

# New Release Salesforce Data-Con-101 Exam Questions: Right Preparation Method [2026]

2026 Latest ITexamReview Data-Con-101 PDF Dumps and Data-Con-101 Exam Engine Free Share:  
[https://drive.google.com/open?id=1Dh34PgFmjOYGgTUCp\\_0z32LNvVrXZ5DC](https://drive.google.com/open?id=1Dh34PgFmjOYGgTUCp_0z32LNvVrXZ5DC)

The policy of "small profits "adopted by our company has enabled us to win the trust of all of our Data-Con-101 customers, because we aim to achieve win-win situation between all of our customers and our company. And that is why even though our company has become the industry leader in this field of Data-Con-101 Exam Questions for so many years and our Data-Con-101 exam materials have enjoyed such a quick sale all around the world we still keep an affordable price on our Data-Con-101 study guide for all of our customers and never want to take advantage of our famous brand.

It is exceedingly helpful in attaining a suitable job when qualified with Data-Con-101 certification. It is not easy to get the Data-Con-101 certification, while certified with which can greatly impact the future of the candidates. Now, please take Data-Con-101 practice dumps as your study material, you will pass your exam with Data-Con-101 practice materials successfully. Data-Con-101 free demo is available for everyone. Our Data-Con-101 practice dumps are extremely detailed and complete in all key points which will be in the real test. Believe us and you can easily pass by our Data-Con-101 practice dumps.

## Data-Con-101 PDF | New Data-Con-101 Test Syllabus

You can find that there are three versions of the Data-Con-101 training questions: the PDF, Software and APP online. As you if you have more time at home, you can use the Software version of Data-Con-101 exam materials. If you are a person who likes to take notes, you can choose the PDF version. You can print out the PDF version of Data-Con-101 Practice Engine, carry it with you and read it at any time. If you are used to reading on a mobile phone, you can use our APP version.

## Salesforce Data-Con-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Identity Resolution: This domain explores creating unified customer profiles through matching and reconciliation processes. It covers how rule sets determine when records link together, how conflicting data is resolved, and understanding the outcomes and use cases of unified identities.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Data Cloud Setup and Administration: This domain focuses on configuring and managing Data Cloud environments through permissions, data streams, data bundles, and data spaces. It also covers administrative tools and techniques for diagnosing and exploring data using reports, dashboards, flows, APIs, and explorer tools.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Data Ingestion and Modeling:</b> This domain addresses bringing data into Data Cloud and structuring it properly through transformation, ingestion from various sources, and data mapping. It emphasizes best practices for modeling data to support identity resolution and validating ingested data using available tools.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Segmentation and Insights:</b> This domain centers on creating audience segments and deriving analytical insights from Data Cloud. It includes configuring and maintaining segments, analyzing membership scenarios, and distinguishing between calculated insights and real-time streaming insights.</li> </ul>

## Salesforce Certified Data Cloud Consultant Sample Questions (Q111-Q116):

### NEW QUESTION # 111

What should an organization use to stream inventory levels from an inventory management system into Data Cloud in a fast and scalable, near-real-time way?

- A. Commerce Cloud Connector
- B. Marketing Cloud Personalization Connector
- C. Cloud Storage Connector
- **D. Ingestion API**

**Answer: D**

Explanation:

The Ingestion API is a RESTful API that allows you to stream data from any source into Data Cloud in a fast and scalable way. You can use the Ingestion API to send data from your inventory management system into Data Cloud as JSON objects, and then use Data Cloud to create data models, segments, and insights based on your inventory data. The Ingestion API supports both batch and streaming modes, and can handle up to 100,000 records per second. The Ingestion API also provides features such as data validation, encryption, compression, and retry mechanisms to ensure data quality and security. ### NEW QUESTION # 112

A consultant is helping a beauty company ingest its profile data into Data Cloud. The company's source data includes several fields, such as eye color, skin type, and hair color, that are not fields in the standard Individual data model object (DMO). What should the consultant recommend to map this data to be used for both segmentation and identity resolution?

- A. Create a custom DMO with only the additional fields and map it to the standard Individual DMO.
- B. Duplicate the standard Individual DMO and add the additional fields.
- **C. Create custom fields on the standard Individual DMO.**
- D. Create a custom DMO from scratch that has all fields that are needed.

**Answer: C**

Explanation:

The best option to map the data to be used for both segmentation and identity resolution is to create custom fields on the standard Individual DMO. This way, the consultant can leverage the existing fields and functionality of the Individual DMO, such as identity resolution rulesets, calculated insights, and data actions, while adding the additional fields that are specific to the beauty company's data. Creating a custom DMO from scratch or duplicating the standard Individual DMO would require more effort and maintenance, and might not be compatible with the existing features of Data Cloud. Creating a custom DMO with only the additional fields and mapping it to the standard Individual DMO would create unnecessary complexity and redundancy, and might not allow the use of the custom fields for identity resolution. ### NEW QUESTION # 113

Cumulus Financial wants to create a segment of individuals based on transaction history data. This data has been mapped in the data model and is accessible via multiple container paths for segmentation. What happens if the optimal container path for this use case is not selected?

