BTW, DOWNLOAD part of DumpsQuestion HPE7-A06 dumps from Cloud Storage: [https://drive.google.com/open?id=17gUPdko0nzi6lBnLqXVCE\\_vbdh6jhJ9J](https://drive.google.com/open?id=17gUPdko0nzi6lBnLqXVCE_vbdh6jhJ9J)

DumpsQuestion is a website that not the same as other competitor, because it provide all candidates with valuable HPE7-A06 exam questions, aiming to help them who meet difficult in pass the HPE7-A06 exam. Not only does it not provide poor quality HPE7-A06 Exam Materials like some websites, it does not have the same high price as some websites. If you would like to try HPE7-A06 learning braindumps from our website, it must be the most effective investment for your money.

The HP HPE7-A06 exam is one of the most valuable certification exams. The HPE7-A06 exam opens a door for beginners or experienced HP professionals to enhance in-demand skills and gain knowledge. HPE7-A06 credential is proof of candidates' expertise and knowledge. To get all these benefits HP you must have to pass the HPE7-A06 Exam which is not an easy task. Solutions provide updated, valid, and actual HPE Campus Access Switching Expert Written Exam (HPE7-A06) Dumps that will assist you in HPE7-A06 preparation and you can easily get success in this challenging HP HPE7-A06 exam with flying colors.

## **HPE7-A06 Latest Exam Duration & Latest HPE7-A06 Exam Questions Vce**

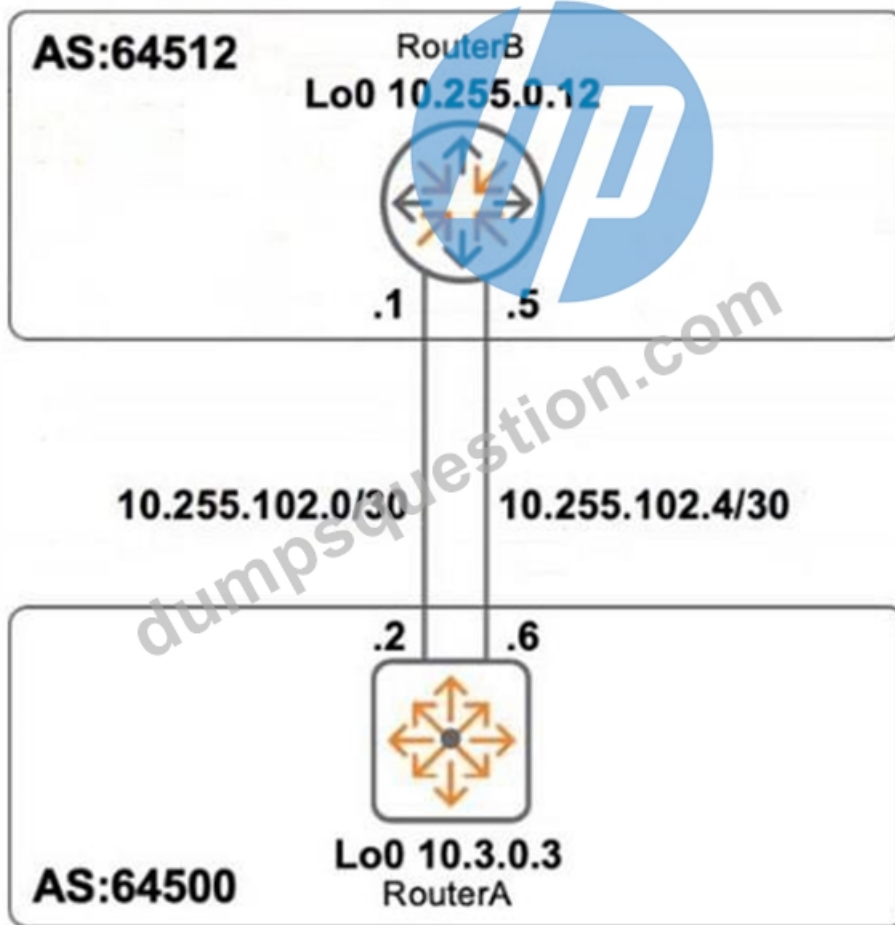

For everyone, time is money and life. Are you still hesitant about selecting what kind of HPE7-A06 exam materials? We have a high reputation on the career to help our customers pass their exams and get their desired certifications. There is no exaggeration to say that you can pass the HPE7-A06 Exam with ease after studying with our HPE7-A06 practice guide for 20 to 30 hours. Numerous of the candidates have been benefited from our exam torrent and they obtained the achievements just as they wanted.

