NCP-US Test Discount Voucher, Brain NCP-US Exam

Our experts all have a good command of exam skills to cope with the NCP-US preparation materials efficiently in case you have limited time to prepare for it, because all questions within them are professionally co-related with the NCP-US exam. Moreover, to write the Up-to-date NCP-US Practice Braindumps, they never stop the pace of being better. As long as you buy our NCP-US study quiz, you will find that we update it from time to time according to the exam center.

Nutanix NCP-US Exam is a certification that is recognized globally and is highly valued by employers in the IT industry. Nutanix Certified Professional - Unified Storage v6.5 certification demonstrates that the candidate has a deep understanding of Nutanix Unified Storage solutions and can effectively manage and deploy them in complex IT environments. The Nutanix NCP-US Certification is also a prerequisite for many advanced Nutanix certifications.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q55-Q60):

NEW QUESTION # 55
File Analytics analyzes data for what period of time?

- A. Hourly up to 90 days
- B. Daily up to 5 years
- C. Daily up to 1 year
- D. Monthly up to 5 years

Answer: B

NEW QUESTION # 56
Which share workload type should be configured to support workloads with small I/O?

- A. Random
- B. Sequential
- C. Compression
- D. Default

Answer: A

NEW QUESTION # 57
In order to deploy Nutanix Files, which two networks should be created? (Choose two.)

- A. Client Network
- B. Storage Network
- C. Overlay Network
- D. Management Network

Answer: A,D

NEW QUESTION # 58
Refer the exhibit.

An administrator has received a support request indicating that after an update and reboot Of a Linux VM, the VM is no longer able to access the Volume Groups (VG) assigned to it.
When the administrator investigates the issue, the error message shown in the exhibit is displayed.
What are two possible reasons for the behavior? (Choose two.)

- A. The administrator has a mistake when inputting the data services IP.
- B. The client's IQN is no longer in the whitelist of the affected VG
- C. A firewall rule is preventing the client to access the x.x.x.250 IP.
- D. The new iscsiadm binary is not compatible with the version.

Answer: A,B

Explanation:

iscsiadm is a command-line tool that allows you to manage iSCSI connections and devices. The error message shown in the exhibit indicates that there is a problem with connecting to the iSCSI target at x.x.x.250.

https://stackoverflow.com/questions/29954195/error-message-from-iscsiadm-while-trying-to-connect-to-a-iscsi-drive Nutanix volume groups are collections of vDisks that can be exposed to virtual machines or physical hosts using iSCSI protocol. Nutanix volume groups have a whitelist feature that allows you to specify which clients can access them.

https://portal.nutanix.com/page/documents/solutions/details?targetId=BP-2049-Nutanix-Volumes:BP-2049-Nutanix-Volumes

1. The administrator has a mistake when inputting the data services IP. This could cause the iscsiadm command to fail to discover or login to the iSCSI target at x.x.x.250. The administrator should verify that they have entered the correct data services IP for the Nutanix volume group.

2. The client's IQN is no longer in the whitelist of the affected VG. This could cause the iSCSI target to reject or ignore the connection request from the client. The administrator should check that they have added or updated the client's IQN in the whitelist of the Nutanix volume group.

NEW QUESTION # 59

During a Windows 2019 Failover Cluster deployment, an administrator is unable to deploy a Nutanix Files witness share.
The Nutanix Files cluster environment is as follows:
SMB shares need to be highly available
DFS is enabled for the cluster
Three FSVMs are deployed
General share type is used
WORM is disabled
What should the administrator do to resolve the issue?

- A. Disable DFS on the share.
- B. Enable WORM.
- C. Use homes as the share type.
- D. Use NFS for shares.

Answer: A
