PDFBraindumps EC-Council Certified CISO (CCISO) (712-50) dumps give surety to confidently pass the EC-Council Certified CISO (CCISO) (712-50) exam on the first attempt.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q14-Q19):

NEW QUESTION # 14

A security officer wants to implement a vulnerability scanning program. The officer is uncertain of the state of vulnerability resiliency within the organization's large IT infrastructure. What would be the BEST approach to minimize scan data output while retaining a realistic view of system vulnerability?

- A. Perform the scans only during off-business hours
- B. Decrease the vulnerabilities within the scan tool settings
- C. Filter the scan output so only pertinent data is analyzed

- **D. Scan a representative sample of systems**

Answer: D

Explanation:

Scanning Strategy:

* Scanning a representative sample of systems minimizes the output data while providing a realistic overview of the organization's vulnerability landscape.

Practical Benefits:

* This approach reduces operational impact and data noise while ensuring that insights are actionable and reflective of the larger environment.

Supporting Reference:

* EC-Council CCISO guidance recommends representative sampling as a best practice for organizations with large infrastructures to balance thoroughness and efficiency.

NEW QUESTION # 15

Which of the following information may be found in table top exercises for incident response?

- A. Security control selection
- **B. Process improvements**
- C. Real-time to remediate
- D. Security budget augmentation

Answer: B

NEW QUESTION # 16

The patching and monitoring of systems on a consistent schedule is required by?

- A. Audit best practices
- B. Risk Management frameworks
- **C. Industry best practices**
- D. Local privacy laws

Answer: C

Explanation:

Patching and Monitoring as Best Practices: Regular patching and system monitoring are considered best practices to ensure vulnerabilities are addressed promptly and systems remain secure.

Why This is Correct:

* Industry best practices emphasize consistency in patching and monitoring as foundational to maintaining a secure environment.

Why Other Options Are Incorrect:

* A. Local privacy laws: May require security but do not typically mandate patching schedules.

* C. Risk management frameworks: Focus on broader strategies, not specific operational practices.

* D. Audit best practices: Ensure compliance but don't define operational schedules.

References: EC-Council aligns with industry best practices for patch management and system monitoring to maintain organizational security posture.

NEW QUESTION # 17

Payment Card Industry (PCI) compliance requirements are based on what criteria?

- A. The duration card holder data is retained
- B. The types of cardholder data retained
- C. The size of the organization processing credit card data
- **D. The number of transactions performed per year by an organization**

Answer: D