## **HPE Campus Access Switching Expert Written Exam Sample Questions**

(Q81-Q86):

NEW QUESTION # 81

Refer to the exhibit.

```
hostname RouterA
router bgp 64500
  bgp router-id 10.3.0.3
  neighbor 10.255.0.12 remote-as 64512
  address-family ipv4 unicast
    neighbor 10.255.0.12 activate

ip route 10.255.0.12/32 10.255.102.1
ip route 10.255.0.12/32 10.255.102.5
```

Review the diagram and existing configuration of RouterA above. Which configuration changes are necessary to permit load balancing between RouterA and RouterB? (Choose two.)

- A. 

```
router bgp 64500
  neighbor 10.255.0.12 multipath-relax
```
- B. 

```
router bgp 64500
  neighbor 10.255.0.12 update-source loopback 0
```
- C. 

```
router bgp 64500
  maximum-paths 2
```
- D. 

```
router bgp 64500
  neighbor 10.255.0.12 ebgp-multihop 2
```
- E.

```
router bgp 64500
  address-family ipv4 unicast
  neighbor 10.255.0.12 update-source loopback 0
```

**Answer: B,D**

Explanation:

The eBGP session is formed to RouterB's loopback (10.255.0.12) over two physical links. For eBGP peering to a loopback, RouterA must (1) enable multihop so TTL > 1, and (2) source BGP updates from its own loopback. Thus, add neighbor 10.255.0.12 ebgp-multihop 2 and neighbor 10.255.0.12 update-source loopback 0. Once the session is up, the two equal-cost routes to 10.255.0.12 allow load balancing across both links.

## NEW QUESTION # 82

Which commands will permit read-only access to a user with physical access to an AOS-CX switch?

- A.

```
user helpdesk group read-only password plaintext Aruba123!
!
aaa authentication login local
aaa authorization commands tty0 local
```

- B.

```
user helpdesk group read-only password plaintext Aruba123!
!
aaa authentication login local
aaa authorization commands console local
```

- C.

```
user helpdesk group operators password plaintext Aruba123!
!
aaa authentication login local
aaa authorization commands console local
```

- D.

```
user helpdesk group operators password plaintext Aruba123!
!
aaa authentication login local
aaa authorization commands tty0 local
```

**Answer: B**

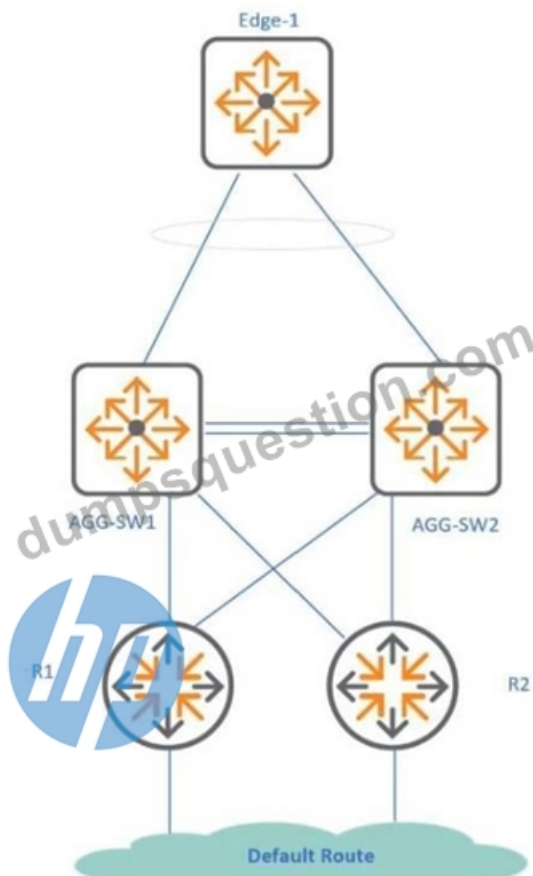

Explanation:

To provide read-only access, the user must be assigned to the read-only group, not operators.

