100% Pass SAP - C-ACDET-2506 - SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite –Professional Test Dates

Taking the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 test and beginning SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 exam preparation with the suggested C-ACDET-2506 exam preparation materials is the best and quickest course of action. You can rely on SAP C-ACDET-2506 Exam Questio SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 for thorough C-ACDET-

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q56-Q61):

NEW QUESTION # 56
Custom partner bundles can be leveraged to share and apply baselines in which deployment scenario?

- **A. Greenfield**
- B. Grayfield
- C. Bluefield
- D. Brownfield

Answer: A

Explanation:
Custom partner bundles are predefined baseline configurations provided by SAP or implementation partners and are primarily used inGreenfield deployments, where a new SAP Ariba solution is being implemented from scratch. These bundles help accelerate deployment by applying standard best-practice settings and templates as a starting point in the Test environment.
In Bluefield or Brownfield deployments, which involve migration or upgrade of existing systems, incremental or selective configuration migration is more typical, and partner bundles are less relevant. Grayfield is not a recognized SAP Ariba deployment scenario.
Using partner bundles in Greenfield supports standardized setups and reduces manual configuration errors early in the project lifecycle, enabling faster time to value.

NEW QUESTION # 57
Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- **A. You cannot make other configuration updates in ICM when a migration operation is in progress.**
- B. If any configuration type fails during the migration process, you cannot create a new migration request.
- C. You can revert migrated configurations from the target site.
- **D. The status changes to Complete when migration is finished.**

Answer: A,D

Explanation:
During Greenfield migrations using the Intelligent Configuration Manager (ICM),no other configuration updates can be made in ICM while a migration operation is activeto ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully,the status updates to
"Complete", indicating the configuration is fully migrated and applied.
Contrary to option A, there is no built-in revert or rollback feature in ICM for deployed configurations; changes require new migration cycles. Option D is incorrect because if a migration fails, you can correct the issues and create a new migration request to retry. This process ensures controlled and orderly deployment of configurations.

NEW QUESTION # 58
Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Configure a visibility condition
- **B. Enable Require value before publish**
- C. Configure a validity condition
- D. Enable Required

Answer: B

Explanation:
SAP Ariba provides a specific property in the Advanced tab called"Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but

does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 59
A French translation of a custom field label needs to be updated.
Where do you update it?

- A. Layout tab
- B. Field Configuration Label
- C. Customization Manager → Views
- D. AML & Translations Upload

Answer: D

NEW QUESTION # 60
What does ? represent in the ariba expression below? HierarchicalType=="SubAgreement" ? false: true

- A. then
- B. replace
- C. else
- D. if

Answer: A

NEW QUESTION # 61
......

As long as what you are looking for is high quality and accuracy practice materials, then our C-ACDET-2506 training guide is your indispensable choices. We are sufficiently definite of the accuracy and authority of our C-ACDET-2506 practice materials. So lousy materials will lead you end up in failure. They cannot be trusted unlike our C-ACDET-2506 Study Materials. Come together and our materials will serve as a doable way to strengthen your ability to solve questions on your way to success.