- A. Data Cloud segmentation will automatically select the optimal container path.

- B. The resulting segment will not be generated.
- C. Alternate container paths will be suggested before the segment is published.
- **D. The resulting segment may be smaller or larger than expected.**

**Answer: D**

Explanation:

In Salesforce Data Cloud, when segmenting individuals based on transaction history data, there may be multiple paths to the same data through different objects in the data model. If the wrong container path is selected:

The segment may pull in too many or too few individuals because different container paths may define relationships differently. Some records may be unintentionally excluded or duplicated, affecting segmentation accuracy.

Identity resolution and relationships between objects might not behave as expected.

Why Not A? Data Cloud does not suggest alternate container paths automatically. The user must choose the correct path.

Why Not C? Data Cloud does not automatically select the optimal path; it relies on the user's selection.

Why Not D? The segment will still be generated but may have inaccurate results.

#### NEW QUESTION # 114

During an implementation project, a consultant completed ingestion of all data streams for their customer. Prior to segmenting and acting on that data, which additional configuration is required?

- A. Data Activation
- B. Calculated Insights
- **C. Identity Resolution**
- D. Data Mapping

**Answer: C**

Explanation:

After ingesting data from different sources into Data Cloud, the additional configuration that is required before segmenting and acting on that data is Identity Resolution. Identity Resolution is the process of matching and reconciling source profiles from different data sources and creating unified profiles that represent a single individual or entity<sup>1</sup>. Identity Resolution enables you to create a 360-degree view of your customers and prospects, and to segment and activate them based on their attributes and behaviors<sup>2</sup>. To configure Identity Resolution, you need to create and deploy a ruleset that defines the match rules and reconciliation rules for your data<sup>3</sup>. The other options are incorrect because they are not required before segmenting and acting on the data. Data Activation is the process of sending data from Data Cloud to other Salesforce clouds or external destinations for marketing, sales, or service purposes<sup>4</sup>. Calculated Insights are derived attributes that are computed based on the source or unified data, such as lifetime value, churn risk, or product affinity<sup>5</sup>. Data Mapping is the process of mapping source attributes to unified attributes in the data model. These configurations can be done after segmenting and acting on the data, or in parallel with Identity Resolution, but they are not prerequisites for it. #### NEW QUESTION # 115

An analyst from Cloud Kicks needs to get quick Insights to determine the average sales per day during the past week. What should a consultant recommend?

- **A. Salesforce reports**
- B. salesforce flows
- C. Lightning web component utilizing Query API
- D. Segment activation to Azure

**Answer: A**

Explanation:

To help the analyst from Cloud Kicks determine the average sales per day during the past week, Salesforce Reports is the most efficient and straightforward solution. Here's a detailed breakdown:

Understanding Salesforce Reports :Salesforce Reports is a native tool within the Salesforce platform that allows users to create,

customize, and analyze data in various formats. It is particularly well-suited for quick insights and ad-hoc analysis without requiring complex development or integrations.

Why Not Other Options?

Option A (Salesforce Flows) : While Salesforce Flows is a powerful automation tool, it is not designed for analytical purposes. Creating a flow to calculate average sales per day would require additional configuration and logic, making it unnecessarily complex for this use case.

Option B (Lightning Web Component Utilizing Query API) : Using a Lightning Web Component with the Query API involves custom development. While this approach is flexible, it is overkill for a simple analytical task like calculating average sales.

Option D (Segment Activation to Azure) : Segment activation refers to exporting segmented customer data to external platforms like Azure. This process is unrelated to generating quick insights and would introduce unnecessary complexity for this requirement.

How Salesforce Reports Can Be Used :

Step 1: Create a Report : Navigate to the Salesforce Reports tab and create a new report based on the relevant object (e.g., Opportunities or Orders).

Step 2: Filter by Date Range : Apply a filter to include only records from the past week. For example, set the "Close Date" field to "Last Week."

Step 3: Add Summary Fields : Use summary formulas or grouping to calculate total sales for each day. Then, compute the average sales per day by dividing the total sales by the number of days in the range.

Step 4: Run the Report : Execute the report to view the results instantly.

Salesforce Documentation Reference :Salesforce's official documentation highlights that Reports are the go-to tool for analyzing and summarizing data quickly. They are designed to provide actionable insights without requiring advanced technical skills, making them ideal for tasks like calculating average sales.

By leveraging Salesforce Reports, the analyst can efficiently obtain the required insights without additional development or integration efforts.

## NEW QUESTION # 116

.....

Considering all customers' sincere requirements, Data-Con-101 test question persist in the principle of "Quality First and Clients Supreme" all along and promise to our candidates with plenty of high-quality products, considerate after-sale services as well as progressive management ideas. Numerous advantages of Data-Con-101 training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing, secure privacy protection and so forth. From the customers' point of view, our Data-Con-101 Test Question put all candidates' demands as the top priority. We treasure every customer' reliance and feedback to the optimal Data-Con-101 practice test.
