完璧なNSE5_FNC_AD-7.6英語版 &認定試験のリーダー &コンプリートNSE5_FNC_AD-7.6試験概要

NSE5_FNC_AD-7.6の調査の質問は高品質です。したがって、テストの準備をするためのすべての効果的かつ中心的なプラクティスがあります。専門的な能力を備えているため、NSE5_FNC_AD-7.6試験問題を編集するために必要なテストポイントに合わせることができます。あなたの難しさを解決するために、試験の中心を指し示します。したがって、高品質の資料を使用すると、試験に効果的に合格し、安心して目標を達成できます。NSE5_FNC_AD-7.6テストガイドのフィードバックを使用すると、98%～100%の合格率が得られます。それがお客様からの真実です。また、20時間から30時間の練習を経てNSE5_FNC_AD-7.6試験に合格するのは簡単です。

Fortinet NSE5_FNC_AD-7.6 Exam Syllabus Topics:

Section	Objectives
Monitoring, Reporting, and Troubleshooting	- Troubleshooting and diagnostics - Reporting and logging - Monitoring and event management
Integration with Fortinet Products	- Integration with FortiGate and other Fortinet products - Third-party device integration
Policy Enforcement and Network Segmentation	- Network segmentation and VLAN assignment - Policy configuration and enforcement
Authentication and Access Control	- User and device authentication methods - Authentication protocols (802.1X, RADIUS, etc.)

Device Discovery and Profiling	- Endpoint profiling and classification - Device discovery methods
FortiNAC Architecture and Concepts	- FortiNAC architecture and components - Deployment models and configurations

NSE5_FNC_AD-7.6試験概要、NSE5_FNC_AD-7.6 PDF

Fortinet製品を購入する前に、無料でダウンロードして試用できるため、NSE5_FNC_AD-7.6テスト準備を十分に理解できます。このように、クライアントは、ウェブサイト上で私たちのFortinet NSE 5 - FortiNAC-F 7.6 Administrator試験問題のページを訪問することができます。 したがって、クライアントはNSE5_FNC_AD-7.6試験問題をよく理解し、NSE5_FNC_AD-7.6試験問題の品質を確認したので、NSE5_FNC_AD-7.6トレーニングガイドを購入するかどうかを決定できます。 Xhs1991お客様に最高のNSE5_FNC_AD-7.6学習ガイドを提供し、お客様に満足していただけるようにします。

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator 認定 NSE5_FNC_AD-7.6 試験問題 (Q43-Q48):

質問 # 43
As part of a company policy, all end stations must be scanned for compliance each day. The security administrators want to satisfy this requirement without any necessary interaction from the end user. Which two agents can provide that functionality? (Choose two.)

- A. Passive
- B. Persistent
- C. Dissolvable
- D. Mobile

正解：A、B

解説：
The persistent agent remains installed on the endpoint and can perform scheduled compliance scans automatically without user interaction. The passive agent collects endpoint information without requiring installation or user action, enabling ongoing compliance evaluation transparently.

質問 # 44
A network administrator is troubleshooting a network access issue for a specific host. The administrator suspects the host is being assigned a different network access policy than expected.
Where would the administrator look to identify which network access policy, if any, is being applied to a particular host?

- A. The Policy Details view for the host
- B. The Connections view
- C. The Policy Logs view
- D. The Port Properties view of the hosts port

正解：A

解説：
When troubleshooting network access in FortiNAC-F, it is often necessary to verify exactly why a host has been granted a specific level of access. Since FortiNAC-F evaluates policies from the top down and assigns access based on the first match, an administrator needs a clear way to see the results of this evaluation for a specific live endpoint.
The Policy Details (C) view is the designated tool for this purpose. By navigating to the Hosts > Hosts (or Adapter View) in the Administration UI, an administrator can search for the specific MAC address or IP of the host in question. Right-clicking on the host record reveals a context menu from which Policy Details can be selected. This view provides a real-time "look" into the policy engine's decision for that specific host, showing the Network Access Policy that was matched, the User/Host Profile that triggered the match, and the resulting Network Access Configuration (VLAN/ACL) currently applied.

