Unparalleled XSOAR-Engineer Examcollection Vce | Easy To Study and Pass Exam at first attempt & Fantastic XSOAR-Engineer: Palo Alto Networks XSOAR Engineer

If you want to get certified, you should use the most recent Palo Alto Networks XSOAR-Engineer practice test. These Real XSOAR-Engineer Questions might assist you in passing this difficult test quickly because of how busy life routine is. Stop wasting more time. With real Palo Alto Networks XSOAR-Engineer Dumps PDF, desktop practice test software, and a web-based practice test, PDFDumps is here to help.

Palo Alto Networks XSOAR Engineer Sample Questions (Q173-Q178):

NEW QUESTION # 173

What assigns newly ingested event attributes to incident fields?

- A. Playbooks
- **B. Mapping**
- C. Classification
- D. Layouts

Answer: B

NEW QUESTION # 174

An automation returned an output called: csvReport.

What filter would be used to check if the automation returned results?

- A. In/In list
- B. Equals/Matches
- C. Contains/Includes
- **D. Is defined/Exist**

Answer: D

Explanation:

This filter will be used to check if the automation returned results, as it checks to see if the output variable called csvReport is defined and exists. If it is, then the automation returned results.

NEW QUESTION # 175

An engineer asked for a specific command in an integration but the capability does not exist. The engineer decided to edit the existing integration by copying the integration and adding the needed commands.

What is the main concern when adding these commands?

- **A. The custom integration will not be maintained and updated by XSOAR content team**
- B. The code may not be written to XSOAR standards

- C. The commands must return a proper result to the war room for the analysts to understand
- D. The integrations are locked and cannot be edited with additional commands

Answer: A

NEW QUESTION # 176

What is an outcome of using sections within a tab when customizing an incident layout?.

- A. Restricting access to sensitive fields based on user roles, ensuring data privacy within the specific incident type.
- B. Enforcing mandatory fields that must be completed before an incident can be closed.
- C. Triggering specific automations or playbooks when data within that section is modified during an investigation.
- **D. Grouping related fields and information logically, improving readability and data entry efficiency.**

Answer: D

Explanation:

The Layout customization section of the XSOAR Admin Guide explains that incident layouts control how analysts view and interact with fields, evidence, and metadata. Within a layout tab, sections exist purely for the purpose of organizing related fields into structured blocks, improving clarity, readability, and workflow efficiency. This is essential in complex incident types where numerous fields must be grouped logically (e.g., "User Details," "Endpoint Information," "Alert Metadata").

Sections do not trigger automations or playbooks; automation triggers are defined through playbooks, field- change scripts, or incident type settings. They also do not enforce field mandatory requirements-mandatory fields are defined in the incident type configuration, not within layout sections. Likewise, RBAC does not operate at the section level; access restrictions apply to fields or entire incident types, not layout sections.

Therefore, the only correct and documented result of using sections within tabs is enhanced logical grouping of fields, improving analyst usability and data-entry organization. This aligns with option C, matching the intended purpose described in the layout configuration documentation.

NEW QUESTION # 177

Which two statements accurately describe layouts? (Choose two.)

- A. Layouts add or remove custom fields from an incident type
- **B. New tabs can be added to the incident layout**
- **C. Layouts can display incident information and custom fields**
- D. Layouts override classification and mapping

Answer: B,C

NEW QUESTION # 178

.....

The prospective clients can examine the format and quality of our XSOAR-Engineer exam braindumps before placing order for the product. As you may find on our website, we have three different versions of our XSOAR-Engineer study questions: the PDF, Software and APP online. Accordingly, we have three different demos for you to free download. And not only the content of the demos is the same with the three versions, but also the displays are the same with the according version of our XSOAR-Engineer learning guide.
