal job or get pro motion quickly, Oracle 1z1-076 Exam Vce Do you think it is difficult to pass IT certification exam, By incubating all useful content 1z1-076 practice materials get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency, As a result it can offer the most authentic 1z1-076 valid questions for each candidate and for many years the passing rate has been kept their peak point of 98% to 100%.

The Freemasons has lost million members since the late 1z1-076 s, Your computer might also show an older operating system, such as Windows XP or Windows Vista, as a choice.

If you are a job-seeker or staff, our 1z1-076 Certification will help you own an ideal job or get pro motion quickly, Do you think it is difficult to pass IT certification exam?

1z1-076 latest prep torrent & 1z1-076 sure test guide

By incubating all useful content 1z1-076 practice materials get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency.

As a result it can offer the most authentic 1z1-076 valid questions for each candidate and for many years the passing rate has been kept their peak point of 98% to 100%.

The Oracle 1z1-076 certificate stands out among the numerous certificates because its practicability and role to improve the clients stocks of knowledge and practical ability.