質問 # 45
A user was attempting to register their host through the registration captive portal. After successfully registering, the host remained in the registration VLAN. Which two conditions would cause this behavior? (Choose two.)

- A. There is another unregistered host on the same port
- B. There is no agent installed on the host.
- C. The wrong agent s installed.
- D. The port default VLAN is the same as the Registration VLAN.

正解：A、D

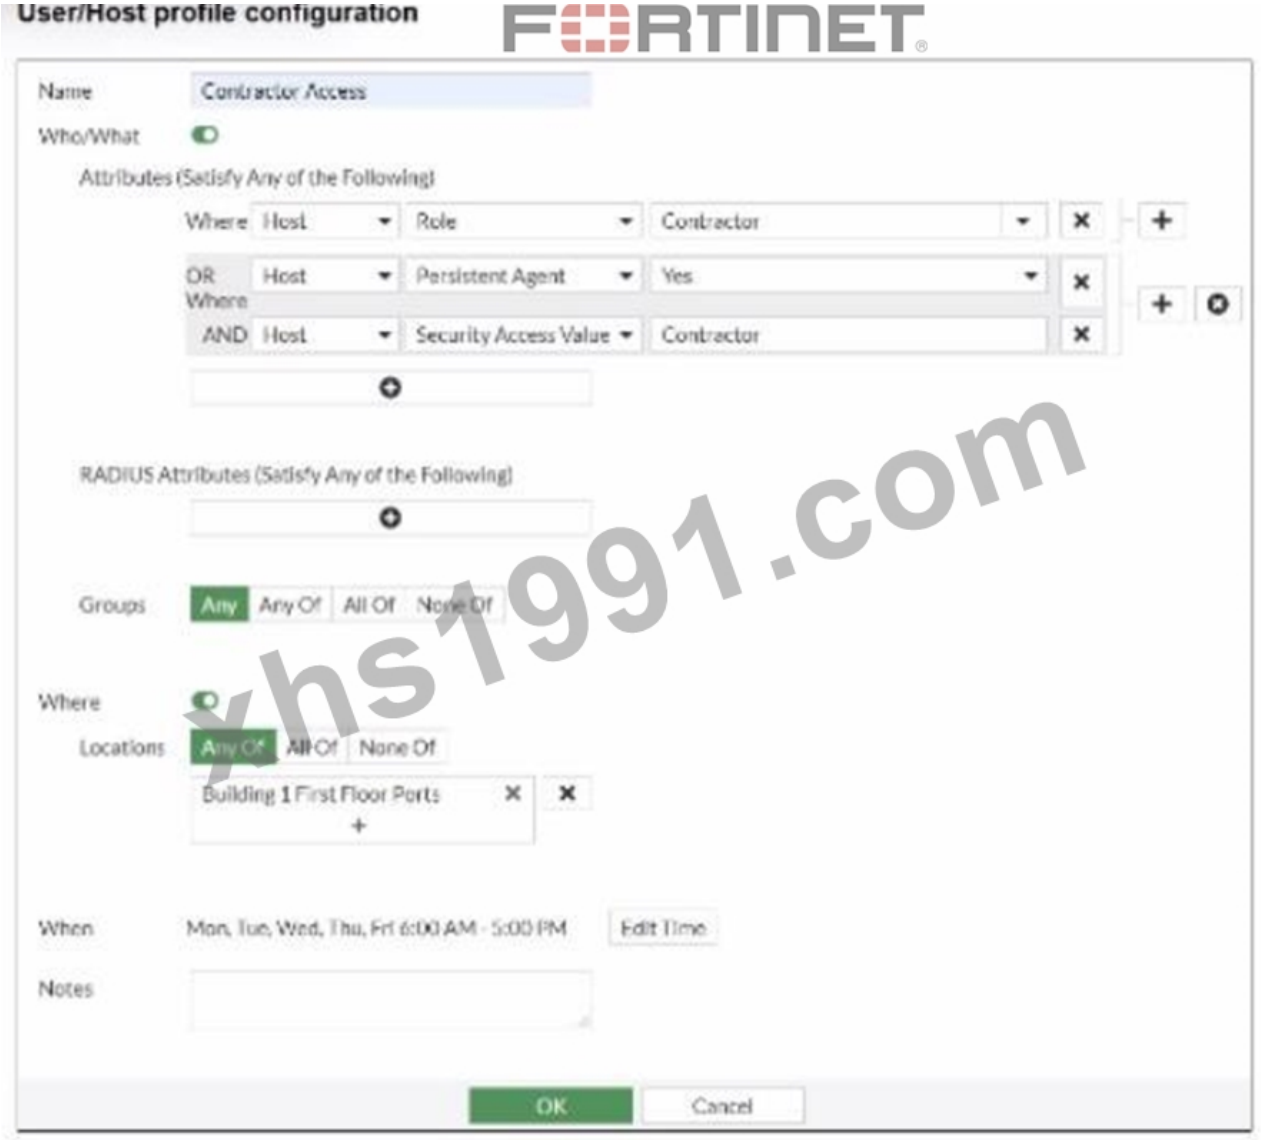
質問 # 46
An administrator wants to build a security rule that will quarantine contractors who attempt to access specific websites.
In addition to a user host profile, which two components must the administrator configure to create the security rule? (Choose two.)

