NEW QUESTION # 108

Which field is optional when creating a new Security Policy rule?

- **A. Description**
- B. Name
- C. Source Zone
- D. Destination Zone
- E. Action

Answer: A

Explanation:

The optional fields are: Description, Tag, Source IP Address and Destination IP Address.

NEW QUESTION # 109

A network engineer has received a report of problems reaching 98.139.183.24 through vr1 on the firewall. The routing table on this firewall is extensive and complex.

Which CLI command will help identify the issue?

- A. show routing route type static destination 98.139.183.24
- **B. test routing fib-lookup ip 98.139.183.24 virtual-router vr1**
- C. show routing interface
- D. test routing fib virtual-router vr1

Answer: B

NEW QUESTION # 110

An engineer is configuring a Protection profile to defend specific endpoints and resources against malicious activity.

The profile is configured to provide granular defense against targeted flood attacks for specific critical systems that are accessed by users from the internet.

Which profile is the engineer configuring?

- **A. DoS Protection**
- B. Packet Buffer Protection
- C. Vulnerability Protection
- D. Zone Protection

Answer: A

Explanation:

Explanation

The engineer is configuring a DoS Protection profile to defend specific endpoints and resources against malicious activity. A DoS Protection profile is a feature that enables the firewall to detect and prevent denial-of-service (DoS) attacks that attempt to overwhelm network resources or disrupt services. A DoS Protection profile can provide granular defense against targeted flood attacks for specific critical systems that are accessed by users from the internet, such as web servers, DNS servers, or VPN

gateways. A DoS Protection profile can be applied to a security policy rule that matches the traffic to and from the protected systems, and can specify the thresholds and actions for different types of flood attacks, such as SYN, UDP, ICMP, or other IP floods¹². NEW QUESTION # 111

An administrator has a PA-820 firewall with an active Threat Prevention subscription. The administrator is considering adding a WildFire subscription.

How does adding the WildFire subscription improve the security posture of the organization?

- A. Protection against unknown malware can be provided in near real-time
- B. After 24 hours WildFire signatures are included in the antivirus update
- C. WildFire and Threat Prevention combine to minimize the attack surface
- D. WildFire and Threat Prevention combine to provide the utmost security posture for the firewall

Answer: B
