## ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q24-Q29):

### NEW QUESTION # 24

The Project management application supports two types of external dependencies. What are they?

Choose 2 answers

- A. Change Dependency.
- B. Task Dependency.
- C. Milestone Dependency.
- **D. Soft Dependency.**
- **E. Hard Dependency.**

**Answer: D,E**

Explanation:

Explanation

The Project Management application supports two types of external dependencies: hard dependency and soft dependency. A hard dependency is a dependency that must be met before a task can start or finish. A soft dependency is a dependency that is preferred but not mandatory for a task to start or finish. You can find more information about these dependency types in the Product Documentation for ServiceNow.

### NEW QUESTION # 25

Can an `it_project_manager` convert a task to a milestone?

- A. No, the PPS admin role is also required.
- B. No, this can only be done by a system admin.
- **C. Yes, by right-clicking on the task in the Planning Console.**
- D. Yes, if the task is assigned to the project manager.

**Answer: C**

Explanation:

Explanation

According to the Planning Console document, an `it_project_manager` can convert a task to a milestone by right-clicking on the task in the Planning Console and selecting Convert to Milestone. The other options are not correct, as they are not the ways to convert a task to a milestone. A system admin or a PPS admin role is not required for this action. The task assignment is not relevant for this action.

### NEW QUESTION # 26

The combination of the user and the assigned portfolio must be unique when adding a user to which registry?

- A. UX Page Registry.
- B. Application Registry.

- C. Stakeholder Registry.
- D. Event Registry.

**Answer: C**

Explanation:

According to the Stakeholder Registry document, the combination of the user and the assigned portfolio must be unique when adding a user to the stakeholder registry. The stakeholder registry is a table that stores information about the stakeholders of a portfolio. The other options are not correct, as they are not registries that require a unique combination of user and portfolio. The application registry is a table that stores information about the applications in the system. The event registry is a table that stores information about the events that trigger notifications. The UX page registry is a table that stores information about the UX pages that are available for portfolios.

#### NEW QUESTION # 27

Users with what role can be considered for resource planning?

- A. pps\_resource.
- B. it\_project\_user.
- C. it\_user.
- D. it\_pps\_user.

**Answer: A**

Explanation:

Explanation

According to the ServiceNow Resource Management document, users with the pps\_resource role can be considered for resource planning, as this role grants access to the Resource Management application and allows the users to view and update their resource allocations. The other options are not correct, as they are not roles that are related to resource planning. The it\_project\_user role grants access to the Project Portfolio Management application and allows the users to create and update projects. The it\_user role grants access to the IT Service Management application and allows the users to manage incidents, problems, and changes. The it\_pps\_user role grants access to the Project Portfolio Suite application and allows the users to manage portfolios, programs, and projects.

#### NEW QUESTION # 28

If a sub-project and parent project have different project currencies, this property should be set to true for cost roll-ups.

- A. com.snc.project.multicurrency.rollup\_if\_different
- B. com.snc.project.copy.additional\_attributes
- C. com.snc.project.rollup\_project\_start\_date
- D. com.snc.project.calculate\_roi

**Answer: A**

Explanation:

Explanation

According to the ServiceNow documentation<sup>1</sup>, this property controls whether the cost roll-ups are performed when a sub-project and parent project have different project currencies. If this property is set to true, then the system converts the sub-project currency to the parent project currency using the exchange rate table and performs the cost roll-ups. If this property is set to false, then the system does not perform the cost roll-ups for sub-projects with different currencies.