- A. Security String
- B. Action
- C. Methods
- D. Endpoint compliance policy
- E. Trigger

正解：B、E

解説：
A security rule requires a trigger to detect the condition, such as contractors accessing specific websites based on security or traffic events. It also requires an action to define the response, such as quarantining the contractor when the trigger condition is met.

質問 # 47
Refer to the exhibit. If a host is connected to a port in the Building 1 First Floor Ports group, what must also be true to match this user/host profile?



- A. The host must have a role value of contractor or an installed persistent agent or a security access value of contractor, and be connected between 6 AM and 5 PM.
- B. The host must have a role value of contractor, an installed persistent agent or a security access value of contractor, and be connected between 6 AM and 5 PM.
- C. The host must have a role value of contractor or an installed persistent agent, a security access value of contractor, and be connected between 9 AM and 5 PM.
- D. The host must have a role value of contractor or an installed persistent agent and a security access value of contractor, and be connected between 6 AM and 5 PM.

正解：D

解説：
The User/Host Profile in FortiNAC-F is the fundamental logic engine used to categorize endpoints for policy assignment. As seen in the exhibit, the configuration uses a combination of Boolean logic operators (OR and AND) to define the "Who/What" attributes. According to the FortiNAC-F Administrator Guide, attributes grouped together within the same bracket or connected by an OR operator require only one of those conditions to be met. In the exhibit, the first two attributes are "Host Role = Contractor" OR "Host Persistent Agent = Yes".
This forms a single logical block. This block is then joined to the third attribute ("Host Security Access Value = Contractor") by an AND operator. Consequently, a host must satisfy at least one of the first two conditions AND satisfy the third condition to match the "Who/What" section.
Furthermore, the profile includes Location and When (time) constraints. The exhibit shows the location is restricted to the "Building 1 First Floor Ports" group. The "When" schedule is explicitly set to Mon-Fri 6:00 AM - 5:00 PM. For a profile to match, all enabled sections (Who/What, Locations, and When) must be satisfied simultaneously. Therefore, the host must meet the conditional contractor/agent criteria, possess the specific security access value, and connect during the defined 6 AM to 5 PM window.

"User/Host Profiles use a combination of attributes to identify a match. Attributes joined by OR require any one to be true, while attributes joined by AND must all be true. If a Schedule (When) is applied, the host must also connect within the specified timeframe for the profile to be considered a match. All criteria in the Who/What, Where, and When sections are cumulative."

質問 # 48
