## Cisco 350-401 Test Questions Fee - 350-401 Latest Exam

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the 350-401 appearances, or in other words, candidates' educational background and relating 350-401 professional skills. They develop the 350-401 exam guide targeted to real exam. The wide coverage of important knowledge points in our 350-401 latest braindumps would be greatly helpful for you to pass the exam.

## Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q135-Q140):

### NEW QUESTION # 135

Which unit is used to express the signal-to-noise ratio?

- A. dbm
- B. amp
- C. db
- D. mW

**Answer: C**

Explanation:

Signal-to-noise ratio (SNR or S/N) is the ratio of signal power to the noise power, and its unit of expression is typically decibels (dB).

#### NEW QUESTION # 136

Where is radio resource management performed in a cisco SD-access wireless solution?

- A. DNA Center
- **B. wireless controller**
- C. Cisco CMX
- D. control plane node

**Answer: B**

Explanation:

Fabric wireless controllers manage and control the fabric-mode APs using the same general model as the traditional local-mode controllers which offers the same operational advantages such as mobility control and radio resource management. A significant difference is that client traffic from wireless endpoints is not tunneled from the APs to the wireless controller. Instead, communication from wireless clients is encapsulated in VXLAN by the fabric APs which build a tunnel to their first-hop fabric edge node. Wireless traffic is tunneled to the edge nodes as the edge nodes provide fabric services such as the Layer 3 Anycast Gateway, policy, and traffic enforcement. <https://www.cisco.com/c/en/us/td/docs/solutions/CVD/Campus/cisco-sda-design-guide.html>

#### NEW QUESTION # 137

Simulation 01

BGP connectivity exists between Headquarters and both remote sites; however, Remote Site 1 cannot communicate with Remote Site 2. Configure BGP according to the topology to goals:

1. Configure R1 and R3 under the BGP process to provide reachability between Remote Site 1 and Remote Site 2. No configuration changes are permitted on R2.
2. Ensure that the /32 networks at Remote Site 1 and Remote Site 2 can ping each other.

```
R1
R2
R3
```

**Answer:**

Explanation:

See the solution below in Explanation:

Explanation:

-

Solution:

On R1:

```
R1(config)#router bgp 123
```

```
R1(config-router)#address-family ipv4
```

```
R1(config-router-af)#neighbor 10.0.0.2 allowas-in
```

On R3:

```
R3(config)#router bgp 123
```

```
R3(config-router)# address-family ipv4
```

```
R3(config-router-af)#neighbor 192.168.1.2 allowas-in
```

VERIFICATION:

```
R3#sh ip route bgp
```

Gateway of last resort is not set

1.0.0.0/32 is subnetted, 1 subnets

B 1.1.1.1 [20/0] via 192.168.1.2, 00:01:17

2.0.0.0/32 is subnetted, 1 subnets

B 2.2.2.2 [20/0] via 192.168.1.2, 00:05:06

10.0.0.0/24 is subnetted, 1 subnets  
 B 10.0.0.0 [20/0] via 192.168.1.2, 00:01:17  
 Test Ping from R3 to R1:  
 R3#ping 1.1.1.1  
 Type escape sequence to abort.  
 Sending 5, 100-byte ICMP Echos to 1.1.1.1, timeout is 2 seconds:  
 !!!!!  
 R3#ping 1.1.1.1 source lo0  
 Type escape sequence to abort.  
 Sending 5, 100-byte ICMP Echos to 1.1.1.1, timeout is 2 seconds:  
 Packet sent with a source address of 3.3.3.3  
 !!!!!  
 Success rate is 100 percent (5/5), round-trip min/avg/max = 1/1/1 ms

#### NEW QUESTION # 138

Which HTTP code must be returned to prevent the script from exiting?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

#### NEW QUESTION # 139

Which network devices secure API platform?

- A. web application firewalls
- B. next-generation intrusion detection systems
- C. content switches
- D. Layer 3 transit network devices

**Answer: C**

Explanation:

Reference: <https://www.cisco.com/c/en/us/products/collateral/security/advanced-waf-bot-aag.pdf> > Cisco Secure Web Application Firewall (WAF) and bot protection defends your > online presence and ensures that website, mobile applications, and APIs > are secure, protected, and "always on."

> Cisco Secure Web Application Firewall (WAF) and bot protection defends your  
 > online presence and ensures that website, mobile applications, and APIs

Reference: <https://www.cisco.com/c/en/us/products/collateral/security/advanced-waf-bot-aag.pdf> > Cisco Secure Web Application Firewall (WAF) and bot protection defends your > online presence and ensures that website, mobile applications, and APIs > are secure, protected, and "always on."

#### NEW QUESTION # 140

.....

Our 350-401 exam questions have been designed by the experts after an in-depth analysis of the exam and the study interest and hobbies of the candidates. You avail our 350-401 study guide in three formats, which can easily be accessed on all digital devices without any downloading any additional software. And they are also auto installed. It is very fast and convenient. Our 350-401 learning material carries the actual and potential exam questions, which you can expect in the actual exam.
