Salesforce Certified Industries CPQ Developer Sample Questions (Q312-Q317):

NEW QUESTION # 312

To assign a price to a product, you must:

Note: This question displayed answer options in random order when taking this Test.

- A. Create a price list entry
- B. Always create a bundle
- C. Only use a virtual price
- D. Create a parent/child price list

Answer: A

Explanation:

To assign a price to a product in Salesforce Industries CPQ, you must create a price list entry. A price list entry directly associates a specific price with a product and can include details such as currency, discounts, or specific pricing conditions. This is an essential step in setting up products in CPQ because it ensures that each product has a definable, manageable price that can be used in quotes and calculations within the CPQ system.

NEW QUESTION # 313

Lengthy on-boarding for new hires is a business challenge historically faced by telecommunications companies.

- A. True
- B. False

Answer: A

Explanation:

* A. True: Historically, telecommunications companies have faced the challenge of lengthy onboarding processes for new hires due to the complex nature of the industry and the detailed knowledge required.

This includes understanding diverse service offerings, regulatory requirements, and sophisticated technology platforms.

NEW QUESTION # 314

What are three appropriate use cases for a promotion? Choose 3 answers

- A. The product should have a cancellation penalty.
- B. The product should only be available to B2C customers.
- C. The product needs to be sold Quickly.
- D. Special pricing should only be available for a limited time.
- E. The product's price should change based on the customer type.

Answer: B,D,E

Explanation:

Promotions in Salesforce Industries CPQ are typically used to apply special pricing rules or sales conditions that enhance the sales strategy. Appropriate use cases for promotions include: B. The product's price should change based on the customer type: Promotions can be used to apply different pricing structures based on the category or type of customer, making them ideal for targeting specific customer segments with tailored pricing. C. The product should only be available to B2C customers: This allows for promotions that are exclusively available to business-to-consumer interactions, targeting specific market segments directly. E. Special pricing should only be available for a limited time: Time-limited promotions are common and can be used to drive sales within a specified period, such as during a sale event or seasonal promotion.

These use cases leverage the flexibility of promotions to target specific customer bases, adjust pricing dynamically, and drive sales strategies based on temporal factors.

NEW QUESTION # 315

Which three ways can a developer filter the list of products when using the getCartproducts method?

Choose 3 answers

Using a value that is contained within a product attribute

- A. Using a product category
- B. Using a value that is contained within a Product2 field
- C. Using a value that will be matched exactly to a value in a Product field
- D. Using a context rule that qualifies a set of products

Answer: A,B,C

Explanation:

When using the getCartProducts method in Salesforce Industries CPQ to filter the list of products, developers have multiple criteria they can apply: A. Using a value that is contained within a Product2 field:

This allows filtering based on specific Salesforce fields within the Product2 object, such as name, SKU, or custom fields that store product attributes. B. Using a value that will be matched exactly to a value in a Product field: Enables precise filtering based on exact matches in product fields, ensuring that only products that meet the exact criteria are included. D. Using a product category: This method allows for filtering based on the category assigned to products, making it easier to group and display products that fall into specific, predefined categories, such as electronics, apparel, etc.

These filters help in efficiently narrowing down product lists based on specific attributes or classifications, enhancing the user experience by displaying relevant products to the customers.

NEW QUESTION # 316

Which two responses are parts of a pricing element?

Choose 2 answers

- A. The charge (amount)
- B. The currency code
- C. The pricing calculation
- D. The price category

Answer: A,D

Explanation:

* B. The price category

* D. The charge (amount): Parts of a pricing element in Salesforce Industries CPQ include the 'price category', which classifies the type of pricing or charge being applied (like base price, discount, surcharge), and the 'charge' itself, which is the specific amount of money associated with the pricing action. These components are critical for defining and applying pricing logic in the system.

NEW QUESTION # 317

.....