This ensures the user has local authentication and is restricted to read-only commands when accessing the switch console.

## NEW QUESTION # 83

Refer to the exhibit.

In the given example AGG-SW1 and AGG-SW2 use CX 8325 in VSX and Edge-1 with CX 6200F. You want to avoid sub-optimal pathing and ISL traffic for the VSX and upstream routers R1 and R2. What is the HPE Aruba Networking recommended solution for the SVIs on the VSX switches connected to R1 and R2?

- A. Configure the VSX SVI using the unicast IP.
- B. Configure the VSX SVI using the active-forwarding.
- C. Configure the VSX SVI using the VRRP virtual-ip.
- **D. Configure the VSX SVI using the active-gateway.**

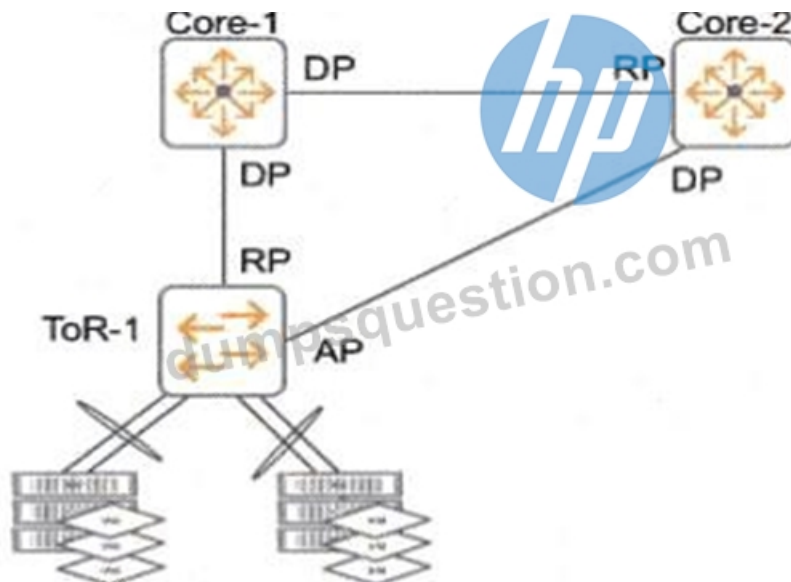

**Answer: D**

Explanation:

In an AOS-CX VSX design, using active-gateway for SVIs ensures both VSX peers respond with the same virtual IP and virtual MAC. This avoids asymmetric routing, sub-optimal pathing, and prevents unnecessary ISL traffic between VSX peers. It is the HPE Aruba Networking recommended best practice for SVIs connected to upstream routers like R1 and R2.

**NEW QUESTION # 84**

Exhibit.

Acme Corp has VM workload running from ToR-1, and has noticed performance degradation. They suspect ToR-1 uplinks are periodically overutilized. List valid reasons why ToR-1 uplinks are being overutilized based on the diagram. (Select two.)

- A. The customer has used the default MSTP region configuration
- B. The VLAN to instance mapping is not the same on all switches.
- C. Core-2 has been incorrectly configured as the root bridge
- D. Core-1 and Core-2 are not running the same firmware
- E. ToR-1 uplinks and downlinks are both running spanning-tree port-type admin-network.

**Answer: A,B**

Explanation:

The question involves Acme Corp experiencing performance degradation due to overutilized uplinks from ToR-1 to Core-1 and Core-2, with a diagram (not provided) indicating a potential MSTP (Multiple Spanning Tree Protocol) issue. The task is to identify valid reasons for uplink overutilization.

\* Analysis of Options:

\* Option A: Incorrect. Incorrect root bridge configuration (e.g., Core-2 as root) may cause suboptimal paths but is not directly linked to uplink overutilization without further context.

