EAEP2201 exam covers a wide range of topics related to managing and administering GIS systems, and passing the certification can help professionals advance in their careers and gain access to Esri's online resources and support.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q42-Q47):

### NEW QUESTION # 42

After upgrading ArcGIS Enterprise, an administrator observes that some items, groups, and users are missing in the portal. What should the administrator check first?

- A. Portal for ArcGIS service status
- B. That the ArcGIS Data Stores are validating
- C. Portal for ArcGIS index status

**Answer: C**

Explanation:

After upgrading, it's essential to reindex the portal to ensure that all items, groups, and users are correctly displayed. The administrator should check the Portal for ArcGIS index status to verify if the reindexing process has completed successfully. Incomplete or failed reindexing can result in missing content within the portal.

Reference Source: ArcGIS Enterprise documentation on common problems and solutions after upgrading

### NEW QUESTION # 43

In an existing ArcGIS Enterprise deployment, the ArcGIS Data Interoperability extension must be licensed on one of the federated ArcGIS Server sites. The administrator has received the license file for the extension.

What should the administrator do?

- A. Use the Software Authorization Wizard to apply the license and then restart
- B. Manually add the license to the JSON license file, and then reload it
- C. Use the ArcGIS Server installation program to apply the license

**Answer: A**

Explanation:

To license the ArcGIS Data Interoperability extension on a federated ArcGIS Server site, the administrator must use the Software Authorization Wizard. This is the officially supported and recommended method provided by Esri for authorizing additional extensions to ArcGIS Server.

According to the ArcGIS Enterprise Installation Guide and Esri's administration best practices:

\* The Software Authorization Wizard is the tool used to input license information and authorize software features such as the Data Interoperability extension.

\* This wizard can be launched after installation or from the ArcGIS Server program group at any time.

\* Once the license is applied using the wizard, it is necessary to restart the ArcGIS Server services so that the newly authorized extension is loaded properly.

Option A is incorrect because Esri does not support manually modifying license JSON files. Doing so can corrupt the licensing configuration and is not documented or recommended.

Option C is incorrect because the ArcGIS Server installation program does not apply or manage licenses—it is used solely for installing the core server software.

Therefore, the correct method is to use the Software Authorization Wizard, apply the license file, and restart the ArcGIS Server service to activate the extension.

### NEW QUESTION # 44

A GIS administrator must restore an ArcGIS Enterprise deployment from a backup file previously created by the webgisdr utility. Which utility should the administrator run first?

- A. restoredatastore

- B. webgisdr
- C. restore

**Answer: B**

Explanation:

The webgisdr utility is the official tool used to both back up and restore ArcGIS Enterprise deployments.

When restoring a backup, this tool ensures all components-Portal for ArcGIS, ArcGIS Server (federated), ArcGIS Data Store, and associated configurations-are restored in the correct sequence and with integrity.

The utility reads from a configuration file that defines the backup location, type, and parameters. webgisdr orchestrates the entire restoration process automatically. Running restore datastore (Option B) individually is not required and may only restore part of the deployment, such as the relational store. Restore (Option C) is not a valid utility for ArcGIS Enterprise.

Reference Source: ArcGIS Enterprise documentation - Web GIS Disaster Recovery tool (webgisdr)

#### NEW QUESTION # 45

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Delete users using the Member tab
- B. Use command line utilities
- C. Batch delete users with ArcPy

**Answer: C**

#### NEW QUESTION # 46

A GIS analyst is running raster analysis in the ArcGIS Enterprise portal Map Viewer. The input data is an image layer, but the output of the raster analysis is a feature layer.

Which ArcGIS Server will host the output feature service?

- A. ArcGIS Image Hosting Server site
- B. ArcGIS Hosting Server site
- C. ArcGIS Raster Analytics Server site

**Answer: A**

#### NEW QUESTION # 47
