Huawei HCSP-Presales-Government Public Services V1.0 Sample Questions (Q107-Q112):

NEW QUESTION # 107

In an intelligent-connected mixed traffic environment, which types of vehicles are currently served?

- A. Traditional vehicles
- B. Intelligent-connected vehicles
- C. ADS vehicles (vehicles with Autonomous Driving Systems)

Answer: A,B,C

Explanation:

The solution is designed to serve traditional vehicles (via roadside sensing & services), ADS vehicles, and intelligent-connected vehicles, ensuring compatibility and collaboration among different vehicle types.

NEW QUESTION # 108

Trusted-Computing (Xinchuang) PCs mainly use two operating systems: Kylin (KOS) and UnionTech (UOS).

- A. False
- **B. True**

Answer: B

Explanation:

Policy documents and industry directories confirm that Kylin OS and UnionTech UOS are the two major domestic operating systems in the Xinchuang ecosystem. Both have passed national security certifications and are widely deployed in government, finance, and energy sectors, together holding over 90% of the market share.

NEW QUESTION # 109

Why do we need to build a comprehensive data-governance system?

- **A. To provide an arbitration body and escalation mechanism when disputes arise**
- **B. To ensure operators have standardized processes and guidance**
- **C. To ensure that key data assets have clear business management responsibilities**
- **D. To ensure sufficient resources for the required talent, organization, and budget in governance**
- **E. To provide stable principles and basis for IT construction**

Answer: A,B,C,D,E

Explanation:

A comprehensive governance system must cover standard processes, resource allocation, dispute-resolution mechanisms, clear responsibility for key data, and stable IT principles-aligning with multi-dimensional governance frameworks (organization, process, technology, and responsibility).

NEW QUESTION # 110

Device Access Service (IoTDA) is Huawei Cloud's IoT platform that connects massive devices to the cloud.

In Huawei's data platform solution, which descriptions of IoTDA capabilities are correct?

- **A. Device management**
- B. Industry applications
- **C. Device access**
- **D. Message communication**
- **E. Data routing/flow**

Answer: A,C,D,E

Explanation:

IoTDA provides device access, device management, message communication, and data routing/flow for connected devices. Industry applications (D) are built on top of these capabilities but are not themselves a core function of IoTDA.

NEW QUESTION # 111

Government departments often have diverse, long-tail AI needs, multiple AI vendors, and siloed systems without unified planning. It is recommended to build a unified computing resource pool and AI platform, with multi-tenant capability for secure isolation.
