

NetSec-Pro Reliable Dumps Questions | Valuable NetSec-Pro Feedback

P.S. Free & New NetSec-Pro dumps are available on Google Drive shared by Prep4pass: https://drive.google.com/open?id=1jlkZGh3Z9J4_nBzhv2hCmoQgcoanf69V

Are you tired of feeling overwhelmed and unsure about how to prepare for the Palo Alto Networks Network Security Professional (NetSec-Pro) exam? Are you ready to take control of your future and get the NetSec-Pro certification you need to accelerate your career? If so, it's time to visit Prep4pass and download real Palo Alto Networks NetSec-Pro Exam Dumps. Our team of experts has designed a NetSec-Pro Exam study material that has already helped thousands of students just like you achieve their goals. We offer a comprehensive NetSec-Pro practice exam material that is according to the content of the Palo Alto Networks NetSec-Pro test.

Before making a final purchase decision, customers of Prep4pass can download a free demo to test the validity of the Palo Alto Networks Network Security Professional (NetSec-Pro) exam questions we offer. If the NetSec-Pro certification test's topics change after you have purchased our NetSec-Pro Dumps, we will provide you with free updates for up to 365 days. We guarantee the authenticity of our test questions and pledge to help you prepare for Palo Alto Networks NetSec-Pro exam quickly and cost-effectively.

>> NetSec-Pro Reliable Dumps Questions <<

Board Your Capacities By Updated Palo Alto Networks NetSec-Pro Exam Dumps

With the simulation test, all of our customers will get accustomed to the NetSec-Pro exam easily, and get rid of bad habits, which may influence your performance in the real NetSec-Pro exam. In addition, the mode of NetSec-Pro learning guide questions and answers is the most effective for you to remember the key points. During your practice process, the NetSec-Pro test questions would be absorbed, which is time-saving and high-efficient. Concentrated all our energies on the study NetSec-Pro learning guide we never change the goal of helping candidates pass the exam. Our NetSec-Pro test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our NetSec-Pro exam materials, and you won't be regret.

Palo Alto Networks Network Security Professional Sample Questions (Q33-Q38):

NEW QUESTION # 33

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- A. Prisma Cloud dashboard
- B. Service connection firewall
- C. Strata Cloud Manager (SCM)

- **D. Strata Logging Service**

Answer: C,D

Explanation:

Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service. Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.

"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

NEW QUESTION # 34

In a service provider environment, what key advantage does implementing virtual systems provide for managing multiple customer environments?

- A. Shared threat prevention policies across all tenants
- **B. Logical separation of control and Security policy**
- C. Unified logging across all virtual systems
- D. Centralized authentication for all customer domains

Answer: B

Explanation:

Virtual systems provide logical separation in a single physical firewall, allowing different customers (or tenants) to have isolated control and security policies.

"Virtual systems enable service providers to offer logically separated, independent environments on a single firewall. Each virtual system can have its own security policies, interfaces, and administrators." (Source: Virtual Systems) This ensures secure, tenant-specific segmentation within multi-tenant environments.

NEW QUESTION # 35

Which two configurations are required when creating deployment profiles to migrate a perpetual VM-Series firewall to a flexible VM? (Choose two.)

- **A. Allocate the same number of vCPUs as the perpetual VM.**
- **B. Allow only the same security services as the perpetual VM.**
- C. Deploy virtual Panorama for management.
- D. Choose "Fixed vCPU Models" for configuration type.

Answer: A,B

Explanation:

When migrating from a perpetual VM-Series firewall license to a flexible VM licensing model, two critical steps are needed: Allocate same number of vCPUs- This ensures that the VM-Series capacity remains consistent and avoids resource bottlenecks.

"When migrating perpetual VM-Series licenses to flexible VM licensing, allocate the same vCPU and memory resources to ensure equivalent performance." (Source: VM-Series Flexible Licensing Migration) Limit to same security services- Flexible licensing requires maintaining the same security services to preserve licensing compliance.

"Ensure that you allow only the same security services on the flexible VM instance as were licensed on the perpetual VM." (Source: Flexible Licensing and Service Subscriptions)

NEW QUESTION # 36

A network administrator obtains Palo Alto Networks Advanced Threat Prevention and Advanced DNS Security subscriptions for edge NGFWs and is setting up security profiles. Which step should be included in the initial configuration of the Advanced DNS Security service?

- A. Create overrides for all company owned FQDNs.
- B. Enable Advanced Threat Prevention with default settings and only focus on high-risk traffic.
- **C. Configure DNS Security signature policy settings to sinkhole malicious DNS queries.**
- D. Create a decryption policy rule to decrypt DNS-over-TLS / port 853 traffic.

Answer: C

Explanation:

Advanced DNS Security uses a signature policy to sinkhole malicious DNS queries and prevent them from resolving. "The DNS Security service integrates with Anti-Spyware profiles, and you must configure signature policy settings to sinkhole malicious queries. This proactively stops traffic to known malicious domains." (Source: Configure DNS Security) Sinkholing ensures that DNS queries to malicious FQDNs are redirected to a safe IP, preventing compromise.

NEW QUESTION # 37

Which set of attributes is used by IoT Security to identify and classify appliances on a network when determining Device-ID?

- A. Device model, firmware version, and user credential
- **B. MAC address, device manufacturer, and operating system**
- C. Hostname, application usage, and encryption method
- D. IP address, network traffic patterns, and device type

Answer: B

Explanation:

IoT Security uses MAC address, device manufacturer, and OS information to identify and classify devices via Device-ID.

"IoT Security uses passive network traffic analysis to fingerprint devices based on the MAC address, manufacturer, and operating system to ensure accurate classification." (Source: IoT Security Device-ID and Classification) These attributes provide a robust, manufacturer-agnostic method to fingerprint IoT devices.

NEW QUESTION # 38

.....

This updated NetSec-Pro exam study material consists of NetSec-Pro PDF dumps, desktop practice exam software, and a web-based practice test. Experts have prepared the NetSec-Pro desktop-based exam simulation software. There are NetSec-Pro Actual Questions in the practice test to give you an exact impression of the Palo Alto Networks NetSec-Pro original test.
