Our product's passing rate is 99% which means that you almost can pass the test with no doubts. The reasons why our JN0-336 Test Guide's passing rate is so high are varied. Firstly, our test bank includes two forms and they are the PDF test questions which are selected by the senior lecturer, published authors and professional experts and the practice test software which can test your mastery degree of our Security, Specialist (JNCIS-SEC) study question at any time. The two forms cover the syllabus of the entire test. Our questions and answers include all the questions which may appear in the exam and all the approaches to answer the questions. So we provide the strong backing to help clients to help them pass the test.

Individuals who pass the Security, Specialist (JNCIS-SEC) certification exam demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. TrainingDumps is aware that preparing with outdated JN0-336 Study Material results in a loss of time and money.

**Juniper - JN0-336 - Security, Specialist (JNCIS-SEC) Unparalleled New Test Book**

The study materials from our company can help you get your certification easily, we believe that you have been unable to hold yourself back to understand our Security, Specialist (JNCIS-SEC) guide torrent, if you use our study materials, it will be very easy for you to save a lot of time. In order to meet the needs of all customers, Our JN0-336 study torrent has a long-distance aid function. If you feel confused about our JN0-336 test torrent when you use our products, do not hesitate and send a remote assistance invitation to us for help, we are willing to provide remote assistance for you in the shortest time.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q75-Q80):

### NEW QUESTION # 75

Your JIMS server is unable to view event logs.

Which two actions would you take to solve this issue? (Choose two.)

- A. Enable remote event log management within Windows Firewall on the JIMS server.
- B. Enable remote event log management within Windows Firewall on the necessary domain controllers.
- C. Enable remote event log management within Windows Firewall on the necessary Exchange servers.
- D. Enable the correct host-inbound-traffic rules on the SRX Series devices.

**Answer: A,B**

Explanation:

JIMS needs to access the event logs from domain controllers to function properly, as it relies on these logs to track user and device activity across the network. If the Windows Firewall on the domain controllers is blocking this access, enabling remote event log management will allow JIMS to retrieve the necessary information.

While it's less common, ensuring that any firewall settings on the JIMS server itself do not block outgoing requests or responses related to event log management is also crucial. This ensures that JIMS can send out requests and receive responses without any hindrance from its own firewall.

### NEW QUESTION # 76

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- A. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.
- B. The fab interface enables configuration synchronization.
- C. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.
- D. Heartbeat signals sent on the fab interface monitor the health of the control plane link.

**Answer: A,C**

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent over the fab interface.

### NEW QUESTION # 77

Which two statements are true about the vSRX? (Choose two.)

- A. It does not have VMXNET3 vNIC support.
- B. It has VMXNET3 vNIC support.
- C. UNIX is the base OS.
- D. Linux is the base OS.

**Answer: B,D**

Explanation:

Reference: Juniper Networks Security, Specialist (JNCIS-SEC) Study Guide, Chapter 1: Introduction to Junos Security, page 1-8. The vSRX is a virtual security appliance that runs on a virtual machine. It provides firewall, VPN, and other security services in a virtualized environment.

The vSRX is based on a version of Junos OS that is optimized for virtualization. It runs on a Linux kernel and uses a KVM hypervisor. It supports VMware ESXi and KVM hypervisors.

The vSRX has support for VMXNET3 vNICs, which are high-performance virtual network interfaces provided by VMware. These interfaces can provide higher throughput and lower CPU utilization than other virtual NIC types.

**NEW QUESTION # 78**

Which solution enables you to create security policies that include user and group information?

- A. NETCONF
- B. Network Director
- **C. JIMS**
- D. ATP Appliance

**Answer: C**

Explanation:

The solution that enables you to create security policies that include user and group information is JIMS (Juniper Identity Management Service). JIMS collects and maintains a large database of user, device, and group information from Active Directory domains or syslog sources, and enables SRX Series devices to rapidly identify thousands of users in a large, distributed enterprise. With JIMS, you can create security policies that include user and group information, and enforce user-based access control policies to protect network resources.

**NEW QUESTION # 79**

Exhibit

□ You are asked to track BitTorrent traffic on your network. You need to automatically add the workstations to the High\_Risk\_Workstations feed and the servers to the BitTorrent\_Servers feed automatically to help mitigate future threats. Which two commands would add this functionality to the FindThreat policy? (Choose two.)

- A. □
- **B. □**
- **C. □**
- D. □

**Answer: B,C****NEW QUESTION # 80**

.....

Practice on Juniper JN0-336 practice test software improves your problem-solving skills and enables you to complete the Juniper JN0-336 exam within the time set. Practice with JN0-336 practice test software to increase your capability to understand the queries and solve them quickly during the JN0-336 Exam. TrainingDumps is a reliable platform, offering Juniper JN0-336 pdf questions and practice tests for the last many years. Thousands of candidates have already used them for their Juniper JN0-336 exam preparation and gave positive feedback.