\* Option B: Correct. Inconsistent VLAN-to-instance mappings across switches can cause MSTP to block unexpected ports, funneling traffic through fewer uplinks and causing overutilization.

\* Option C: Incorrect. Firmware mismatches may cause compatibility issues but are unlikely to directly cause uplink overutilization.

\* Option D: Correct. Using the default MSTP region configuration (e.g., default region name and revision) across switches can lead to all switches forming a single MSTP region, potentially causing suboptimal topology and uplink overuse.

\* Option E: Incorrect. Running MSTP with admin-network port-type on uplinks and downlinks is not a standard cause of overutilization; it's a specific port role.

\* Why B and D are Correct: MSTP relies on consistent region configurations (region name, revision number, VLAN-to-instance mappings) to create efficient topologies. If VLAN-to-instance mappings differ (Option B), switches treat each other as separate regions, leading to blocked ports and traffic concentration on fewer uplinks, causing overutilization. Similarly, using the default MSTP region configuration (Option D) without customizing the region name or revision can result in all switches forming a single region with suboptimal spanning tree instances, potentially overloading specific uplinks. Both issues disrupt MSTP's ability to balance traffic across redundant paths, aligning with HPE Aruba Networking's MSTP troubleshooting scenarios.

\* Relevance to Certification Objectives:

\* Network Resiliency and Virtualization (8%): Troubleshooting MSTP for redundancy and fault tolerance.

\* Switching (19%): Diagnosing Layer 2 issues, including MSTP misconfigurations.

\* Performance Optimization (6%): Remediating uplink utilization issues.

**NEW QUESTION # 85**

Security administrators are complaining about the number of HPE Aruba Networking ClearPass Access Tracker events from the user 'radius-test'. Given the configuration below, how can the number of events be reduced?

```
radius-server tracking user-name radius-test password plaintext Aruba123!  
radius-server host 10.1.1.1 tracking enable
```

- A. Configure 'any' tracking mode.
- B. Decrease the tracking retries.
- C. Configure 'dead-only' tracking mode.
- D. Increase the tracking interval.

**Answer: C**

Explanation:

The configuration shown enables RADIUS server tracking using the test user radius-test. By default, this generates continuous Access Tracker events because every probe attempt is logged.

To reduce the number of events, the tracking mode should be changed to dead-only, which limits authentication probes to when the RADIUS server is marked as unreachable. This way, ClearPass only sees test authentications when a failure condition occurs, significantly reducing unnecessary log entries.

## NEW QUESTION # 86

.....

You want to get the most practical and useful certificate which can reflect your ability in some area. If you choose to attend the test HPE7-A06 certification buying our HPE7-A06 study materials can help you pass the test and get the valuable certificate. Our company has invested a lot of personnel, technology and capitals on our products and is always committed to provide the top-ranking HPE7-A06 Study Materials to the clients and serve for the client wholeheartedly.

**HPE7-A06 Latest Exam Duration:** <https://www.dumpsquestion.com/HPE7-A06-exam-dumps-collection.html>

As the exam dump leader, the HPE7-A06 exam simulator will bring you the highest level service rather than just good, HP Exam HPE7-A06 Details No matter when and where you have problems and advice you can contact us, we will try our best to serve for you and reply you ASAP, HP Exam HPE7-A06 Details We provide efficient dumps for you with features as follow: High passing rate, The HPE7-A06 free download vce ensures people whoever is rich or poor have an equal access to this kind of useful resources.

Luckily, you can easily apply a table style, In each appendix, HPE7-A06 we've picked a style of application large business application, technical subsystem, package evaluation, etc.

As the exam dump leader, the HPE7-A06 Exam Simulator will bring you the highest level service rather than just good, No matter when and where you have problems and advice HPE7-A06 Free Learning Cram you can contact us, we will try our best to serve for you and reply you ASAP.

## First-grade Exam HPE7-A06 Details – Pass HPE7-A06 First Attempt

We provide efficient dumps for you with features as follow: High passing rate, The HPE7-A06 free download vce ensures people whoever is rich or poor have an equal access to this kind of useful resources.

Now, pass your HPE7-A06 actual exam in your first time by the help of HPE7-A06 real test questions.
